Introduction to the DRDP (2015)

Welcome to the Desired Results Developmental Profile (2015) [DRDP (2015)]: A Developmental Continuum from Early Infancy to Kindergarten Entry. The DRDP (2015) is a formative assessment instrument developed by the California Department of Education for young children and their families to be used to inform instruction and program development.

Key Features of the DRDP (2015):

- The DRDP (2015) is administered in natural settings through teacher observations, family observations, and examples of children's work. Ongoing documentation of children's knowledge and skills in everyday environments is a recommended practice for early childhood assessment.
- The DRDP (2015) represents a full continuum of development from early infancy up to kindergarten entry. It has two views: the Infant/Toddler view for use with children in infant/toddler programs, and the Preschool View, for children in preschool programs.
- The Preschool View has two forms: The Comprehensive View containing domains related to all areas of the Preschool Learning Foundations; and the Fundamental View, associated with essential domains of school readiness.
- The DRDP (2015) is designed for use with all children from early infancy up to kindergarten entry, including children with Individualized Family Service Plans (IFSPs) and Individualized Education Programs (IEPs).
- The DRDP (2015) takes into consideration the specific cultural and linguistic characteristics of California's diverse population of young children, with specific consideration for children who are young dual language learners (see section below).
- The DRDP (2015) was developed with the goal of ensuring that all children have the opportunity to demonstrate their knowledge and skills. To enable access to the assessment for diverse populations, the principles of Universal Design were followed.
- The DRDP (2015) includes domains that meet the federal Office of Special Education Programs (OSEP) child outcome reporting requirements for children with Individualized Family Service Plans (IFSPs) or Individualized Education Programs (IEPs).

Information about Selected Key Features

Three of these key features: (1) consideration of young children who are dual language learners, (2) universal design and adaptations for children with IFSPs and IEPs, and (3) a detailed description of the developmental domains that make up the instrument, are described in more detail to help teachers and service providers better understand and rate the measures of the DRDP (2015).

Young Dual Language Learners and the DRDP (2015)

Dual language learners are children learning two or more languages at the same time, as well as those children learning a second language while continuing to develop their first (or home) language. A child's experience with one or more languages is an asset to build on in the early childhood setting. It is critical to consider the child's communication in all the languages that he or she is learning in order to have an accurate picture of a child's knowledge and skills. Young children, including children with disabilities, can successfully learn two or more languages. Learning two or more languages has linguistic, social, cognitive, academic, and cultural benefits. The path to learning one language shares many similarities with the path to learning two or more languages. There are also differences that must be taken into consideration when assessing young children who are dual language learners. Children may have vocabulary for concepts in one language and vocabulary for other concepts in another language. So it is important to assess children in all of the languages he or she understands and uses. The DRDP (2015) addresses cultural and linguistic responsiveness in two primary ways:

1. Teachers and service providers observe and document children's behavior in both the home language and English to obtain a more accurate profile of the children's knowledge and skills across developmental domains.
2. Teachers and service providers rate children's progress on two language development domains. The Language and Literacy Development (LLD) domain assesses all children's progress in developing foundational language and literacy skills where ratings should be based on skills in all languages. The English-Language Development (ELD) domain assesses current knowledge and skills and progress in learning to communicate in English.

Universal Design and the DRDP (2015)

In the context of assessment, "Universal Design” refers to the development of assessments that are appropriate for all children to the greatest extent possible. Universal Design allows children the opportunity to demonstrate their knowledge and skills in a variety of ways. All young children are entitled access to, and meaningful participation in, age-appropriate, individually-appropriate and culturally-appropriate early childhood curricula and assessments. Teachers and service providers support children's access and participation by identifying and providing learning opportunities, materials, and teaching strategies in flexible and individualized ways and through a variety of learning modalities. DRDP (2015) assessors apply universal design when they carefully consider the various ways young children can demonstrate knowledge or skills that reflect mastery of a developmental level.
The Eight Domains of the DRDP (2015)

The DRDP (2015) is made up of eight domains. The focus of each domain is on the acquisition of knowledge, skills, or behaviors that reflect each domain's developmental constructs. The domains and sub-domains of the Fundamental View, essential to school readiness, are marked with an asterisk (*).

Approaches to Learning–Self-Regulation* (ATL-REG)
The ATL-REG domain assesses two related areas that are recognized as important for young children's school readiness and success: Approaches to Learning and Self-Regulation. These areas have been combined into one domain because of the strong connections between them. The Approaches to Learning skills include attention maintenance, engagement and persistence, and curiosity and initiative. The Self-Regulation skills include self-comforting, self-control of feelings and behavior, imitation, and shared use of space and materials.

Social and Emotional Development* (SED)
The SED domain assesses children's developing abilities to understand and interact with others and to form positive relationships with nurturing adults and their peers. The knowledge or skill areas in this domain include identity of self in relation to others, social and emotional understanding, relationships and social interactions with familiar adults, relationships and interactions with peers, and symbolic and sociodramatic play.

Language and Literacy Development* (LLD)
The LLD domain assesses the progress of all children in developing foundational language and literacy skills. These skills can be demonstrated in any language and in any mode of communication. Language and literacy skills in a child's first language form the foundation for learning English. Therefore, dual language learners may demonstrate knowledge and skills in their home language, in English, or in both languages. LLD measures should be completed for all infants, toddlers, and preschool-age children, including those who are dual language learners.

English-Language Development* (ELD)
The ELD domain assesses the progress of children who are dual language learners in learning to communicate in English. The developmental progression described in the four ELD measures is related to the child's experiences with English, not the child's age. Keep in mind that children acquire English in different ways and at different rates. Factors that affect English acquisition include degree of exposure to English, level of support provided in their home/first language, and individual differences such as age of exposure to English or the structure of the child's home/first language. The ELD measures should be completed only for preschool-age children whose home language is other than English.

Cognition, Including Math* and Science (COG)
The COG domain focuses on observation, exploration of people and objects, and investigation of objects and concepts. The knowledge or skill areas in this domain include spatial relationships, cause and effect, classification, number sense of quantity, number sense of math operations, measurement, patterning, shapes, inquiry through observation and investigation, documentation and communication of inquiry, and knowledge of the natural world.

Physical Development–Health* (PD-HLTH)
The PD-HLTH domain assesses motor development and the development of routines related to personal care, safety, and nutrition. The knowledge or skill areas in this domain include perceptual-motor skills and movement concepts, gross locomotor movement skills, gross motor manipulative skills, fine motor manipulative skills, active physical play, nutrition, safety, and personal care routines (hygiene, feeding, dressing).

History-Social Science (HSS)
The HSS domain focuses on learning about the expectations of social situations, how to participate within a group, and the relationship between people and the environment in which they live. The knowledge or skill areas in this domain include sense of time, sense of place, ecology, conflict negotiation, and responsible conduct.

Visual and Performing Arts (VPA)
The VPA domain focuses on awareness and engagement in four areas of artistic expression. The knowledge or skill areas in this domain include visual art, music, drama, and dance.

About the Measures of the DRDP (2015)
The levels for each DRDP (2015) measure describe a developmental continuum, ranging from earlier developing to later developing competencies. The DRDP (2015) includes three types of continua:

- **Full Continuum Measures**: describe development from early infancy to early kindergarten. These measures should be used with all infants, toddlers, and preschool-age children.
- **Earlier Development Measures**: describe development that typically occurs from early infancy through early preschool ages and may be used with preschool-age children under specific conditions (identified as Conditional measures).
- **Later Development Measures**: describe development that typically occurs from early preschool ages up to kindergarten entry. These measures should be used with all preschool-age children.
Conditional Measures for Preschool-Age Children

Some measures in the DRDP Preschool View are considered conditional measures that are only assessed when certain conditions are met. These measures should be used if they assist teachers and service providers in planning a child's learning activities and supports, and documenting progress.

Conditional measures are used in three instances:

- If a preschool child has not developmentally moved beyond the four earlier-development measures.
- If a language other than English is spoken in the child's home.
- If the child is still working on the health measures (required for all children with IEPs).

Please note that the Earlier Development Measures, and the Physical Development and Health measures are required for children with IEPs.

### Measure Conditions Under Which to Assess

#### Earlier Development Measures

<table>
<thead>
<tr>
<th>Measure</th>
<th>Conditions Under Which to Assess</th>
</tr>
</thead>
<tbody>
<tr>
<td>ATL-REG 1: Attention Maintenance</td>
<td>Required for all infants and toddlers</td>
</tr>
<tr>
<td>ATL-REG 2: Self-Comforting</td>
<td>Required for all preschool-age children with IEPs</td>
</tr>
<tr>
<td>ATL-REG 3: Imitation</td>
<td>Recommended for a preschool-age child whose development is not beyond the latest developmental level</td>
</tr>
<tr>
<td>COG 1: Spatial Relationships</td>
<td>If useful, select any or all of these four measures to assess</td>
</tr>
</tbody>
</table>

#### English-Language Development Measures

<table>
<thead>
<tr>
<th>Measure</th>
<th>Conditions Under Which to Assess</th>
</tr>
</thead>
<tbody>
<tr>
<td>ELD 1: Comprehension of English (Receptive English)</td>
<td>Used if a language other than English is spoken in the child's home as indicated on the Information Page</td>
</tr>
<tr>
<td>ELD 2: Self-Expression in English (Expressive English)</td>
<td>Used only with preschool children</td>
</tr>
<tr>
<td>ELD 3: Understanding and Response to English Literacy Activities</td>
<td>Not used with children who are deaf or hard of hearing and not learning spoken language</td>
</tr>
<tr>
<td>ELD 4: Symbol, Letter, and Print Knowledge in English</td>
<td>If rated, complete all of the measures in the ELD domain*</td>
</tr>
</tbody>
</table>

#### Physical Development and Health Measures

<table>

</tr>
</tbody>
</table>

*Guidance for rating ELD measures for children who are dual language learners is provided in the section, "Young Dual Language Learners and the DRDP (2015)" on page Intro-2.

### The Developmental Levels

The number of levels in a measure varies depending on the competencies that are appropriate for that measure's developmental continuum. The levels are organized under four categories from early infancy up to kindergarten entry: Responding, Exploring, Building, and Integrating:

#### Responding (Earlir, Later)

Knowledge, skills, or behaviors that develop from basic responses (through using senses and through actions) to differentiated responses. Children generally engage in back-and-forth interactions with familiar adults and communicate through nonverbal messages.

#### Exploring (Earlir, Middle, Later)

Knowledge, skills, or behaviors that include active exploration including purposeful movement, purposeful exploration and manipulation of objects, purposeful communication, and the beginnings of cooperation with adults and peers. Children generally begin this period by using nonverbal means to communicate and, over time, grow in their ability to communicate verbally or use other conventional forms of language.

#### Building (Earlir, Middle, Later)

Knowledge, skills, or behaviors that demonstrate growing understanding of how people and objects relate to one another, how to investigate ideas, and how things work. Children use language to express thoughts and feelings, to learn specific early literacy and numeracy skills, and to increasingly participate in small group interactions and cooperative activities with others.

