## Early Adoption Version, 2025–2026

Do not distribute or use for other purposes.

# P-3 DRDP (2025)

An Early Childhood Developmental Continuum

**Preschool – Grade Three View** 

## About the DRDP (2025) Early Adoption Version

The Desired Results Developmental Profile (DRDP 2025) instrument is an authentic assessment designed for use by educators and service providers to observe, document, and reflect on the learning, development, and progress of children from infancy through grade 3. The DRDP (2025) is a continuum of developmental skills spanning early infancy to kindergarten. The Early Education (EED) and Special Education (SED) Divisions of the California Department of Education (CDE), the Child Care and Development Division (CCDD) of the California Department of Social Services (CDSS), the University of California - Berkeley Evaluation and Assessment Research Center (UC BEAR Center), and Early Childhood Learning and Development and Integrated Systems at WestEd have engaged in a collaborative effort over the past two years to revise and expand the DRDP.

The DRDP (2025) early adoption instrument is being calibrated during the 2025-26 period. Full implementation of the DRDP (2025) will begin in the fall of 2026. The DRDP (2025) will replace the DRDP (2015) infant/toddler, preschool, and kindergarten views; it is aligned to the updated Infant/Toddler Early Learning and Development Foundations and the revised Preschool/Transitional Kindergarten Learning Foundations

## Introduction to the DRDP (2025)

Welcome to the Desired Results Developmental Profile (2025) [DRDP (2025)]: An Early Childhood Developmental Continuum. The DRDP (2025) is a formative assessment instrument developed by the California Department of Education and the California Department of Social Services for young children and their families, used to inform instruction and program development.

# **Structure and Components of the DRDP (2025) Early Adoption Version**

#### Structure

The DRDP (2025) instrument includes 36 measures organized into nine domains. Measures cover different portions of a developmental continuum from early infancy through Third Grade.

#### Components

The DRDP (2025) measures consist of eight primary components, as seen in <u>Figure 3</u>. These components are described below:

**Domain:** Each domain represents an essential area of learning and development for young children. Specific competencies, described in "Measure," make up these areas of learning and development. Each domain consists of a set of measures.

The DRDP (2025) instrument includes nine domains aligned to the updated Infant/Toddler Early Learning and Development Foundations and the revised Preschool/Transitional Kindergarten Learning Foundations. The nine domains are listed below:

#### Approaches to Learning (ATL)

 The ATL domain assesses areas recognized as important for young children's school readiness and success. The Approaches to Learning skills include engagement, attention and persistence, curiosity, interest and initiative, problemsolving, and planning.

#### • Social Emotional Development (SED)

 The SED domain assesses children's developing abilities to understand and interact with others and to form positive relationships with nurturing adults and their peers.
 The knowledge or skill areas in this domain include self-awareness, social awareness, relationships and reciprocal interactions with familiar adults, relationships and interactions with peers, and emotional knowledge and regulation.

#### • Foundational Language Development (FLD)

The FLD domain assesses the progress of all children in developing foundational language and literacy skills. These skills can be demonstrated in any signed or spoken language and any mode of communication, including augmentative and alternative communication (AAC). Dual language learners may demonstrate knowledge and skills in their home language, in English, or both languages. FLD measures should be completed for all infants, toddlers, preschoolers, transitional kindergarten children, and kindergarten children, including those who are multilingual learners.

#### • English Language Development (ELD)

• The ELD domain assesses the progress of children who are dual language learners in learning to communicate in spoken English. The developmental progression described in the three ELD measures is related to the child's experiences with English, not the child's age. Keep in mind that children acquire English in different ways and at different rates. Factors that affect English acquisition include the degree of exposure to English, the level of support provided in their home or first language, and individual differences such as the age of exposure to English or the structure of the child's home or first language. The ELD measures should be completed only for preschool, transitional kindergarten, and kindergarten-age children whose home language is other than English and whose family has identified spoken English as a method or mode of communication for their child. Note about ELD measures for children who are Deaf/Hard of Hearing (DHH): The ELD domain should only be used with children who are learning spoken English. For children learning spoken English and American Sign Language (ASL), the Foundational Language Development (FLD) domain, in conjunction with the Language Milestones, should be used to document children's development of ASL, and the ELD measures can be used to document a child's progress in spoken English.

#### Math (MATH)\*

 The MATH domain assesses children's development of knowledge and skill in mathematics. This includes areas such as spatial thinking, classification, number and counting, number operations, and measurement.

#### • Science (SCI)\*

 The SCI domain focuses on observation, exploration of people and objects, and investigation of objects and concepts. The knowledge or skill areas in this domain include cause and effect, inquiry through observation and investigation, and documentation and communication of inquiry.

#### • Cognition (COG)

The COG domain is for use with infants and toddlers and assesses foundational cognitive skills, including skills represented in the MATH and SCI domains. The knowledge or skill areas in this domain include imitation, spatial thinking, classification, number and counting, cause and effect, and inquiry through observation and investigation.