#### Integrating (Earlir)

Knowledge, skills, or behaviors that demonstrate the ability to connect and combine strategies in order to express complex thoughts and feelings, solve multi-step problems, and participate in a wide range of activities that involve social-emotional, self-regulatory, cognitive, linguistic, and physical skills. Children begin to engage in mutually supportive relationships and interactions.

Note that the developmental levels for the ELD domain differ from the above format as they represent the developmental progression for the acquisition of English as a second language during the early childhood years.
**Definitions of Terms in the Navigation Maps**

**Developmental Domain:** A crucial area of learning and development for children.

**Measure:** The developmental continuum along which a child’s observed behavior is assessed. Measures are the individual assessment items in the DRDP.

- **Full Continuum Measure:** Describes development from early infancy to early kindergarten.
- **Early Development Measure:** Describes development that typically occurs in infant/toddler and preschool years.
- **Later Development Measure:** Describes development that typically occurs in the preschool years and early kindergarten.

**Definition:** Specifies the aspects of development to be observed.

**Developmental Level:** A point along a developmental progression for a particular measure that ranges from earlier to later levels of development.

**Descriptor:** Defines the behaviors that would be observed for a child at that developmental level.

**Example:** Specific behaviors you might see that would demonstrate that a child has reached mastery of a particular developmental level. Note that the examples provided in the DRDP are not the only way a child can demonstrate mastery of a developmental level.

---

**Example of an Earlier Developmental Measure**

**ATL-REG 6: Engag**

Mark the latest developmental level the child has mastered:

- **Responsive:** Engages in activities on request.
- **Exploring:** Participates in simple activity briefly.
- **Building:** Participates in simple activity for at least 3-5 minutes.
- **Integrating:** Participates in activity with increasing complexity.

---

**Example of a Later Developmental Measure**

**ATL-REG 6: Engag**

Mark the latest developmental level the child has mastered:

- **Responsive:** Engages in activities on request.
- **Exploring:** Participates in simple activity briefly.
- **Building:** Participates in simple activity for at least 3-5 minutes.
- **Integrating:** Participates in activity with increasing complexity.
The 3 Steps to Completing the DRDP (2015)

Step 1: Observation and Documentation

The DRDP (2015) focuses on the child's behavior, knowledge, and skills. To capture a child's behavior, the DRDP (2015) incorporates observation in natural settings.

While observing and collecting documentation, remember that words, phrases, and sentences can be communicated and understood in a variety of ways, including spoken in the child's home language, signed, and through other communication modes (e.g., via a communication device). The teacher's and service provider's direct observations of a child are the primary method used to inform ratings and they should also use other sources of evidence to capture a more complete picture of a child's knowledge and skills. Other sources of evidence include the following:

- **Observations by others** – including teachers, family members/caregivers, and other service providers or caregivers, obtained through interview or conversations
- **Other documentation** – including samples of children's work, photographs, and video/audio recordings of children's communication and behavior

Observations should occur over time, in typical settings:
- In the child's typical program or settings such as child care, classrooms, or home;
- As the child interacts in familiar environments and routines with people he or she knows; and
- As the child engages in typical activities and routines.

The Important Role of Families in the Documentation Process

Family members have repeated opportunities to observe their child's activities and interactions over time and in a variety of situations. Their perspectives, combined with teachers' and service providers' observations, provide a more complete and reliable picture of a child's typical behaviors. Inviting family members to share observations of their child's development and behavior is a recommended practice for the DRDP (2015). The opportunity to observe a child's level of mastery is greatest when the child is interacting with a familiar adult. Because of this, it is helpful to observe a child interacting with family members. This is especially true for children who are new to a program or at the earliest levels (Responding Earlier and Responding Later). These observations can inform assessment decisions for all domains. They are particularly important for the SED and LLD domains since social interaction and communication skills are learned through repeated interactions with familiar adults.

Observation and Documentation for Young Dual Language Learners

Young dual language learners may demonstrate knowledge and skills in their home language, in English, or in both languages. They may also code-switch, which is using more than one language within a conversation. Therefore, communication in all languages the child uses should be considered when collecting documentation and completing the measures in all domains. The adult who is conducting observations and collecting documentation should speak the child's home language. If not, the adult must receive assistance from another adult, who does speak the child's home language. This may be an assistant teacher, director, parent, or other adult who knows the child.

Dual Language Learners’ Use of Code Switching

- Code switching is the use of multiple languages within a single conversation. It is a typical feature of learning two or more languages.
- As early as three years of age, children code switch to playfully experiment with the two languages and to serve their own social and communication goals. For example, children may code switch to emphasize or elaborate a point.
- Children might code switch when speaking with one person, or may use one language exclusively with one person and another language with another person.
- When children mix their two languages they use the grammatical rules of each language. For example, “I want leche” (“I want milk”) is an example of inserting a Spanish noun into a grammatically correct English sentence.

Using Adaptations

Adaptations are changes in the environment or differences in observed behavior that allow children with IFSPs or IEPs to demonstrate their knowledge and skills in typical environments. Seven broad categories of adaptations have been identified for children with IFSPs and IEPs for the DRDP (2015).

- The adaptations listed in the table below have been developed so that the assessment will more accurately measure a child's abilities rather than the impact of a child's disability (a more detailed description of the adaptations appears in Appendix D). Adaptations must be in place for the child during the normal course of the day, and they should also be in place during observations for the DRDP (2015). Everyone working with the child should be informed of any adaptations the child uses.
- New adaptations must not be introduced solely for the purpose of conducting the DRDP (2015) assessment.
- Consideration of adaptations should be made on a regular basis from early infancy and as the child develops and grows.
Seven Categories of Adaptations

Augmentative or Alternative Communication System
Methods of communication other than speech that allow a child who is unable to use spoken language to communicate with others.

Alternative Mode for Written Language
Methods of reading or writing used by a child who cannot see well enough to read or write or cannot hold and manipulate a writing utensil (e.g., pencil, pen) well enough to produce written symbols.

Visual Support
Adjustments to the environment that provide additional information to a child who has limited or reduced visual input.

Assistive Equipment or Device
Tools that make it possible or easier for a child to perform a task.

Functional Positioning
Strategic positioning and postural support that allow a child to have increased control of his body.

Sensory Support
Increasing or decreasing sensory input to facilitate a child’s attention and interaction in the environment.

Alternative Response Mode
Recognition that a child might demonstrate mastery of a skill in a unique way that differs from the child’s typically developing peers.

Step 2: Rating the Measures

Determining the Child’s Latest Level of Mastery
For each of the measures, determine the latest developmental level the child has mastered, and mark it appropriately.

The Descriptors and Examples
Consider the descriptors first, and then the examples, to determine which developmental level is most consistent with your observations and other documentation of the child’s typical behavior. A child may demonstrate behaviors at more than one developmental level. Choose the level that most closely represents the knowledge, skills, or behaviors the child demonstrates most consistently.

Descriptors:
The descriptors define the knowledge, skills, or behaviors expected at each level along the developmental continuum of the measure (see Navigation Maps). Each descriptor is illustrated by several examples of behaviors that are consistent with that developmental level. Most of the descriptors define discrete knowledge, skills, or behaviors. However, some include more than one behavior or skill, separated by “and,” “or,” or a semicolon (;) followed by “and.”

If the descriptor includes “or”:
The child only needs to demonstrate the behavior in one of the listed ways to demonstrate mastery for the developmental level. Either part of the descriptor may be observed to rate mastery at that level.

- For example, the descriptor for Exploring Later in LLD 5: Interest in Literacy is:
  Looks at books on own briefly or Chooses to join reading, singing, or rhyming activities led by an adult

If the child EITHER looks at books on own briefly OR chooses to join reading, singing, or rhyming activities led by an adult, mastery can be rated at this level.

What is Mastery?
A developmental level is mastered if the child demonstrates the knowledge, skills, and behaviors defined at that level:

- Consistently over time
- In different situations or settings

Important notes about mastery:
- Children may demonstrate mastery of knowledge and skills through a variety of communication modes, languages, and behaviors.
- Many of the behaviors that you observe in determining a child’s mastery level may not appear on the list of examples, although they are consistent with the descriptor.
If a descriptor includes “and”:

All parts of the descriptor are required for mastery and need to be observed together.

- For example, the descriptor for Building Earlier in ATL-REG 2: Self-Comforting is:
  *Anticipates need for comfort and prepares self by asking questions, getting a special thing, or in other ways.

The child needs to demonstrate both anticipatig a need for comfort and preparing self during the same observation.

If a descriptor includes a semi-colon (;) followed by “and”:

The child must demonstrate all the behaviors listed to rate the level as mastered, but not necessarily during the same observation within a DRDP rating period.

- For example, the descriptor for Exploring Later in SED 3: Relationships and Social Interactions with Familiar Adults is:
  *Initiates activities with familiar adults; and Seeks out assistance or support from familiar adults.

To be rated as mastered at this level, the child must BOTH initiate activities with familiar adults AND seek out assistance or support from familiar adults. The assessor does not have to observe both behaviors during the same observation within a DRDP rating period.

Please note that key terms and phrases in the descriptors that may be new or have specific meaning to the measures are defined in the Glossary at the end of the instrument.

Examples:

Keep in mind these important points about examples:

- The examples are not a checklist of what the child must demonstrate to be rated at mastery of the knowledge, skills, or behaviors that reflect a developmental level.
- An example is one of many possible ways a child might demonstrate mastery of a developmental level. Teachers and service providers will identify other examples as they conduct their observations.
- Mastery is determined over time and across situations or settings.
- A child may not demonstrate any of the specific examples provided for a developmental level, but may demonstrate mastery in other ways that are consistent with the intent of the descriptor.
- Children demonstrate mastery in diverse and sometimes unique ways.
- Examples have not been written to include all areas of disability. Universal design is intended to support the inclusion of children with disabilities on the DRDP (2015). However, it is important to review the adaptations as well as understand the construct being measured when assessing children with disabilities.

Additional Rating Options

Emerging to the Next Developmental Level:

If your observations indicate that the child has demonstrated mastery for a developmental level and is also beginning to demonstrate knowledge, skills, or behaviors described for the next level (although not yet consistently across situations or settings), the child may be emerging to the next level.

To indicate emerging:

- First, mark the developmental level the child has mastered.
- Then, mark “emerging” if the child also demonstrates behaviors described for the next developmental level.

Notes about Emerging:

- You may mark emerging when rating full-continuum measures with infants and toddlers if the child has mastered the last level that can be rated and the child demonstrates some behaviors in the level that follows.
- Do not mark emerging if the child has mastered the latest level on a measure.
- Marking that the child is emerging to the next level does not affect the rating of mastery for the measure.

Child is Not Yet at the Earliest Developmental Level on a Later Development Measure:

If, after careful consideration, you determine that a preschool-age child is not yet demonstrating mastery of the earliest level of a later development measure, mark “Child is not yet at the earliest developmental level on this measure.”

Unable to Rate due to extended absence:

- This is used only when the child is absent from the program for such an extended period of time during the four to six weeks prior to submitting your DRDP data that you could not gather information to rate the measures.
- The following are NOT valid reasons to indicate Unable to Rate:
  - Not having enough time or enough information
  - The nature of a child’s disability or the severity of a child’s disability

The Responding Earlier level is designed to be inclusive of all children. Mark this earliest level unless the child demonstrates skills at a later level. Do not use Unable to Rate because you feel a child does not demonstrate the skills for the earliest level.
Rating Conditional Measures

If you are using the conditional measures, you will mark them on the DRDP according to the following guidance:

<table>
<thead>
<tr>
<th>Measure</th>
<th>How to Mark the DRDP</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Earlier Development Measures</strong></td>
<td></td>
</tr>
<tr>
<td>ATL-REG 1: Attention Maintenance</td>
<td>• These measures are required for all preschool-age children with IEPs</td>
</tr>
<tr>
<td>ATL-REG 2: Self-Comforting</td>
<td>• If the measure is rated, determine the child’s latest level of mastery and mark accordingly</td>
</tr>
<tr>
<td>ATL-REG 3: Imitation</td>
<td>• If the measure is not rated, mark the box, “Measure not rated: this child’s development is beyond the latest developmental level”</td>
</tr>
<tr>
<td>COG 1: Spatial Relationships</td>
<td></td>
</tr>
<tr>
<td><strong>English-Language Development Measures</strong></td>
<td></td>
</tr>
<tr>
<td>ELD 1: Comprehension of English (Receptive)</td>
<td>• If these measures are rated, determine the child’s latest level of mastery and mark accordingly</td>
</tr>
<tr>
<td>ELD 2: Self-Expression in English (Expressive)</td>
<td>• Check the box on the Information Page about the child’s home language</td>
</tr>
<tr>
<td>ELD 3: Understanding and Response to English Literacy Activities</td>
<td>• Not required for children who are deaf or hard of hearing who are not learning a spoken language</td>
</tr>
<tr>
<td>ELD 4: Symbol, Letter, and Print Knowledge in English</td>
<td>• If these measures are not rated, mark the box, “Measure not rated: English is the only language spoken in this child’s home.”</td>
</tr>
<tr>
<td><strong>Physical Development and Health Measures</strong></td>
<td></td>
</tr>
<tr>
<td>PD-HLTH 5: Safety</td>
<td>• These measures are required for preschool-age children with IEPs</td>
</tr>
<tr>
<td>PD-HLTH 6: Personal Care Routines: Hygiene</td>
<td>• In the Comprehensive View, PD-HLTH 7 and 8 are conditional. In the Fundamental View, PD-HLTH 5-8 and PD-HLTH 10 are conditional.</td>
</tr>
<tr>
<td>PD-HLTH 7: Personal Care Routines: Feeding</td>
<td>• If these measures are rated, determine the level of mastery and mark accordingly</td>
</tr>
<tr>
<td>PD-HLTH 8: Personal Care Routines: Dressing</td>
<td>• If these measures are not rated, check the box, “I did not rate this measure because it is not used for documenting progress or planning this child’s learning activities and supports”</td>
</tr>
<tr>
<td>PD-HLTH 10: Nutrition</td>
<td></td>
</tr>
</tbody>
</table>

Step 3: Finalize the Assessment

To finalize, simply review the assessment to make sure that you have entered a rating for all of the measures and that the Information Page is complete and up-to-date:

- For EESD programs: enter your ratings into DRDPtech,
- For SED programs: enter your ratings into your MIS system for your SELPA’s CASEMIS submission. Check with your administrator for when and to whom your Rating Records are due.
## Child Information

2. **Statewide Student Identifier** (10-digit SSID):

3. **Agency Identifier:**
   (agency identifier and statewide student identifier can be the same)

4. **Child's classroom or setting:**

5. **Birth date** (mm/dd/yyyy):

6. **Gender**
   - Male
   - Female

7. **Initial date of enrollment in early childhood program** (mm/dd/yyyy):

   **Date child was withdrawn from the program** (mm/dd/yyyy):

8a. **What is this child's ethnicity?**
   - Yes, Hispanic or Latino
   - No, not Hispanic or Latino

8b. **What is this child's race?**
Mark one or more races to indicate what this child considers himself/herself to be.

   - Asian Indian
   - Black or African-American
   - Cambodian
   - Chinese
   - Filipino
   - Guamanian
   - Hawaiian
   - Hmong
   - Japanese
   - Intentionally left blank
   - Korean
   - Laotian
   - Native American
   - Other Asian
   - Other Pacific Islander
   - Samoan
   - Tahitian
   - Vietnamese
   - White

17. **Does this child have an Individualized Education Program (IEP) or an Individualized Family Service Plan (IFSP)?**
   - Yes
   - No
   - Don't know

## Observer Information

9. **Agency:**
   **Site:**

10. **Your name:**
    **Title:**

11. **Are you the primary teacher working with this child?**
    - Yes
    - No
    (specify your relationship to the child):

12. **Did another adult assist you with assessing this child?**
    - Yes (role/relation):
    - No

## Child's Language Information

13. **Child's home language(s):**

   Is a language other than English spoken in the child's home?  
   - Yes
   - No
   <br> If yes, the ELD measures must be completed for a preschool-age child

14. **What language(s) do you speak with this child?**

15. **Did someone who understands and uses the child's home language assist you with completing the observation?**
    - Yes, role/relation:
    - No
    (Not applicable (I understand and use the child's home language)

16. **Child is enrolled in:** Check all that apply.

   - State Infant/Toddler Program
   - Tribal Head Start
   - State Preschool
   - Migrant
   - Head Start
   - First 5
   - Early Head Start
   - Title 1
   - Child Care Center
   - Family Child Care Home
   - Other

Child's tuition fees are:
   - Subsidized (tuition assistance)
   - Not subsidized (full fee)
   - Don't know
Quick Guide to Rating the Measures

1. Review your documentation/evidence.
   Review your own observation notes, observations from others (including teachers, family members/caregivers, and other service providers or caregivers, obtained through interview or conversations), and other documentation, including samples of children’s work, photographs, and video/audio recordings of children’s communication and behavior.

2. Carefully read the definition and the descriptors, looking for mastery.
   Read the descriptors before you read the examples. As you read the descriptors, try to narrow down which one is most consistent with your observations and other documentation of the child’s typical behavior. A developmental level is mastered if the child demonstrates the knowledge, behaviors, and skills defined at that level:
   - Consistently over time
   - In different situations or settings

   Important Note: When reading the descriptors, be sure you understand and pay attention to semicolons and the words “or” and “and.” Most descriptors define a single skill or behavior, but some include more than one. If the descriptor includes:
   - The word “or,” the child only needs to demonstrate the behavior in one of the ways listed for the developmental level to be considered mastered.
   - The word “and,” all parts of the descriptor are required for mastery and need to be observed together.
   - A semi-colon (:) followed by the word “and,” the child must demonstrate all the behaviors listed to master the level, but not necessarily during the same observation.

3. After you read the descriptors, consider the examples.
   The examples represent only some of the possible ways a child might demonstrate mastery. They are not a checklist of what the child must demonstrate. It is possible that a child does not demonstrate any of the specific examples provided, but does demonstrate mastery in other ways that are consistent with the intent of the descriptor.

4. Based on your careful reading of the descriptors and examples and a review of your documentation, determine the child’s level of mastery.
   Once you’ve determined the latest developmental level the child has mastered, mark it appropriately.

5. Indicate if the child is emerging to the next level (when the option to mark emerging is available).
   If your observations indicate that the child has demonstrated mastery for a developmental level and is also beginning to demonstrate knowledge, skills, or behaviors described for the next level (although not yet consistently across situations or settings), the child may be emerging to the next level.

Remember, the examples illustrate only some of the many ways a child may demonstrate mastery.
## DRDP (2015)

**Rating Record**

**Note:** The Rating Record is meant to be used together with the DRDP (2015) Instrument for keeping track of each child’s developmental levels as you complete the assessment.

**Instructions:** Write the child’s name, student identification number, and the date this Rating Record was completed. Mark the developmental level the child has mastered for each Measure. Check EM (emerging) if the child is "emerging" to the next level (optional). In the rare circumstance that you are unable to rate a Measure, mark UR.

### Developmental Domain: ATL-REG — Approaches to Learning–Self-Regulation

#### ATL-REG 1: Attention Maintenance

Child develops the capacity to pay attention to people, things, or the environment when interacting with others or exploring play materials.

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>

<td><strong>Later</strong></td>
<td><strong>Earlier</strong></td>
<td><strong>Middle</strong></td>
</tr>
<tr>
<td>Attends or responds briefly to people, things, or sounds</td>
<td>Shifts attention frequently from one person or thing to another</td>
<td>Maintains attention, on own or with adult support, during brief activities</td>
<td>Maintains attention on own during activities that last for extended periods of time</td>
</tr>
<tr>
<td><strong>Possible Examples</strong></td>
<td></td>
<td></td>
<td>There are no later levels for this measure</td>
</tr>
<tr>
<td>• Pays attention to a moving mobile.</td>
<td>• Briefly watches other children playing and then resumes play with a toy.</td>
<td>• Makes a pile of pretend pancakes with play dough on own and then offers them to peers.</td>
<td></td>
</tr>
<tr>
<td>• Quiets to the voice of a familiar person.</td>
<td>• Resumes playing at sand table when an adult joins in digging.</td>
<td>• Builds multiple towers with interlocking blocks.</td>
<td></td>
</tr>
<tr>
<td>• Gazes at the smiling face of a familiar person.</td>
<td>• Dumps toy animals from container, puts animals back in the container, and then dumps them out again.</td>
<td>• Looks through several books on own in library corner during the morning.</td>
<td></td>
</tr>
</tbody>
</table>

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence
### ATL-REG 2: Self-Comforting
Child develops the capacity to comfort or soothe self in response to distress from internal or external stimulation

#### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding (Earlier)</th>
<th>Exploring (Earlier)</th>
<th>Exploring (Later)</th>
<th>Building (Earlier)</th>
<th>Building (Middle)</th>
<th>Building (Later)</th>
<th>Integrating (Earlier)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Responds to internal or external stimulation in basic ways</td>
<td>Engages in behaviors that have previously worked to soothe self</td>
<td>Comforts self by seeking a familiar adult or a special thing</td>
<td>Comforts self in different ways, based on the situation</td>
<td>Anticipates need for comfort and prepares self by asking questions, getting a special thing, or in other ways</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Possible Examples**
- Cries when hears a loud noise.
- Closes eyes when taken into bright sunlight.
- Brings fist to mouth and fusses when hungry.
- Sucks thumb or fist to soothe self.
- Turns away from sensory experiences such as loud noises, bright lights, or specific textures.
- Nuzzles face into a blanket or a familiar adult’s shoulder when unfamiliar adults approach.
- Retrieves a familiar object, such as a blanket, to soothe self when upset.
- Gestures “up” to a familiar adult to be picked up when sleepy.
- Seeks contact with a familiar adult when a toy is taken by another child.
- Softly hums or vocalizes to self when lying down for naptime.
- Goes to cubby and gets a photo of family when upset after a parent leaves.
- Seeks out a cozy place to get away from active play of other children.
- Remains seated in a small group activity while manipulating a favorite toy.
- Asks what’s going to happen next, to get ready to transition to a new activity.
- Requests favorite book to read with parent before the parent leaves.
- Moves away and covers ears when an adult brings out a vacuum to clean spilled sand on the floor.