#### Physical Development (PD)

 The PD domain assesses motor development. The knowledge or skill areas in this domain include perceptual-motor skills and movement concepts, gross locomotor movement skills, gross motor manipulative skills, and fine motor manipulative skills.

#### Health (HLTH)

 The HLTH domain assesses the development of routines related to personal care, safety, and nutrition. The knowledge or skill areas in this domain include safety, understanding of health and wellness, and personal care routines (hygiene, feeding, self-dressing).

The DRDP (2015) History, Social Science, and Visual and Performing Arts domains can still be utilized with the DRDP (2025).

\*Math and Science are combined in the Infant/Toddler view as well as the Cognition domain.

**Measure:** A measure is the developmental continuum along which a child's observed behavior is assessed. Measures are the individual assessment items.

**Definition:** Each definition specifies the area of development to be observed.

**Descriptor:** Each descriptor defines behaviors that would be observed for a child at that developmental level.

#### **Developmental Level**

Each developmental level specifies a point along the continuum, ranging from earlier to later levels of development. The developmental levels in the DRDP (2025) are the following:

- Responding (Earlier, Later)
  - Knowledge, skills, and behaviors that develop from basic responses (through using senses and through actions) to differentiated responses, including interacting with people and objects and discovering ways to move or use the parts of the body.

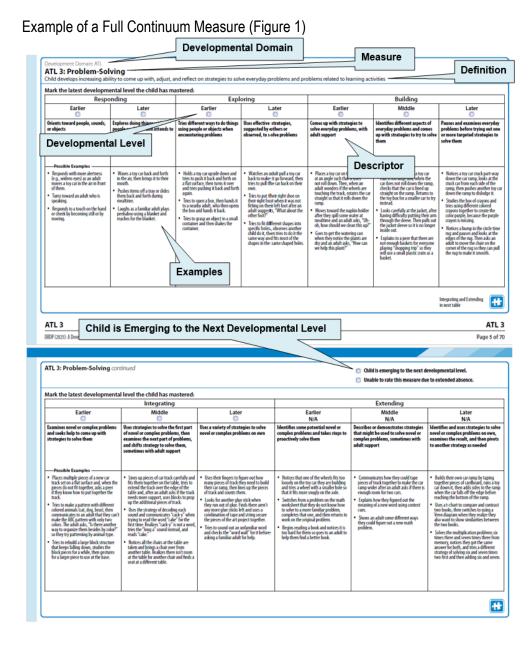

Responding levels reflect research on the development of young infants. They are generally aligned to the Infant-Toddler Learning and Development Foundations, although any child, regardless of age, may demonstrate knowledge and skills described in these levels.

- Exploring (Earlier, Middle, Later)
  - Consider the composition of the composition of the development of older infants and toddlers and are generally aligned to the Infant-Toddler Learning and Development Foundations. However, any child, regardless of age, may demonstrate knowledge, skills, and behaviors described in these levels.
- Building (Earlier, Middle, Later)
  - Knowledge, skills, and behaviors that demonstrate a growing understanding of self, relationships with others, and increasingly purposeful investigations related to different learning domains and the social environment. Building levels reflect research on the development of preschool/transitional kindergarten (TK)-age children and are generally aligned to the Preschool/Transitional Kindergarten Learning Foundations. Children within a wider age range may demonstrate knowledge, skills, and behaviors described in the Building levels.
- Integrating (Earlier, Middle, Later)
  - Knowledge, skills, and behaviors that demonstrate the ability to connect and apply content within and across learning domains. Integrating levels reflect research on the development of children in the year before kindergarten and as they progress through kindergarten and into the beginning of first grade. Integrating levels generally align to the Preschool/Transitional Kindergarten Learning Foundations, the Common Core State Standards, and California Content Standards for Kindergarten. Children within a wider age range may demonstrate knowledge, skills, and behaviors described in the Integrating levels.
- Extending (Earlier, Middle, Later)
  - Knowledge, skills, and behaviors that demonstrate the growing ability to incorporate new information while navigating a broad range of increasingly complex learning activities and social situations. Extending levels reflect research on children's development in first through third grades. However, children in these grades may not yet be demonstrating the knowledge, skills, and behaviors described in these levels.

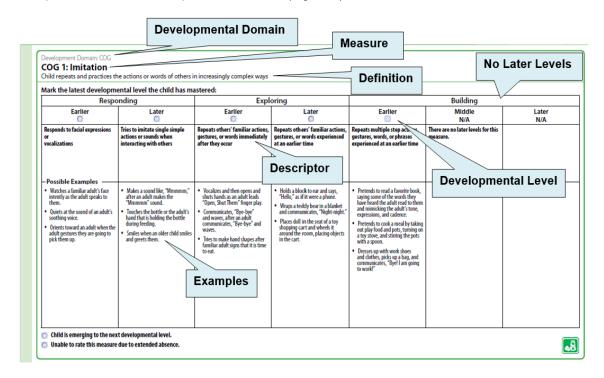

Please note: Not every measure will include the full choice within the developmental levels of "Earlier, Middle, Later" within Responding, Exploring, Building, Integrating, and Extending if

those levels are not appropriate to the developmental continuum of the measure. The developmental levels for the ELD domain differ from the above format as they represent the developmental progression of multilingual learners' acquisition of English during the early childhood years.