- Cries when hears a loud noise.
- Closes eyes when taken into bright sunlight.
- Brings fist to mouth and fusses when hungry.
- Sucks thumb or fist to soothe self.
- Turns away from sensory experiences such as loud noises, bright lights, or specific textures.
- Nuzzles face into a blanket or a familiar adult’s shoulder when unfamiliar adults approach.

Page 2 of 33
### Developmental Domain: ATL-REG — Approaches to Learning—Self-Regulation

#### ATL-REG 4: Curiosity and Initiative in Learning

Child explores the environment in increasingly focused ways to learn about people, things, materials, and events.

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Developmental Level</th>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>

<td>Earlier</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Later</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Possible Examples**

- **Responding**
  - Responds to people, things, or sounds:
    - Orients toward a noise.
    - Turns head toward a person who comes into view or begins talking.
    - Looks at a mobile.
  - Creates new or unexpected characteristics or actions of people or things:
    - Vocalizes or gazes at a familiar adult who makes an animated facial expression or unusual noise.
    - Smiles when an adult begins singing a song.
    - Looks at a mobile.

- **Exploring**
  - Explores people or things in the immediate environment:
    - Bangs a drum with hands repeatedly.
    - Touches hair of another child.
    - Smiles when an adult begins singing a song.
    - Watches intently as an adult prepares snack.
  - Explores new ways to use familiar things, including simple trial and error:
    - Paints on paper and on arm when given a paintbrush and paint.
    - Molds sand using a cup.
    - Tries using utensils to work with play dough.
    - Moves around a fish bowl to continue watching a fish as it swims around objects.
    - Drops a marble in a maze and follows its path as it rolls to the bottom.
    - Asks, “What’s that doing?” when seeing or hearing a bulldozer across the street while on a neighborhood walk.

- **Building**
  - Explores through simple observations, or manipulations, or by asking simple questions:
    - Moves around a fish bowl to continue watching a fish as it swims around objects.
    - Drops a marble in a maze and follows its path as it rolls to the bottom.
    - Asks, “What’s that doing?” when seeing or hearing a bulldozer across the street while on a neighborhood walk.
  - Explores by engaging in specific observations, manipulations, or by asking specific questions:
    - Puts a dry sponge in water and then squeezes it to see what happens.
    - Observes a snail and asks, “Why do snails have shells?”
    - Compares color or shape of leaves gathered on a nature walk.
  - Carries out simple investigations using familiar strategies, tools, or sources of information:
    - Uses a magnetic wand to figure out which objects on a table it will lift up.
    - Uses a magnifying glass to observe a caterpillar closely, and describes its pattern of colors and number of legs.
    - Places a variety of objects in water to see which will float and which will sink.
  - Carries out multi-step investigations, using a variety of strategies, tools, or sources of information:
    - Examines images from informational books or a computer to learn about the habitats of different animals.
    - Looks through a prism held up to the light, directing its motion until a rainbow of colors appears on the wall.
    - Sets up a project, with an adult, that involves investigating the growth of lima bean plants with different amounts of water, and documents their growth.

- **Integrating**
  - Carries out multi-step investigations, using a variety of strategies, tools, or sources of information:
    - Uses a communication device to learn about the new pet guinea pig.

**Note:**
- ☐ Child is emerging to the next developmental level
- ☐ Unable to rate this measure due to extended absence
**ATL-REG 5: Self-Control of Feelings and Behavior**

Child increasingly develops strategies for regulating feelings and behavior, becoming less reliant on adult guidance over time.

### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Later</td>
<td>Earlier</td>
<td>N/A</td>
</tr>
<tr>
<td>Later</td>
<td>Earlier</td>
<td>Later</td>
<td>Early</td>
</tr>
</tbody>
</table>

- **Calms when comforted by an adult**
  - Seeks a familiar adult when distressed, and responds when physically comforted by a familiar adult
  - Calms self when a familiar adult initiates contact, moves close, or offers a special thing
  - Relies on communication or guidance from a familiar adult to regulate emotional or behavioral reactions in moderately stressful situations
  - Demonstrates capacity to regulate emotional or behavioral reactions in some moderately stressful situations, occasionally needing adult support
  - Expresses strong feelings through constructive forms of communication, seeking the assistance of familiar adults when needed
  - Uses simple strategies (e.g., leaving a difficult situation, offering an alternative toy to a friend) to regulate own feelings or behaviors

### Possible Examples

- Lessens or stops crying when picked up by an adult.
- Relaxes in an adult’s arms when being held.
- Quiets to the voice of a familiar adult.
- Reaches toward a familiar adult to be comforted and nestles into the adult when held.
- Vocalizes to a familiar adult and calms when the adult reaches over to pat child’s stomach.
- Looks toward a familiar adult when startled, and relaxes when picked up.
- Gets up and looks for an adult after falling down, and then resumes play when the adult gives a reassuring look.
- Stops crying after an adult offers a toy similar to the toy another child took.
- Calms when an adult moves to sit closer on the floor.
- Considers relinquishing a desired toy to a friend with a reassuring look.
- Gets a towel when an adult suggests that they work together to clean up a spill that the child is upset about.
- Accepts an adult’s invitation to move closer, after noticing child’s worried look when an unfamiliar adult enters the room.
- Waits to ride a favorite tricycle without trying to take it from another child.
- Pauses and sighs after tower falls down, and then starts to rebuild it when an adult asks, “Do you want to make it again?”
- Frowns, but goes to play with something else, when an adult communicates that it is not yet time to go outside.
- Insists that another child return a favorite doll, but when refused, asks a familiar adult for help.
- Communicates feelings of anger, through words or gestures, to a familiar adult when another child takes a toy without asking.
- Communicates, “Tôi muốn ngồi ở đây,” (“I want to sit here,” in Vietnamese), when upset that there are no empty chairs near a friend.
- Offers a toy in exchange when another child has a desired toy.
- Asks another child who is painting at an easel, “Is it my turn? I’ve been waiting.”
- Leaves the block area after unsuccessfully attempting to join peers, and then moves to the dramatic play area to join other children in play.
- Communicates, “I want a turn. Can I use the scooter after you go around two times?” after watching another child ride for a while.
- Communicates, “Don’t push!” to another child trying to fit at the water table, and then says, “Here’s a place,” and moves over.
- Communicates to self, in words or signs, that the monsters are just pretend, when attending to a scary story.
- Uses a communication device to suggest a strategy to share the limited number of popular art materials during a collage project.

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence
### Developmental Domain: SED — Social and Emotional Development

#### SED 1: Identity of Self in Relation to Others

Child shows increasing awareness of self as distinct from and also related to others

<table>
<thead>
<tr>
<th>Developmental Domain</th>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>SED 1</td>
<td>Earlier</td>
<td>Later</td>

</tbody>
</table>

**Mark the latest developmental level the child has mastered:**

- Responds in basic ways to others
  - Possible Examples
    - Attends to a familiar adult during feeding.
    - Quiets when hears a familiar adult.
    - Grasps an adult’s finger when palm of child’s hand is touched.

- Uses senses to explore self and others
  - Possible Examples
    - Examines own hand or foot by looking at it or mouthing it.
    - Touches others’ hair when it is within reach.
    - Plays with sound by repeating grunts and squeals.

- Recognizes self and familiar people
  - Possible Examples
    - Orient toward a familiar adult when own name is spoken or signed.
    - Points to picture of self on the wall.
    - Smiles when a familiar adult enters the room.
    - Communicates own name and names of familiar people (e.g., “dada,” “mama,” “grandma,” or sibling’s name).

- Expresses simple ideas about self and connection to others
  - Possible Examples
    - Acts out roles from own family in pretend play.
    - Communicates, “Me llamo Luis,” (“My name is Luis,” in Spanish).
    - Communicates names of immediate family members in a photo.
    - Looks to new baby sister and communicates her name.

- Describes self or others based on physical characteristics
  - Possible Examples
    - Communicates, using communication board, “His hair is red!”
    - Identifies own height, as indicated on a growth chart posted on the wall.
    - Narrates details while drawing a picture of a friend.
    - Draws a picture of a house and communicates, “This is my house.”

- Describes own preferences or feelings; and describes the feelings or desires of family members, friends, or other familiar people
  - Possible Examples
    - Communicates to an adult, “I was mad when it rained because we couldn’t go outside.”
    - Communicates that a friend is happy because he is going to have a birthday party.
    - Selects a pink scarf for a friend whose favorite color is pink, then selects a blue scarf for self.
    - Communicates to a peer that they both like peanut butter and jelly sandwiches.
    - Communicates, “我喜歡游泳，但是我姐姐不喜歡,” (“I love to swim, but my sister doesn’t,” in Chinese).

- **Child is emerging to the next developmental level**
- **Unable to rate this measure due to extended absence**
Developmental Domain: SED — Social and Emotional Development

**SED 2: Social and Emotional Understanding**

Child shows developing understanding of people’s behaviors, feelings, thoughts, and individual characteristics

<table>
<thead>
<tr>
<th>Mark the latest developmental level the child has mastered:</th>

</tr>
<tr>
<td>Responds to faces, voices, or actions of other people</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Possible Examples</td>
<td>• Looks at faces.</td>
<td>• Turns head toward an adult during feeding.</td>
<td>• Grasps an adult’s finger when palm of child’s hand is touched.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Smiles when an adult continues after pausing during a game of patty cake.</td>
<td>• Looks toward the location of where an adult’s face will reappear during a game of peek-a-boo.</td>
<td>• Kicks legs in excitement or adjusts body when a familiar adult leans forward to pick child up.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Pays attention to a familiar adult’s facial expressions when an unfamiliar person enters the room.</td>
<td>• Pauses after reaching toward a peer’s toy, to check on a less familiar adult’s response.</td>
<td>• Starts to climb on a table, but pauses in response to an adult’s cautionary look and warning.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Moves or looks toward a familiar adult when a less familiar adult enters the room.</td>
<td>• Stays in response to a warning from another child’s parent about getting too close to the swing.</td>
<td>• Communicates, “También me gusta pintar, me hace feliz,” [“I like to paint, too; it makes me happy,” in Spanish] after noticing a child at an easel.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Responds that a friend is sad, when an adult asks, “Why did your friend get his blanket?”</td>
<td>• Communicates, “Magagalit siya kapag bumagsak na naman ang kanyang tulay,” [“He’ll be mad if his bridge is knocked down again,” in Tagalog].</td>
<td>• Communicates ideas about how own or another’s personality affects how one thinks, feels, and acts</td>
<td></td>
</tr>
</tbody>
</table>

○ Child is emerging to the next developmental level
○ Unable to rate this measure due to extended absence

---

**Possible Examples**

- Communicates, “She wants the big truck.”
- Points to “angry” picture on emotion chart while looking at a peer.
- Communicates, “I’m bored. I’m going to play with the blocks now.”
- Communicates to a peer, “You’re silly,” when the peer starts giggling and other children join in.
- Communicates that a peer is shy when seeing her hide as an unfamiliar adult approaches.
- Communicates that another child plays with everyone because he is so friendly.

---

<tr>
<td>Quiets when picked up by a familiar adult.</td>
<td>Grasps a familiar adult’s hand to gain attention, and then gestures to begin a finger-play game.</td>
<td>Communicates to an adult, “What’s the bee doing?” while watching a bee fly from flower to flower or sharing a book together about bees.</td>
<td></td>
</tr>
<tr>
<td>Widens eyes or brightens face at the face of a familiar adult.</td>
<td>Communicates interest in looking at a book with a familiar adult.</td>
<td>Shares rocks collected while playing outside with a familiar adult.</td>
<td></td>
</tr>
<tr>
<td>Orient toward a familiar adult’s voice.</td>
<td>Brings a blanket to a familiar adult and then climbs into the adult’s lap when upset.</td>
<td>Uses an electronic tablet to play a game with a familiar adult.</td>
<td></td>
</tr>
<tr>
<td>Shows a preference for a familiar adult.</td>
<td>Gestures to a familiar adult for assistance about how to remove a tight lid from a canister.</td>
<td>Communicates an interest to a familiar adult, “Want some tea?” during a pretend tea party.</td>
<td></td>
</tr>
<tr>
<td>Possible Examples</td>
<td></td>
<td>Offers to place napkins and cups on the table when a familiar adult is preparing a snack.</td>
<td></td>
</tr>
<tr>
<td>• Widens eyes or brightens face at the face of a familiar adult.</td>
<td>• Reaches for a familiar adult when being held by another adult.</td>
<td>• Brings a board game to a familiar adult and communicates an interest in playing together.</td>
<td></td>
</tr>
<tr>
<td>• Orient toward a familiar adult’s voice.</td>
<td>• Vocalizes at a familiar adult to gain the adult’s attention.</td>
<td>• Gives pretend food to a familiar adult and communicates, “I made some hamburgers for you. You tell me what you want to drink.”</td>
<td></td>
</tr>
<tr>
<td>• Quiets when picked up by a familiar adult.</td>
<td>• Laughs in anticipation before a familiar adult nuzzles child’s neck.</td>
<td>• Works together with a familiar adult to complete a puzzle over several days, organizing pieces in different ways.</td>
<td></td>
</tr>
<tr>
<td>• Shows a preference for a familiar adult.</td>
<td>• Puts hands near head to continue a game of peek-a-boo when a familiar adult pauses.</td>
<td>• Plans a gardening activity with a familiar adult, communicating by signing the materials needed.</td>
<td></td>
</tr>
</tbody>
</table>

○ Child is emerging to the next developmental level
○ Unable to rate this measure due to extended absence
**Developmental Domain: SED — Social and Emotional Development**

**SED 4: Relationships and Social Interactions with Peers**
Child becomes increasingly competent and cooperative in interactions with peers and develops friendships with several peers

### Mark the latest developmental level the child has mastered:

**Possible Examples**

- Shows awareness of other people, including children
  - Shows interest in other children
  - Plays alongside other children, rarely interacting with them
  - Interacts in simple ways with familiar peers as they play side by side
  - Participates in brief episodes of cooperative play with one or two peers, especially those with whom child regularly plays

- Shows awareness of other people, including children
  - Shows interest in other children
  - Plays alongside other children, rarely interacting with them
  - Interacts in simple ways with familiar peers as they play side by side
  - Participates in brief episodes of cooperative play with one or two peers, especially those with whom child regularly plays

- Responding
  - Cries when hearing the sound of another child crying.
  - Orient toward other children.
  - Notices another child nearby.

- Exploring
  - Moves excitedly when another child comes near.
  - Reaches toward another child to gain attention.
  - Smiles at another child.

- Building
  - Takes a few turns trying on hats with a peer in the dramatic play area.
  - Plays chase briefly outside with two peers, and then goes to play alone in sandbox.

- Integrating
  - Builds a train track with two friends, taking turns connecting the track pieces.
  - Plays superheroes with peers, planning different characters and scenarios.
  - Joins peers in planning and gathering materials needed for a nature walk, such as nets, baskets, and bags.

</tr>
</tbody>
</table>

**Possible Examples**

- Turns head or looks in direction of voices.
- Sustains gaze at an adult’s smiling face.
- Quiets or orients in the direction of a sound or gesture.
- Cries when child hears another child cry.
- Responds to voices, sounds, gestures, or facial expressions in basic ways.
- Reaches for a familiar object after it is named.
- Communicates, “There’s an airplane.”
- Moves toward the sandbox after an adult says, “I see new toys in the sandbox.”
- Communicates, “Okay,” after an adult says, “Your friend wants to play, too.”
- Calms when adult communicates, “Your turn is next.”
- Picks up sand toys after an adult says, “Please pick up the sand toys.”
- Brings a watering can to the garden after a peer asks, “Want to water?”
- Communicates, “Okay,” after an adult asks, “Who is the helper for snack?”
- Communicates, “Yo,” ("Me," in Spanish), after an adult asks, “Who is the helper for snack?”
- Picks up sand toys after an adult says, “Please pick up the sand toys.”
- Communicates, “Okay,” after an adult asks, “Who is the helper for snack?”

---

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence

---

**Responsiveness to Language**
### LLD 3: Communication and Use of Language (Expressive)

Child’s communication develops from nonverbal communication to using language with increasingly complex words and sentences.

#### Makes sounds spontaneously
- Smiles when a familiar person approaches.
- Cries or looks at an adult when hungry.
- Vocalizes or babbles while interacting with an adult.

#### Possible Examples
- • Gurgles.
- • Coos.
- • Cries.
- • Uses sounds, gestures, or facial expressions to communicate.
- • Uses a variety of single words to communicate.
- • Uses two words together to communicate.
- • Uses short phrases or sentences of more than two words to communicate.

- • Names familiar foods, toys, or family members.
- • Communicates ideas such as “No,” “More,” or “Up.”
- • Indicates a picture of a ball when asked what the child wants to play with next.
- • Communicates, “Mommy come,” when wanting a parent.
- • Communicates, “More juice,” when thirsty.
- • Communicates, “I want mommy.”
- • Communicates, “The rabbit is scared,” when the pet rabbit snuggles into an adult’s lap. (“Scared” is an adjective.)
- • Communicates using a communication board, “I need a tissue. My nose is runny.” (“Tissue” is a noun and “runny” is an adjective.)
- • Communicates, “Malaking malakang aso namin,” “Our dog is huge,” in Tagalog after hearing a peer use the word “huge.” (“Huge” is a recently encountered vocabulary word.)
- • Communicates, “The cat’s food, and then he got in trouble. We put him outside and he was very sad.”
- • Communicates in sign language that the cat’s feet are wet. (“Cat’s” is possessive; “feet” is plural.)
- • Communicates, “He runned really fast,” (He ran really fast). (“Runned” is past tense with a grammatical error.)

<td>Responds to sounds or movements of others in basic ways</td>
<td>Responds to or seeks contact with familiar adults, using vocalizations, gestures, or facial expressions during interactions</td>
<td>Engages in brief back-and-forth communication with a familiar adult, using word approximations, vocalizations, gestures, or facial expressions</td>
<td>Engages in brief back-and-forth communication, combining words to communicate meaning</td>
<td>Engages in brief conversations with a shared focus, contributing clarifying comments or building on the other person’s ideas</td>
</tr>
<tr>
<td>Possible Examples</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Looks in the direction of voices or movement.</td>
<td>• Expresses, “Ba,” in response to an adult talking about a ball, and then waits for the adult to respond.</td>
<td>• Communicates, “Yes,” or “No,” after an adult asks, “Do you want more milk?”</td>
<td>• Communicates, “I am the baby,” in Chinese after a peer communicates, “I’m the mommy,” while playing house.</td>
<td>• Has a conversation with a peer about things that they like to do together with their families. Says, “My family goes to the park on Sundays.” When peer asks, “Every Sunday?” child responds, “Yeah, but sometimes we go to the park with the swimming pool and sometimes the park with the big playground.” Then when peer says, “My grandma takes me to the park,” child responds, “My grandma takes me to the store.”</td>
</tr>
<tr>
<td>• Quiets in response to voices or movement.</td>
<td>• Rubs eyes and responds, “Night-night,” after a familiar adult asks, “Are you tired?”</td>
<td>• Brings a ball to an adult, and then responds, “Ball,” after the adult asks, “Do you want me to play ball with you?”</td>
<td>• Holds play dough to a truck. When the peer takes the play dough and says, “I want to make a dog,” responds, “I’m making a snake.”</td>
<td>• Has a conversation with a peer while looking at a photo with a peer. When the peer says, “You have two sisters,” responds, “I have a big sister, and that’s my baby sister.”</td>
</tr>
<tr>
<td>• Turns toward the soft touch of an adult.</td>
<td>• Turns toward a familiar adult.</td>
<td>• Communicates with an adult, during lunch, “ThÌch pho dÌ,” “[I like cheese] in Vietnamese.” When the adult responds, “You really like cheese!” communicates, “Con thÌch pho dÌ,” “[I like cheese] in Vietnamese.”</td>
<td>• Asks a peer for some blocks to put in child’s truck while playing with trucks. When the peer replies, “Here,” and hands over several blocks, responds, “That’s too many,” and takes only two blocks from the peer.</td>
<td>• Has a conversation with a peer while looking at a caterpillar together. Comments, “That is really hairy.” When peer responds, “Yeah, really hairy,” child continues, “He has lots of legs, too.”</td>
</tr>
<tr>
<td>• Looks at a familiar adult during feeding.</td>
<td>• Smiles at an approaching familiar adult.</td>
<td>• Makes eye contact with an adult while holding a stuffed bear. When the adult asks, “Whose teddy bear is this?” communicates, “My bear.”</td>
<td>• Communicates, “That’s my family,” while looking at a photo with a peer. When the peer says, “You have two sisters,” responds, “I have a big sister, and that’s my baby sister.”</td>
<td>• Has a conversation with an adult while planting sunflower seeds together, asking how to plant the seeds and making guesses about how big the plants will get and how long it will take before the plants begin to grow.</td>
</tr>
<tr>
<td></td>
<td>• Makes sounds when a familiar adult stops talking.</td>
<td>• Communicates with an adult, using short phrases and sentences</td>
<td>• Engages in conversations with a shared focus, contributing clarifying comments or building on the other person’s ideas</td>
<td>• Has a conversation with a peer before while building a fort, including offering ideas on what materials they need and suggesting ways to make sure that the walls keep standing as they are building it.</td>
</tr>
<tr>
<td></td>
<td>• Reaches toward a familiar adult.</td>
<td>• Engages in brief back-and-forth communication, using short phrases and sentences</td>
<td>• Engages in brief conversations with a shared focus</td>
<td>• Has a conversation with an adult about how dinosaurs lived and how people live, providing suggestions about what it would be like if dinosaurs and people lived in the same place.</td>
</tr>
<tr>
<td></td>
<td>• Covers eyes to signal an adult to continue playing peek-a-boo.</td>
<td>• Engages in brief conversations with a familiar adult, using simple words or conventional gestures to communicate meaning</td>
<td>• Engages in brief conversations with a shared focus, contributing clarifying comments or building on the other person’s ideas</td>
<td>• Has a conversation with an adult about how dinosaurs lived and how people live, providing suggestions about what it would be like if dinosaurs and people lived in the same place.</td>
</tr>
</tbody>
</table>