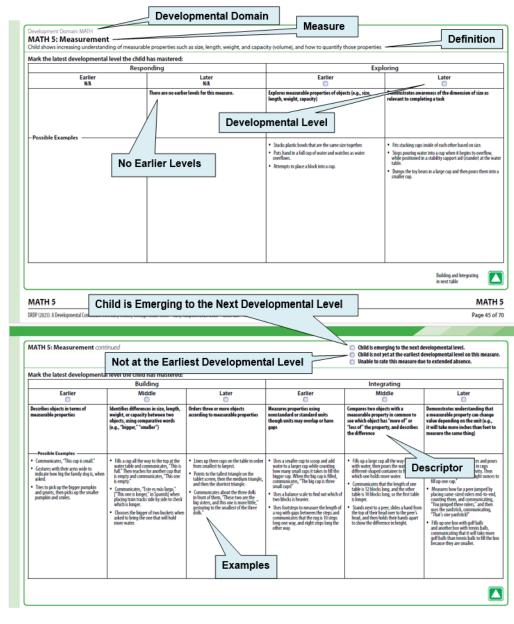

**Example:** An example illustrates a level descriptor. An example is one of many possible ways a child might demonstrate the knowledge, skills, or behaviors indicative of a particular developmental level. Examples are not an exhaustive list.

#### Example of an Earlier Developmental Measure (Figure 2)

#### Example of a Later Developmental Measure (Figure 3)

## Relationship of the DRDP (2025) to Learning Foundations and Standards

In California, the term "foundations" is used to define goals for early learning, emphasizing that the learning and development that occur in the early years of life are foundational to children's lifelong achievement, both in and out of school. The foundations describe research-based expectations for young children's learning and development and are the central component of California's early learning and development system. Measures generally correspond to a sampling of the most salient constructs depicted in the foundations and standards for each domain.

- Infant/Toddler Learning and Development Foundations (ITLDF) describe the
  competencies infants and toddlers typically attain in the first three years of life. For more
  information on specific developmental domains, consult the ITLDF at
  <a href="http://www.cde.ca.gov/sp/cd/re/itfoundations.asp">http://www.cde.ca.gov/sp/cd/re/itfoundations.asp</a>. The DRDP (2025) Responding Earlier
  through Building Earlier levels generally correspond to the ITLDF levels.
- Preschool/Transitional Kindergarten Learning Foundations (PTKLF) describe the
  knowledge and skills that most children ages three to five and a half develop in highquality early education programs. For more information on developing specific skills, refer
  to the PTKLF at <a href="https://www.cde.ca.gov/sp/cd/re/psfoundations.asp">https://www.cde.ca.gov/sp/cd/re/psfoundations.asp</a>. The Building Earlier
  through Integrating Earlier levels of the DRDP generally corresponds to the PTKLF levels.

The state's early learning foundations align to early elementary standards. The standards define the essential skills and knowledge that all students should have at specific grade levels, from kindergarten through grade twelve, in California's public schools.

California Public School Content Standards (CPSCS) cover nine areas of learning. California has adopted the Common Core State Standards (CCSS) for English Language Arts and Mathematics and the Next Generation Science Standards (NGSS) for Science. For more information on the specific skills and knowledge, refer to the CA Content Standards at <a href="https://www.cde.ca.gov/be/st/ss/">https://www.cde.ca.gov/be/st/ss/</a>. The Integrating Earlier through Extending Later levels for kindergarten through grade 3 generally correspond to the relevant grade-level expectations for the CPSCS. The Integrating Earlier through Integrating Later levels generally correspond to the CCSS and NGSS for kindergarten and first grade.

#### The Role of the Special Education Service Provider

The DRDP (2015) is required for children with disabilities, birth to 5 years of age, who have an Individualized Family Service Plan (IFSP) or an Individualized Education Program (IEP) and

whose services are funded through the local education agency. It is an option for special education service providers to complete both the DRDP (2015) and the DRDP (2025). The special education provider most familiar with the child is responsible for submitting the DRDP (2015). The special education provider should ensure that accommodations outlined in the child's ISFP or IEP are in place and work collaboratively with the child's educator to ensure that observations of children with ISFPs or IEPs are accurate and complete.

### Children Who Are Multilingual Learners and the DRDP (2025)

Multilingual learners are children who learn two or more languages simultaneously, as well as those who learn a second language while continuing to develop their home language. A child's experience with one or more languages is an asset to build on in the early childhood setting. In addition, encouraging children's home language development supports their positive cultural and linguistic identity development and strengthens ties with their families and communities. It is critical to consider the child's communication in all the languages that they are learning to have an accurate picture of the child's knowledge and skills. Young children, including children with disabilities, can successfully learn two or more languages.