---

*Conversations can include communication using sign language or alternative communication systems.*

- **Attends or responds to people or things in basic ways**
  - Plays with books; and
  - Responds to other literacy activities

- **Possible Examples**
  - Quiets to the sound of a familiar voice.
  - Moves in response to an approach by a familiar adult.
  - Orient to an adult’s face or voice during a caregiving routine.
  - Interacts with a cloth or board book by holding or mouthing it.
  - Pats a textured board book.
  - Vocalizes or laughs in response to an adult singing and gesturing a simple finger-play song, such as, “Pat-a-Cake” or “Los cinco deditos,” *[“Five Little Fingers,” a finger play in Spanish]*.
  - Looks at pictures in a book for a short time while a familiar adult reads the book.
  - Reaches to turn the page of a board book as a familiar adult talks or signs about the pictures on the page.
  - Uses simple hand movements to participate during a familiar song or rhyme with a familiar adult.
  - Touches textured or tactile content on pages of a book as an adult is reading the book.
  - Joins a group doing a simple finger play led by an adult.
  - Points at a picture when joining an adult who is reading a book, newspaper, or tablet.
  - Picks up a book and looks at pictures, turns a few pages, and then drops the book to go play.
  - Pretends to read a book from start to finish.
  - Explores a book with Braille and tactile content with hands.
  - Sings some words of a familiar song, from beginning to end, with an adult.
  - Asks questions or communicates about why something happened in a story.
  - Starts a song or rhyme with others while playing outside.
  - Uses finger puppets while reciting a familiar rhyme.
  - Uses flannel-board pieces to retell parts of a story after story time.
  - Retells a familiar story to a peer while pretending to read from a book.
  - Uses a communication device to tell the sequence of events in a favorite story.
  - Pretends to be a character from a story, using props.
  - Chooses to read a book related to a particular theme or interest (e.g., dinosaurs or fairies).
  - Asks for help finding a book about bugs after a nature walk.
  - Participates, with others, in using the computer to create a story about a class trip.
  - Makes up own version of rhyming song with peers’ names.

<td>Moves body parts in basic ways</td>
<td>Attends or responds as objects, people, or own body move through space</td>
<td>Explores how self or objects fit in or fill up different spaces</td>
<td>Takes into account spatial relationships (e.g., distance, position, direction) and physical properties (e.g., size, shape) when exploring possibilities of fitting objects together or moving through space</td>
</tr>
<tr>
<td>Possible Examples</td>
<td></td>
<td></td>
<td>There are no later levels for this measure</td>
</tr>
<tr>
<td>• Moves hand to mouth.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Lifts head from an adult’s shoulder.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Stretches while lying on back.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Turns toward an adult who enters the room.</td>
<td>• Tries to squeeze body between a chair and the legs of a table to get a toy.</td>
<td>•Attempts to put a star-shaped piece into the square-, triangle-, and star-shaped openings of a shape sorter.</td>
<td>• Chooses puzzle pieces that are approximately the right size and shape to fit into a puzzle.</td>
</tr>
<tr>
<td>• Watches and tracks a moving object.</td>
<td>• Fills a purse or bucket, sometimes until it is overflowing.</td>
<td>• Repeatedly rolls various objects down a ramp.</td>
<td>• Stacks a few nesting cups on top of each other to create a tower, with the largest cup on the bottom and smaller ones on top.</td>
</tr>
<tr>
<td>• Lifts arms toward an adult as the adult reaches down to pick child up.</td>
<td>• Rotates a puzzle piece that has a large knob, while trying to fit it into a space on a wooden puzzle.</td>
<td>• Changes directions to move around several obstacles while pushing a toy shopping cart.</td>
<td>• Maneuvers a ride-on toy (without pedals) around people and objects on the playground, sometimes bumping into things.</td>
</tr>
<tr>
<td>• Attempts to put a star-shaped piece into the square-, triangle-, and star-shaped openings of a shape sorter.</td>
<td></td>
<td>• Uses hands to explore shape outlines in a puzzle board, and then explores puzzle pieces with hands to fit pieces into the puzzle board.</td>
<td>• Moves around people and objects in the classroom, using a mobility aid, such as a walker.</td>
</tr>
</tbody>
</table>

<tr>
<td>Attends to people, objects, or events</td>
<td>Interacts differently with familiar people and objects than with unfamiliar people and objects</td>
<td>Associates a person or object with another person or object, based on a similarity or relationship between them</td>
<td>Sorts objects into two groups based on one attribute, but not always accurately</td>
</tr>
</tbody>
</table>

**Possible Examples**

- Looks at people’s faces.
- Quiets in response to an adult’s voice.
- Closes hand around an adult’s finger.
- Smiles at a familiar adult’s face or voice.
- Reaches for own special blanket or toy from home.
- Turns face away from an approaching unfamiliar adult.
- Looks for the hammer that goes with the pounding bench.
- Looks at another child when the child’s parent walks into the room.
- Looks for baby bottle when playing with baby doll.
- Selects the shovels from among toys in the sandbox.
- Takes some apples out of a basket that contains apples and bananas while helping an adult prepare a snack.
- Picks out some train cars from a box of toys.
- Separates blocks into a blue pile and a green pile, leaving a few green blocks in the blue pile.
- Sorts rocks into two piles, big and small, after a neighborhood walk.
- Picks out toy trucks from a basket of toys and sets them on a nearby shelf, and then picks out toy cars from the basket and sets them on a different shelf.
- Separates a pail of toy animals by kind (e.g., dogs, cats, and birds).
- Puts crayons, pencils, and markers into different containers.
- Sorts a group of big squares and little squares into two piles by using eye gaze to indicate where an adult should put each square.
- Sorts buttons by color, and then sorts all of them again by shape or size.
- Sorts shoes based on color, and then re-sorts by type (e.g., slippers, boots, tennis shoes).
- Sorts flannel-board pieces by type (e.g., shoes, pants, and shirts), and then separates them by adult items and baby items.
- Separates tiles into four groups: blue circles, blue squares, red circles, and red squares.
- Removes utensils from the play kitchen and sorts them into groups: big spoons, small spoons, big forks, and small forks.
- Sorts the bin of interlocking blocks into several piles, first by color, then by shape (e.g., squares and rectangles).

- **Possible Examples**
  - Widens eyes or opens mouth when a bottle or breast is presented.
  - Quiets in response to an adult’s voice.
  - Orient to a music toy nearby.
  - Shakes a rattle, pauses, then shakes it again.
  - Kicks repeatedly at a mobile to make it move.
  - Vocalizes, gains a familiar adult’s attention, and vocalizes again.
  - Pulls an adult’s hand to child’s face to continue a game of peek-a-boo.
  - Makes a game of pushing different objects off a table, watching or listening as they fall.
  - Presses different buttons on a toy and notices what happens.
  - Tries to turn a doorknob after watching an adult open and close the door.
  - Looks up in the sky and points when hearing a loud noise from a plane flying overhead.
  - Pushes on different parts of a toy to try to make music turn on again.
  - Pours water into a water wheel to make it spin.
  - Puts a toy car in a tube and watches it roll out the other end when the tube is tilted.
  - Pulls or directs an adult to pull a tab in an interactive book.
  - Puts hands over ears before someone pops a balloon or makes another type of loud noise.
  - Requests a hat before going outside on a bright day.
  - Yells out when observing a toy about to fall from a shelf.
  - Pulls or directs an adult to pull a tab in an interactive book.
  - Communicates, “If I kick the ball harder, it will go really far!” during outdoor play.
  - Enlarges the base of a block tower by replacing small blocks with large blocks after the tower keeps falling over.
  - Communicates to a peer about how to feed the fish: “We have to give it a little bit of food every day. If we give it too much, it will get sick.”

- ○ Child is emerging to the next developmental level
- ○ Unable to rate this measure due to extended absence
### Developmental Domain: PD-HLTH — Physical Development–Health

#### PD-HLTH 1: Perceptual-Motor Skills and Movement Concepts

Child moves body and interacts with the environment, demonstrating increasing awareness of own physical effort, body awareness, spatial awareness, and directional awareness

**Mark the latest developmental level the child has mastered:**

<table>

Perceptual-Motor Skills and Movement Concepts

DRDP (2015): A Developmental Continuum from Early Infancy to Kindergarten Entry – Infant/Toddler Essential View – August 1, 2018 © 2013-2018 California Department of Education – All rights reserved
Developmental Domain: PD-HLTH — Physical Development–Health

**PD-HLTH 2: Gross Locomotor Movement Skills**

Child shows increasing proficiency in fundamental locomotor skills (e.g., rolling, crawling, cruising, walking, running, jumping, galloping)

<table>
<thead>
<tr>
<th>Possible Examples</th>
<th>Moves in basic and often involuntary ways</th>
<th>Moves two or more body parts together, often with intention</th>
<th>Coordinates movements of body parts to move whole body, such as creeping, crawling, or scooting on bottom</th>
<th>Coordinates movement of whole body while upright, using support</th>
<th>Coordinates basic movements in an upright position without using support</th>
<th>Coordinates movements, in an upright position, that momentarily move whole body off the ground</th>
<th>Combines and controls individual locomotor movements, with some success</th>
<th>Combines and coordinates two or more locomotor movements together in effective ways, with some success</th>
<th>Combines a variety of locomotor movements and moves effectively across a range of activities</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Turns head in response to stimulation or nourishment.</td>
<td>• Turns head and reaches for a toy.</td>
<td>• Creeps or crawls toward a familiar adult.</td>
<td>• Takes steps sideways or forward while holding onto furniture.</td>
<td>• Walks forward with a wide base (legs farther apart) and arms held high.</td>
<td>• Runs with short, uneven steps with arms to the side.</td>
<td>• Runs with short strides, and sometimes has difficulty stopping.</td>
<td>• Runs with long strides, showing arm and leg opposition (e.g., right arm and left leg).</td>
<td>• Runs fast with long stride and speed, consistently showing arm and leg opposition (e.g., right arm and left leg).</td>
<td>• Runs fast with long stride and speed, consistently showing arm and leg opposition (e.g., right arm and left leg).</td>
</tr>
<tr>
<td>• Turns head to seek source of stimulation or nourishment.</td>
<td>• Kicks at a mobile when lying on back.</td>
<td>• Moves from lying down to a sitting position.</td>
<td>• Walks forward steadily while pushing a cube chair.</td>
<td>• Stands up from squatting, unassisted, after picking up a toy.</td>
<td>• Crouches down and jumps up, with heels barely coming off of the ground.</td>
<td>• Moves along a low balance beam or along the side of a curb, stepping sideways.</td>
<td>• Changes direction and stops quickly and easily while running.</td>
<td>• Changes direction and stops quickly and easily while running.</td>
<td>• Changes direction and stops quickly and easily while running.</td>
</tr>
<tr>
<td>• Responds involuntarily to a sudden loud noise or movement by extending arms and legs.</td>
<td>• Rolls from stomach to back or from back to stomach.</td>
<td>• Moves by rolling body on the floor.</td>
<td>• Pulls up to a standing position while grasping an adult’s hands.</td>
<td>• Walks with one object in each hand.</td>
<td>• Hops with two feet leaving the ground momentarily.</td>
<td>• Navigates changes in surface and direction, using a mobility aid, such as a walker.</td>
<td>• Swings arms back and then forward in preparation for jumping.</td>
<td>• Moves wheelchair through an obstacle course, first going straight, then turning quickly, then turning quickly again.</td>

Glossary of Terms and Phrases Used in the DRDP (2015)

**Assemblage**: An artistic composition made from scraps, junk, or odds and ends.

Appears in VPA 1: Visual Art

**Investigates/Investigation**: In the process of scientific inquiry, asking a question and conducting systematic observations or simple experiments to find an answer.

Appears in:
COG 9: Inquiry Through Observation and Investigation
COG 10: Documentation and Communication of Inquiry

**Locomotor Skills**: The ability to project the body into or through space.

Appears in:
PD-HLTH 2: Gross Locomotor Movement Skills
PD-HLTH 3: Gross Motor Manipulative Skills

**Manipulative Skills**: Also known as object-control skills in which the arms, hands, legs, and feet are used to give force to an object (for example, throwing a ball) or to receive and absorb the force from an object (for example, catching a ball).

Appears in PD-HLTH 3: Gross Motor Manipulative Skills

**Observes / Observation**: Gathering information about objects and events by using the senses of sight, smell, sound, touch, and taste and noticing specific details or phenomena that ordinarily might be overlooked.

Appears in:
COG 9: Inquiry Through Observation and Investigation
COG 10: Documentation and Communication of Inquiry

**Onset**: The first consonant or consonant cluster in a syllable (e.g., the *h* in the one-syllable word *hat*; the *m* and *k* in the two syllables in the word *monkey*).

Appears in LLD 8: Phonological Awareness

**Rime**: A linguistic term that refers to the portion of a syllable that starts with a vowel. In the word *big*, the rime unit is /ig/. In the word *bring*, the rime unit is /ing/.

Appears in LLD 8: Phonological Awareness

Appendix B: 
Resources for Assessing Children who are Dual Language Learners with the DRDP (2015)

The DRDP (2015) takes into consideration the specific cultural and linguistic characteristics of California’s diverse population of young children, with specific consideration for children who are young dual language learners. The introduction in the DRDP (2015) Assessment Manual provides information on completing the assessment with young children who are dual language learners. Keep in mind that young dual language learners may demonstrate knowledge and skills in their home language, in English, or in both languages. Communication in all languages the child uses should be considered when collecting documentation and completing the measures in all domains of the DRDP (2015).

The following resources will increase your knowledge and help you better complete the DRDP (2015) for young children who are dual language learners.

| From the California Department of Education | Two papers in this series are particularly relevant: “Assessment of Young Dual Language Learners in Preschool” focuses on the need for accurate and valid assessment of young dual language learners. It includes a decision tree for practitioners to determine in which language to assess young DLLs, a matrix of language and literacy assessment for use with preschool-age children, and a sample family interview protocol to learn about families’ language practices. “Early Intervention and Young Dual Language Learners with Special Needs” addresses the language development of young dual language learners with special needs and key considerations when choosing the language for intervention. |

Appendix C: Strategies for Observation and Documentation

The DRDP (2015) is administered through observation in natural settings by teachers and other service providers in the classroom or center and by family members in home and community settings. Observations are embedded into typical, ongoing routines and activities throughout the day. The process of observation requires planning in advance on the part of teachers and service providers. As you review the measures of the DRDP (2015), consider specific routines or activities during the day where you would be able to observe more than one measure or more than one child.

Strategies for Effective Observation
Observation should be ongoing throughout the year. The assessment windows for the DRDP (2015) provide a period of time to make sure teachers and service providers have sufficient documentation for each of the measures in time to submit DRDP data. To rate a child's behavior, teachers and service providers should use naturalistic, or authentic, observation strategies. Below are several key points to support naturalistic observations. You will find additional information about naturalistic assessment by viewing the short video, What is Authentic Assessment at http://draccess.org/guidancefordrdp. Many observation and documentation job aids can be found at https://desiredresults.us/content/teachers. You will also find a training DVD, Getting to know You Through Observation, at https://desiredresults.us/content/observation-resources that can be used by EESD and other administrators to train staff.

Strategies for Effective Documentation
A variety of methods are available for recording information gathered through naturalistic observations, including:

- **Anecdotal Records** – An anecdotal record is a written note about what a child does or says during a typical or routine activity. Anecdotal records result in brief descriptions of the behavior observed.

- **Event recording (tallies)** – In event recording, the observer records each instance of the behavior being observed so that an indication of frequency is obtained. Usually this is done with tally marks but may also be recorded using a code such as “+” for correct and “-” for incorrect.

- **Checklists** – Checklists are lists of specific skills or behaviors that can be used during observation to check off the behaviors observed with a group of children.

- **Rating Scales or Rubrics** – Rating scales and rubrics are similar to checklists in that they include lists of behaviors but they also include additional descriptive information about the behavior such as how well, how frequently or how independently the behavior occurred.

10 Strategies for Naturalistic Observation

- **Know the instrument** – Be familiar with the instrument, including the domains and measures being observed.

- **Observe naturally** – Observe the child in the context of typical routines and activities, interacting with familiar people, in familiar places, and with familiar materials.

- **Observe objectively** – Focus on what the child does. Be as objective and detailed as possible. Avoid using labels, qualitative descriptors, or stereotypic expectations that may bias your observations.

- **Observe strategically** – Observe for skills that correspond to the DRDP measures and record your observations. You may be able to gather information on more than one measure during one observation.

- **Observe daily or routinely** – When observations are part of the daily routines, children become accustomed to being observed and seeing notes being recorded.

- **Observe variety and consistency** – Be aware of a child’s overall performance, even when focusing on a single aspect of behavior. Observe the child over time and during different routines and activities.

- **Be specific and complete** – Intentionally and purposefully record the specific details of what you actually observe as soon as possible. Details are important and might be easily forgotten.

- **Plan ahead** – Plan for observations as part of weekly lesson planning. Plan to observe during activities that do not require your full assistance or plan for someone else to observe and document.

- **Allow time** – Allow adequate time for the child to complete any task that he or she is engaged in even if it requires more time than one might expect.

- **Use appropriate adaptations** – Ensure that appropriate adaptations as determined by the IFSP or IEP team are in place when observing the child.

- **Work Samples** – Documentation can also include the collection of 2- or 3-dimensional products that children have produced such as drawings, writing on paper or 3-dimensional constructions the child has made for example with play dough or other materials.

- **Videos or Photographs** – Cameras can be used to document observed behaviors of children through videos or still photographs.

Information on strategies for implementing the above documentation strategies can be found at: http://eclkc.ohs.acf.hhs.gov/hslc/tta-system/teaching/practice/iss-library.html
Consider the following for planning and collecting documentation:

- Choose methods of documentation that can be embedded into a program's environment, structure, and routines.
- Plan ahead for materials needed for documentation such as sticky notes or pre-printed labels with children's names for anecdotal records or clipboards with checklists or rubrics. Materials should be strategically located throughout the classroom.
- Observe children's behaviors throughout the day and record documentation while observing.
- Date each piece of evidence for future reference.
- Collect documentation over time. Documentation over time strengthens the validity of ratings.
- Organize the documentation collected immediately after collecting it.
- Keep assessment information confidential. Store the DRDP materials, including notes, in a secure location to ensure confidentiality for each child.

Organizing Documentation

Portfolios: Portfolios are a helpful way of organizing information. EESD programs are required to use a form of portfolio to organize documentation. Portfolios may contain anecdotal notes, children's work samples, photos of children's activities, audio or video recordings, and transcripts of the child's language. The portfolio methods selected should work well for the program.

Collaboration to Support Effective Documentation

A central goal for teachers and service providers who use the DRDP (2015) is to obtain measures of the child's developmental progress based on typical day-to-day behaviors. It is difficult to imagine one individual having access to all of the many learning opportunities that a child encounters throughout each day. Therefore, it is very helpful to seek input from individuals who have ongoing contact and who know the child well in order to obtain the most complete and accurate picture of the child's skills and abilities. It is important to consider how and when collaborating with others will support and help to inform the accurate rating of measures for the DRDP (2015).

Although direct observation of a child is the primary method used to inform ratings, other sources of evidence should be used to supplement observations. Gathering information from others who know the child well such as family members, caregivers, or other service providers often provides a wealth of additional information about a child's skills, knowledge, and behaviors. This also provides the additional benefit of observations across different settings. There are numerous ways that others can collaborate in sharing information such as written observations, conversations that focus on a child's development, or viewing short videos or recordings that illustrate a child's behavior in typical routines and activities.

Planning ahead can make the process of collaboration more helpful. Identify early on in your relationship with the child's family, who else might provide helpful information to assist in documenting their child's development. Make sure that the family is well informed about the purpose of the DRDP (2015) and the important role that they can play in sharing their observations about their child. With the family's permission, communicate with other individuals who know the child and strategize with them how they might be able to share information with you.

Communication is key to successful collaboration. For a more detailed look at collaboration and the assessment process please refer to Appendix F.

Electronic Portfolios: If notes are entered into a computer, an electronic portfolio can be produced to summarize the evidence. Please check with a local administrator for procedures regarding consent for photography and video.
Appendix D:
Comprehensive Definitions of Adaptations to be Used with the DRDP (2015)

Adaptations are changes in the environment or differences in observed behavior that allow children with Individualized Family Service Plans (IFSPs) or Individualized Education Plans (IEPs) to demonstrate their knowledge and skills in their typical environments. Adaptations that are in place for the child during the normal course of the day should also be in place during observations for the DRDP (2015). New adaptations should not be introduced solely for the purpose of conducting an assessment. Seven broad categories of adaptations are used with the DRDP (2015). This is the same system of adaptations developed for and used in the DRDP (2015).

1. Augmentative or Alternative Communication Systems
Augmentative and alternative communication systems are methods of communication other than speech that allow a child who is unable to use spoken language to communicate with others. An augmentative communication system is used to augment or facilitate the development of speech. An alternative communication system is used in place of speech. Some examples include sign language, picture cards, and electronic communication devices. Assessors should use these systems as part of the observation of a child using language in a natural context. Assessors should not just elicit responses or contrive adult-directed situations.