When assessing young children who are multilingual learners, some aspects of multilingual development should be considered. For example, a child may know certain words or concepts in one language and different ones in another language. The DRDP (2025) supports appropriate assessment of multilingual learners in two primary ways:

- Educators and service providers observe and document children's behavior in their home languages, English, or a combination to obtain a more accurate profile of their knowledge and skills across developmental domains.
- 2. The DRDP includes two language development domains to assess multilingual learners' progress. The Foundational Language Development (FLD) domain assesses all children's progress in developing foundational language and literacy skills, where ratings should be based on skills in all languages a child is learning. The English Language Development (ELD) domain assesses current knowledge, skills, and progress in English for children learning English as an additional language.

## **Universal Design for Learning**

In the context of assessment, Universal Design for Learning (UDL; CAST, 2024) is a framework for designing assessments that are inclusive and flexible, allowing all children to demonstrate what they know and can do. Assessments developed using UDL allow for multiple means of engagement, representation, and action and expression, enabling children to demonstrate what they know and can do in ways that work best for them. Educators and

service providers are encouraged to use their knowledge of the child to plan activities that are both accessible and meaningful.

### Structured Prompts for Selected DRDP (2025) Measures

Structured prompts are optional, scripted activities aligned to DRDP measures. Preschool, transitional kindergarten, and kindergarten educators and service providers will receive guidance on and materials for using structured prompts for two measures in the Math domain: Measurement and Number Operations. Educators and service providers may use structured prompts with children they assess as part of the DRDP (2025). The information gathered during the structured prompt activities will provide educators and service providers with evidence of children's level of mastery on the corresponding measures. Educators and service providers may use the results of the structured prompt and other information gathered about the child's knowledge and skills in Measurement and Number Operations to determine a rating. The child's responses to the structured prompt can be used as documentation for the rating.

#### **Conditional Measures**

Some measures in the DRDP PTK View are considered conditional measures, which are only assessed when certain conditions are met. Three conditional measures for preschool, transitional kindergarten, and kindergarten in the DRDP (2025) are in the ELD domain, ELD 1: Comprehension of English (Receptive English), ELD 2: Self-Expression in English (Expressive English), and ELD 3: Understanding and Responding to English are required for children who have a language other than English spoken in the home.

The Health domain includes three conditional measures for preschool, transitional kindergarten, and kindergarten: HLTH 3: Personal Care Routines - Hygiene, HLTH 4: Personal Care Routines - Feeding, and HLTH 5: Personal Care Routines - Self-Dressing. Based on observations, Health measures 3-5 may be completed, if determined, to document progress or plan this child's learning activities and supports. These measures are required for preschool, transitional kindergarten, and kindergarten children who have an IEP.

## Rating the Measures

There are three steps for using and completing the DRDP (2025):

#### **Step 1: Collecting Documentation**

The DRDP (2025) instrument measures a child's behavior, knowledge, and skills across nine domains of development. It is an authentic assessment to be administered in children's natural environments, such as home and school. Educators and service providers observe children

and record their behavior relative to the measures. Observations should occur over time in natural settings:

- In the child's typical programs or settings, such as child care, classrooms, or home;
- As the child participates in familiar routines with people they know; and
- As the child participates in learning activities and routines.

While observing and collecting documentation, remember that words, phrases, and sentences can be communicated and understood in various ways, including spoken in the child's home language, signed, and through other communication modes (e.g., via a communication device). The direct observation of a child by educators and service providers is the primary method for informing ratings. To ensure that ratings are informed across the settings and situations a child is in, other sources of evidence are recommended:

- Observations by others including educators, family members, caregivers, and other service providers, obtained through interviews or conversations
- Other documentation including samples of children's work, photographs, and video or audio recordings of children's communication and behavior; results of the optional structured prompt activities for Measurement and Number Operations serve as other documentation for preschool, transitional kindergarten, and kindergarten children

#### The Important Role of Families in the Documentation Process

Family members and guardians have repeated opportunities to observe their child's activities and interactions over time and in various situations. Their perspectives, along with those of educators and service providers, provide a more complete and reliable picture of a child's typical behaviors. Inviting family members to share observations of their child's development and behavior is a recommended practice for the DRDP (2025). The opportunity to observe a child's level of mastery is greatest when the child is interacting with a familiar adult. Because of this, it is helpful to talk to family members or, if possible, observe a child interacting with family members. This is especially true for children new to a program or at the earliest levels (Responding Earlier and Responding Later). These observations can inform assessment decisions for all domains. For more information on best practices for gathering observations from families, refer to the Worksheet for Leading Focused Conversations with Families: Preschool Version, available at <a href="https://www.draccess.org/leadingconversations">https://www.draccess.org/leadingconversations</a>.

#### **Observation and Documentation of Young Multilingual Learners**

Young multilingual learners may demonstrate knowledge and skills in any of the languages they are developing, including their home languages, English, or a combination of both.

Multilingual learners often use different languages for different purposes, with different people, or in different settings. In addition, a child may shift between languages or combine elements of more than one language within a conversation. Allowing each child to demonstrate their skills using their own authentic communication patterns is necessary for accurate assessment of their knowledge and skills. Documentation of a child's language should be inclusive of their use of the home language, English, or both (e.g., a child may communicate, "I want leche" ["I want milk"] using English and their home language, Spanish).