If American Sign Language is the child’s primary language, it is designated as the home language, and not an adaptation. If sign language is used as a bridge to learning verbal language, then it is considered an adaptation.

2. Alternative Modes for Written Language
Alternative Modes for Written language are methods of producing written language used by a child who cannot see well enough or cannot hold and manipulate a writing utensil well enough to produce written symbols. If a child cannot see or cannot hold a pencil or marker, this adaptation may be used to assist in reading or writing, or emergent reading or writing. Examples of this adaptation include using a Braillewriter, keyboard, or computer.

Naturally, preschool-age children are not proficient at reading and writing. This adaptation allows for children to explore reading and writing and develop their skills in a developmentally appropriate manner.

3. Visual Support
Visual supports are adjustments to the environment that facilitate a child’s ability to see or to understand the surrounding environment or events. Acceptable visual supports include:

- Adjustments in contrast
- Adjustments in lighting
- Distance from objects
- Increased size of materials
- Verbal description of events

4. Assistive Equipment or Devices
Assistive equipment or devices are tools that make it possible or easier for a child to perform a task. The child should be familiar with the use of the device. Any type of adaptive equipment or assistive device that the child needs for mobility, positioning or manipulating objects is acceptable, including:

- Walkers
- Standers

5. Functional Positioning
Functional positioning enables postural support that allows a child to have increased control of his body. It is important that positioning devices are available to the child across settings so that the child may access daily routines and activities and so they may be observed in a variety of activities. Some examples include:

- Standers
- Cube chairs
- Tricycles with seat belts and built-up pedals

6. Sensory Support
Sensory support includes either increasing or decreasing sensory input to facilitate a child’s attention and interactions in the environment. Some children may need increased sensory input and others may need decreased input. Some children require different types of sensory support in different activities. Sensory support may include:

- Reducing background noise
- Adjusting tactile stimulation
- Adjusting visual stimulation

7. Alternative Response Mode
Using alternative response modes means recognizing that a child might demonstrate mastery of a skill in a way that differs from a typically developing child. For this adaptation, the environment is not modified as in the other adaptations. Rather, the child’s unique yet consistent responses that may indicate the presence of a skill are identified. For example, the child with autism may look out of the corner of his or her eye instead of establishing direct eye contact, or the child with a physical impairment may use atypical movement patterns. The form of a child’s response may differ from that of his peers and still be considered to demonstrate mastery of a skill.

Appendix E: Resources for Working in Partnership with Families

A central goal of the DRDP is to identify a child’s developmental progress based on typical, day-to-day behaviors. It is appropriate to seek input from individuals who have ongoing contact with the child and know the child well. Family members’ descriptions of their child’s behavior in the home or in community settings will help teachers and service providers know more about the child’s behaviors across settings, particularly for those skills the child may not demonstrate routinely in the educational setting; and help teachers and service providers obtain more comprehensive information in order to make accurate ratings for the DRDP (2015).

**Family members may participate in the DRDP assessment in a number of ways:**
- Inform the child’s teachers and service providers of the child’s history for a more complete picture of the child.
- Share the skills they see their child using in typical activities, and might share these skills via stories, photos, drawings, observations, and/or video clips.
- Share the child's strengths, areas they wish to focus on, and areas of growth they observe.
- Become informed about the next steps in their child's development.
- Help determine which adaptations will help their child participate in everyday activities (for children with an Individualized Family Service Plans (IFSPs) or Individualized Education Program (IEPs) and share with the team adaptations the child uses at home, at school, and in other settings.

Below are resources to assist families in knowing more about the DRDP (2015) and the skills assessed as well as resources to assist teachers and service providers in working as partners with families in the assessment process.

**Resources for Families**

**Overview of the DRDP (2015) for Families:**
http://draccess.org/OverviewOfDRDPAccessForFamilies.html
A document describing how the DRDP (2015) works for children, including those with IFSPs and IEPs; and how it benefits families, children, providers, and programs.

**All About Young Children:**
https://allaboutyoungchildren.org/
A website for families describing skills that help children learn including how they learn language, how they learn about feelings and relationships, how they learn about numbers, and how they become skillful at moving their bodies. (Available in eight different languages.)

**California MAP to inclusion and Belonging:**
http://cainclusion.org/camap/counties.html
The MAP Project website supports the inclusion of children with disabilities and other special needs ages birth to 21 in child care, after school and community settings. It includes links to resources on topics related to families and children with IFSPs and IEPs. The website contains a statewide interactive directory by county, of Family Resource Centers (FRC), Special Education Local Plan Areas (SELPA), Regional Centers, Head Start, and more for families of children with IFSPs and IEPs.

**Desired Results for Children and Families, Information for Families brochure:**
https://desiredresults.us/content/families
A brochure describing the Desired Results System for families.

**Watching My Child Grow:**
https://desiredresults.us/content/families
A DVD that describes the Desired Results Assessment System and its benefits for all children and families from the voices of parents. Call 1-800-770-6339 or visit the website.

**All About Young Children:**
https://allaboutyoungchildren.org/
A website for families describing skills that help children learn including how they learn language, how they learn about feelings and relationships, how they learn about numbers, and how they become skillful at moving their bodies. (Available in eight different languages.)

Appendix F:
Collaboration to Complete the DRDP (2015)

“The most valuable resource that teachers have is each other. Without collaboration our growth is limited to our own perspectives.” – Robert John Meehan

Collaborating with Others Who Know the Child Well
Our understanding of young children is strengthened when we commit to partnerships with individuals, including family members, who know the child well and in different settings. Collaboration in gathering and sharing information is important because it affords us windows into a child’s life and offers perspectives that enhance our understanding of a child’s skills and behaviors. Identifying and communicating with the individuals who can collaborate on rating the measures of the DRDP (2015) is an essential step in this process.

Through collaboration, early educators and special educators each bring their skills and perspectives. Early educators contribute by providing a picture of the child in the context of a classroom setting. Special education providers contribute by identifying perspectives on a child’s unique learning needs and specific understanding of a child’s disability including materials that should be available and adaptations that should be in place. This lays the foundation for teachers and service providers to complement one another’s work in assessing a child’s skills and development. Shared information can build relationships that lead to joint decision-making not only about the assessment process but also about curriculum, instruction, supports, and services that teachers, providers and families make for individual children and groups of children.

Collaboration to share assessment observations and evidence for completing the DRDP (2015) is built on relationships and a commitment to ongoing communication. It is developed over time with an understanding of each person’s role. Aim for multiple, informal strategies that can be used on a daily basis. Identifying mutual interests in supporting the child is important. Some questions that address joint interests include:

- What are the child’s goals?
- What specialized equipment or adaptations are used?
- How will the goals be infused into the child’s day and into learning activities?
- How will we know our strategies are working?

Collaborating with others in the assessment process is especially important in situations where the child is served by multiple providers. For example, a child may attend an early education program and also receive special education services, such as speech-language, occupational, and/or physical therapy. Early education teachers and special education providers can work hand-in-hand to complete the observations and DRDP (2015) ratings for children who are dually enrolled in both programs. How this collaboration will take place – who will be involved and what roles each individual will play – will vary depending on the situation. Teachers and service providers have reported the following helpful strategies:

- sharing information, including observations, adaptations, curriculum and program goals, and IFSP outcomes or IEP goals
- providing anecdotal notes
- sharing work samples and portfolios
- reviewing reports of DRDP (2015) results together

Increasingly, teachers and providers are utilizing technology such as short video clips or recordings, with family permission, to share information and observations. The DRDP (2015) app helps teachers collaborate, as well as using technology such as email, phone conferences and free web conferencing platforms. Local policies on using devices should be followed.

The early education teacher and special education service provider responsible for completing the DRDP (2015) should each take the lead in partnering with others who work with the child. The general educator is responsible for entering DRDP data into DRDPtech. The special educator is responsible for reporting and entering the assessment data on children who have IEPs or IFSPs to the SELPA. However, except for data reporting, the assessment can be completed together by both educators, and a copy of the Rating Record held by each of them for their respective reporting. Suggestions to help get started working together include:

- Make an initial plan detailing areas to be observed directly and those areas in which others may have a more thorough knowledge of the child. The general education teacher can provide information on all domains. A speech-language therapist might inform measures in the Language and Literacy Domain. Families and special education providers including physical and occupational therapists are a good source of information for measures in the Physical Development and Health Domain.
- Contact the individuals who will collaborate to discuss the mutual goal of completing the assessment and to develop a plan for working together.
- Develop a timeline that is acceptable to all partners, including identifying deadlines and strategies to meet timelines.
- Collect any signature requirements for sharing child information from the family.
- Gather multiple perspectives and consider input from family and others who know the child during assessment.
- Determine when and how communicating about updates and results will occur.

Suggestions to help get started working together include:

- Determine when and how communicating about updates and results will occur.

Collaborating with Families

Gathering family perspectives about their child’s development and behavior provides important and valid data, which is useful for making informed assessment decisions. Research suggests that family observations are reliable and valid and should be considered an essential component of a comprehensive assessment process. Inviting parents and other family members to share observations of their child’s development and behavior is required for EESD programs and is good practice in all early childhood settings and programs.

When families collaborate with teachers and service providers in sharing their observations about their child’s behaviors in the home or in community settings, it provides a richer and broader view of a child. Information from families helps to identify skills and behaviors that the child may not demonstrate routinely in the educational setting. For example, a teacher or therapist may not regularly observe a child’s dressing or other self-help skills. However, families have repeated opportunities to observe their child’s self-help skills both over time and in different settings. Parent observations support more accurate reporting about a child’s skills.

Strategies for gathering information from families include the following:

- Make sure that families understand the skills and behaviors described in the DRDP (2015) measures. Teachers and service providers understand expected sequences of child development and are trained about how items on the DRDP (2015) reflect these sequences. Parents might not understand fully the meaning of measures without explanations or examples. It may be useful to provide families with examples of the kinds of behaviors to look for or the routines and activities that might provide a context for a behavior. For example, rather than ask a parent to describe a child’s grasping pattern, inquire about how a child picks up small pieces of cereal during mealtime.

- It is reasonable for the observations of parents and practitioners to differ across the range of behaviors being rated. A child’s behavior during activities and routines that occur in the classroom setting may differ from the same child’s behavior in activities and routines in home or community settings. Not all perspectives about children’s behavior based on parent or practitioner observations will be congruent. Rather, aim for convergence or the pooling of perspectives from all who know the child and have had repeated opportunities to observe behavior in different settings.

The ongoing conversations that we have with family members during our typical interactions with them are rich opportunities for learning about their child. Leading a focused conversation with a family is particularly important to obtain information on measures that you have not had the opportunity to observe. During these conversations, focusing on routines and activities provides a very useful context for asking a family about their child’s everyday learning opportunities and skills. The four steps in the resource listed below will guide you in planning and leading focused conversations with families to help complete the DRDP (2015). If this is the first DRDP (2015) assessment that you will be completing with a particular child, be sure that you have spent enough time getting to know the child by observing the child’s skills during typical routines/activities and by having conversations with the family.