Additionally, to ensure accurate and equitable assessment, observations and documentation should be conducted by an adult who can communicate with the child in the child's home language. When the educator or service provider is not fluent in the child's home language, another adult who is fluent in the child's home language should support the observation process. This may include an assistant educator, special education team member, educator of the Deaf or hard of hearing, program director, family member, or another trusted adult who knows the child well and can help interpret their behaviors and language use in context.

Families play a central role in equitable assessment for multilingual learners. They bring essential knowledge of the child's language use, cultural background, routines, and strengths across settings. Educators and service providers should actively seek out and incorporate family observations to gain a more complete picture of the child's development. This is especially important when the child uses languages that educators may not understand, or when the child is new to the program. Involving families affirms their role as partners and helps ensure that assessment practices are linguistically and culturally responsive.

#### **Using Accommodations**

- Accommodations may have been developed and part of the IEP so that the assessment
  will more accurately measure a child's abilities rather than the impact of a child's disability.
  For more information on adaptations, see the Desired Results Access Project
  at http://www.draccess.org/adaptations.
- Accommodations for the child should be used during the normal course of the day and be in place during observations for the DRDP (2025) assessment.
- Everyone working with the child should be informed of any accommodations the child uses.
- New accommodations must not be introduced solely to conduct the DRDP (2025) assessment.

#### **Step 2: Rating the Measures**

#### **Determining the Child's Latest Level of Mastery**

For each measure, mark the latest developmental level the child has mastered.

#### What is Mastery?

A developmental level is mastered if the child demonstrates the knowledge, skills, and behaviors defined at that level:

- Consistently
- Over time
- In different situations or settings

Important notes about mastery:

- Children may demonstrate mastery of knowledge and skills through various communication modes, languages, and behaviors.
- Many behaviors consistent with the descriptor may not appear on the list of examples.

#### The Descriptors and Examples

Consider the descriptors first and then the examples to determine which developmental level is most consistent with your observations and other documentation of the child's behavior across time, settings, and situations. A child may demonstrate behaviors at more than one developmental level. Choose the level that represents the knowledge, skills, or behaviors the child demonstrates most consistently.

#### **Descriptors**

The descriptors define the knowledge, skills, or behaviors expected at each level along the developmental continuum of the measure (see Navigation Maps). Each descriptor is illustrated by several examples of behaviors consistent with that developmental level.

#### **Examples**

Keep in mind these important points about examples:

- The examples provided for each developmental level are illustrations, not requirements. They are not checklists, and a child does not need to demonstrate any specific example or all examples to rate at that level.
- Each example shows just one possible way a child might demonstrate the knowledge, skills, or behaviors described in the descriptor. Educators and service providers are encouraged to observe children in various everyday activities and routines, and to use their professional judgment to identify other valid examples of mastery.
- Mastery is based on what a child demonstrates consistently over time and in different situations and settings. A child may show mastery in ways that are not included in the examples but still align with the intent of the descriptor.

#### **Additional Rating Options**

#### Emerging to the Next Developmental Level

If your observations indicate that the child has demonstrated mastery of a developmental level and is also beginning to demonstrate knowledge, skills, or behaviors described for the next level (although not yet consistently across time, situations, and settings), the child may be emerging to the next level.

To indicate emerging:

- First, mark the developmental level the child has mastered.
- Then, mark "emerging" if the child also demonstrates behaviors described for the next developmental level.

#### Child is Not Yet at the Earliest Developmental Level on a PTK Measure

If you determine that a child in preschool, transitional kindergarten, or kindergarten is not yet demonstrating mastery of the earliest level of a PTK continuum measure, mark "Child is not yet at the earliest developmental level on this measure." This should only happen rarely.

#### Unable to Rate Due to Extended Absence

- This is used only when the child is absent from the program for such an extended period
  of time during the four to six weeks before submitting your DRDP data that you could not
  gather information to rate the measures.
- The following are NOT valid reasons to indicate Unable to Rate:
  - Not having enough time or enough information
  - o The nature of a child's disability or the severity of a child's disability

The Responding Earlier level is designed to be inclusive of all children. Mark this as the earliest level unless the child demonstrates skills at a later level. Do not use Unable to Rate because you feel a child does not demonstrate the skills for the earliest level.

#### Rating Conditional Measures

If you are using the conditional measures for a preschool, transitional kindergarten, or kindergarten child, mark them on the rating record according to the following guidance:

- ELD domain
  - These measures are required for preschool-aged children whose home language is other than English and whose family has identified spoken English as a method or mode of communication for their child.
  - If the measures are rated, determine the child's latest level of mastery and mark accordingly.

If these measures are not rated, mark the circle next to Conditional Measure: "This measure is not rated. Spoken English is the only language used in this child's home."

- Health domain
  - When reflecting on Health measures 3-5, based on observations, determine if the measure is needed for documenting progress or planning this child's learning activities and supports. If these measures are not rated, mark the circle next to Conditional Measure. These measures are required for preschool, transitional kindergarten, and kindergarten children who have an IEP.

### **Step 3: Finalizing the Assessment**

To finalize, review the assessment to make sure that you have entered a rating for all the measures and that the child's information page is complete and up-to-date:

- For CDE Early Education Division (EED) and CDSS Child Care and Development Division (CDSS) programs, enter your ratings into DRDP Online.
- For CDE Special Education Division (SED) programs, enter your ratings into the reporting sites for SED programs (e.g., SEIS, SIRAS) as determined by your district.

## **Glossary of Terms**

**Alphabetic language:** a letter or combination of letters and marks to represent each speech sound in the language.

From: PTKLF Language and Literacy Development Domain Appendix, English Phonemes, p. 154

From: https://dictionary.cambridge.org/us/dictionary/english/alphabetic

Appears in FLD 5: Alphabetics and Print Knowledge

**Attribute:** a property or characteristic of an object or a person. Attributes such as size, color, and shape would be used by children in grouping and sorting.

From PTKLF Mathematics Domain Glossary, p. 65

Appears in:

FLD 1: Understanding Language (Receptive)

MATH 2: Classification

**Augmentative and Alternative Communication (AAC)**: all of the ways that someone communicates besides talking. People of all ages can use AAC if they have difficulty with speech or language skills. **Augmentative** means to add to someone's

speech. **Alternative** means to be used instead of speech. AAC can include no-tech, low-tech, and high-tech options.

From ASHA Augmentative and Alternative Communication

Appears in:

ELD 1: Comprehension of English (Receptive English)

ELD 2: Self-Expression in English (Expressive English)

ELD 3: Understanding and Responding to English Literacy

FLD 2: Using Language (Expressive)

**Braille:** the universally accepted system of writing used by <u>blind</u> persons, consisting of a code of 63 characters. Each character represents a letter, combination of letters, common word, or grammar sign, read by touching them lightly.

From Britannica

Appears in:

FLD 4: Foundational Literacy Skills

FLD 5: Alphabetics and Print Knowledge

FLD 6: Writing

**Cardinality:** the concept that the number name applies to the last object counted and represents the total number of objects in the group (the quantity of objects counted).

From PTKLF Mathematics Domain Glossary, p. 65

Appears in MATH 3: Number and Counting

**Clause:** a group of words that contains a subject and a verb within a sentence.

Appears in:

FLD 2: Using Language (Expressive)

ELD 2: Self-Expression in English (Expressive English)

ELD 3: Understanding and Response to English Literacy Activities

**Communicates:** the variety of ways a child demonstrates knowledge and skills, including speaking in English or the child's home language, signing, using a communication device, drawing or modeling with different materials, and expressing through movement, actions, or role-play.

Appears in multiple measures across domains

Conventional Gestures: culturally-based gestures produced and understood by all members of a given cultural group (e.g., waving goodbye, nodding, etc.)

Appears in FLD 2: Using Language (Expressive)

**Conventional Gestures:** culturally-based gestures produced and understood by all members of a given cultural group (e.g., waving goodbye, nodding, etc.)

From Ekman and Friesen (1969)

Appears in FLD 2: Using Language (Expressive)

Cooperative Play: when children plan, discuss, and implement their play together

From the National Association for the Education of Young Children

Appears in SED 4: Relationships and Interactions with Peers

**Decode/decoding:** the process of using one's knowledge of letter-sound correspondence (or syllable-sound in Spanish) to sound out words

From: National Center for Improving Literacy

Appears in FLD 5: Alphabetics and Print Knowledge

**Decompose:** in math, it means to take apart numbers or geometric figures into smaller parts (e.g., 7 can be broken down into 3 and 4, 5 and 2; squares can be 2 triangles, etc.)

From <u>CDE Mathematics Frameworks</u> Appears in MATH 4: Number Operations

**Everyday problems:** regularly encountered ordinary challenges or situations that occur during daily routines and activities, such as fitting a foot into a shoe or opening a tight jar lid.

Appears in ATL 3: Problem-Solving

**Handshapes:** the specific configuration of the hand and fingers when forming a sign in sign language. Signs are composed of manual phonemic units: handshape, location, and movement.

From <u>Jackson</u>, <u>Hagstrom</u>, <u>and Emmorey (2024)</u> Appears in FLD 2: Using Language (Expressive)

**Hygiene:** the practice of maintaining health and preventing disease through cleanliness.

From PTKLF Health Domain Glossary, p.31

Appears in HLTH 3: Personal Care Routines: Hygiene

**Investigates/Investigation:** in the process of scientific inquiry, asking a question and conducting systematic observations or simple experiments to find an answer.

From PTKLF Science Domain Glossary, p. 83

Appears in:

SCI 2: Inquiry Through Observation and Investigation

SCI 3: Documentation and Communication of Inquiry

**Locomotor Skills:** the ability to project the body into or through space.

From PTKLF Physical Development Domain Glossary, p. 32

Appears in PD 2: Gross Locomotor Movement Skills

**Manipulative Skills:** also known as object-control skills, in which the arms, hands, legs, and feet are used to give force to an object (for example, throwing a ball) or to receive and absorb the force from an object (for example, catching a ball).

From PTKLF Physical Development Domain Glossary, p. 32

Appears in PD 3: Gross Motor Manipulative Skills

**Nonstandard and standard units:** nonstandard units of measurement are units of measurement that are based on personal choice, such as a pencil, a hand, a toothpick, or a block. Standard units are common units of measurement, such as inches, ounces, meters, or liters.

Appears in MATH 5: Measurement

**Novel or complex problems:** challenges or situations that a child is encountering for the first time, or that have different parts or components to solve.

Appears in ATL 3: Problem-Solving

**Observes/Observation:** gathering information about objects and events by using the senses of sight, smell, sound, touch, and taste, and noticing specific details and phenomena that ordinarily might be overlooked.

From PTKLF Science Domain Glossary, p. 84

Appears in:

COG: SCI 2: Inquiry Through Observation and Investigation COG: SCI 3: Documentation and Communication of Inquiry

**One-to-one correspondence**: one and only one number word is used for each object in the array of objects being counted.

From PTKLF Mathematics Domain Glossary, p. 65

Appears in MATH 3: Number and Counting

**Onset:** the first consonant or consonant cluster in a syllable (e.g., the h in the one-syllable word hat; the m and k in the two-syllable word monkey).

Appears in FLD 4: Foundational Literacy Skills

**Phonological Awareness:** sensitivity to the sound structure of spoken language. From PTKLF Language and Literacy Development Domain Glossary, p. 137 Appears in FLD 4: Foundational Literacy Skills

**Rime:** a linguistic term that refers to the portion of a syllable that starts with a vowel. In the word big, the rime unit is /ig/. In the word bring, the rime unit is /ing/.

Appears in FLD 4: Foundational Literacy Skills

**Self-initiated activities:** play or tasks that infants, toddlers, and young children choose based on their curiosity, interest, abilities, and opportunities. Children determine the timing, pace, intensity, and duration of these activities.

Appears in:

ATL 1: Engagement, Attention, and Persistence

ATL 2: Curiosity, Interest, and Initiative

**Word approximations:** a child's use of parts of a word or sound substitutions, or a simplified version of a sign to represent a target word.

Appears in FLD 2: Using Language (Expressive)

Development Domain: ATL

## ATL 1: Engagement, Attention, and Persistence

Child develops increasing ability to engage by sustaining attention, contributing, and persisting, when appropriate, related to learning activities

#### Mark the latest developmental level the child has mastered:

Respo	onding	Expl	oring		Building	
Earlier	Later	Earlier	Later	Earlier	Middle	Later
Orients to people, objects, or changes in the environment	Engages in explorations of people or objects for brief periods	Engages in simple self-initiated activities, sometimes with adult support	Engages in and returns to self- initiated activities after a brief interruption	Engages in self-initiated activities for extended periods of time	Engages in group learning activities with adult guidance	Manages distractions or challenges with adult support during group learning activities
— Possible Examples —						
<ul> <li>Turns head toward a person who comes into view or begins talking.</li> <li>Attends to an adult's face when being held.</li> <li>Turns head toward the bottle when it is brought near.</li> </ul>	<ul> <li>Looks attentively as an adult shows them a board book, turns, and reaches for a toy. Then turns back to the board book and pats the pages.</li> <li>Smiles when an adult begins singing a song. Turns toward a peer who is laughing at the song and then turns back to the adult.</li> <li>Holds an object, mouths and looks at it, then looks over at the door when it opens, and returns to looking at and mouthing the object.</li> </ul>	<ul> <li>Flips through a board book, then reaches for another book. Hands the book to the adult when the adult asks, "Should we read this together?"</li> <li>Picks up an object, holds it out to the adult, and when the adult takes it, hands the adult another object.</li> <li>Tries to turn a wheel toy upright a few times. Then succeeds and makes it roll.</li> </ul>	<ul> <li>Pretends to read a book to a doll. Looks up when a peer shows them what they are cooking in the play kitchen. Then returns to playing with the doll for a few more minutes.</li> <li>Plays with trains. Looks up when a peer gets picked up by a family member. Then returns to playing with trains.</li> <li>Pauses playing at the sand table, looks up, and points when an airplane flies overhead. Then goes back to playing with the sand.</li> </ul>	<ul> <li>Pretends to read a book to a doll as part of a bedtime routine, then tucks the doll into bed.</li> <li>Builds a toy train track involving a long loop of track, adds several train cars, and drives the train along the track while making train noises.</li> <li>Spends time at the painting easel, involving dipping different paint brushes in different cups of paint and covering most of the paper with paint.</li> </ul>	<ul> <li>Listens from a few feet away as an adult reads a story to a group of children.</li> <li>Participates in a group sing-along led by the adult by signing the lyrics to a familiar song.</li> <li>Takes part in a small group counting activity, with adult encouragement.</li> </ul>	<ul> <li>Pauses to look at what other children are drawing while working on a picture from their favorite story. Then returns to their own drawing when the adul asks about their picture.</li> <li>Struggles with getting popsicle sticks to glue together while building a miniature fence as their part of a group project. Tries a new way of applying the glue when suggested by an adult.</li> <li>Strings beads according to a pattern while at a table with other children. Shows the adult they are missing a brown bead, and the adult helps them find the bead under the table.</li> </ul>

Integrating and Extending in next table

Puts on their noise-canceling headphones and returns to their reading after an adult points out that the headphones could help with the noise in the classroom.

ATL 1

**Engagement, Attention, and Persistence** 

Development Domain: ATL

ATL 2: Curiosity, Interest, and Initiative
Child develops increasing capacity to explore objects, activities, or ideas and takes initiative to seek information and understanding

#### Mark the latest developmental level the child has mastered:

Respo	Responding		oring	Building		
Earlier	Later	Earlier	Later	Earlier	Middle	Later
Orients toward movement or changes in people, objects, or sounds	Shows interest in new or unexpected characteristics or actions of people or objects	Explores objects and notices and responds to interactions with people	Explores new ways to use familiar objects outside of their intended use	Explores self-selected ideas, objects, or events by manipulating, or asking simple "what" or "where" questions	Explores self-selected ideas, objects, or events by examining, manipulating, or asking detailed "why" or "how" questions, often with adult prompting	Explores self-selected ideas, objects, or events in greater depth, over repeated occasions, sometimes with adult support
<ul> <li>Possible Examples</li> <li>Turns head toward the source of the noise.</li> <li>Turns head toward a person who comes into view or begins talking.</li> <li>Gazes toward a nearby window where there is movement of shadow or light.</li> </ul>	<ul> <li>Coos when a familiar adult begins to sing a song.</li> <li>Vocalizes or gazes at a familiar adult who makes an animated facial expression.</li> <li>Widens eyes when a toy makes a noise.</li> </ul>	<ul> <li>Moves toward a familiar adult who is playing a small drum and touches the drum.</li> <li>Pats, pulls on, or turns the pages of a board book back and forth.</li> <li>Touches buttons and tries to look under an adult's wristwatch when it lights up.</li> </ul>	<ul> <li>Turns a toy bucket upside down and bangs on it like a drum.</li> <li>Paints on paper and on arm when given a paintbrush and paint.</li> <li>Pours water out of a cup at a water table, then turns to the sand box and uses the cup to scoop up sand.</li> </ul>	<ul> <li>Shows excitement when they make sounds on a small drum they chose from a shelf.</li> <li>Drops a marble in a maze and follows its path as it rolls to the bottom, then does it again, but blocks the path with their hand a few times.</li> <li>Asks, "What's that doing?" when seeing or hearing a bulldozer across the street while on a neighborhood walk.</li> </ul>	<ul> <li>Pats a drum and then a block when an adult asks, "Is one louder than the other?" Responds, "The drum is louder. Why is it louder?"</li> <li>Begins to drop different objects in the water table and watches them, after an adult prompts, "I wonder which objects will float and which ones will sink?"</li> <li>Compares leaves by examining their different textures and gestures for more leaves to touch, after an adult asks, "What do these leaves feel like?"</li> </ul>	<ul> <li>Returns to play with the same drums several times, trying different sounds.</li> <li>Observes a caterpillar closely and begins drawing its pattern of colors and number of legs. Continues working on it the following day.</li> <li>Visits the dramatic play area over several days to act out being a firefighter.</li> </ul>

Integrating and Extending in next table

ATL 2: Curiosity, Interest, a	nd Initiative continued			○ Child is emerging to the next d	evelopmental level.			
				<ul> <li>Unable to rate this measure du</li> </ul>	e to extended absence.			
Mark the latest developmental level the child has mastered:								
	Integrating			Extending				
Earlier	Middle	Later	Earlier	Middle	Later			
Tries out and builds on new ideas or approaches introduced by adults to extend explorations	Tests how things or materials react under different conditions by modifying actions or approaches	Seeks purposefully to understand new information by making connections to information they know well	Explores new topics or ideas by making comparisons between different approaches or conditions	Explores new topics or ideas by identifying multiple alternative outcomes or reasons, sometimes testing them out	Communicates about abstract ideas or asks open-ended questions without clear answers			
Possible Examples  Plays on a drum and tries to copy a new rhythm demonstrated by an adult.  Examines images from informational books or a computer to learn about the habitats of different animals.  Records how much water was added to each plant following an adult's suggestion to try adding different amounts of water to the potted plants on the windowsill.	<ul> <li>Experiments with drumming on different things like tables and floors. Notices how the sound changes and tries different ways to drum to see how it sounds.</li> <li>Continues making a ramp steeper and steeper and running different toy cars down it each time to find out what happens.</li> <li>Kicks a ball into a soccer goal repeatedly, placing the ball farther away and at different angles before each kick.</li> </ul>	<ul> <li>Chooses a book about different kinds of percussion instruments and figures out which ones they have seen before and which ones they haven't seen yet.</li> <li>Asks whether sea turtles breathe underwater with gills like fish or if they hold their breath like whales, during a read-aloud book about sea creatures.</li> <li>Gathers information from books and the internet to create an environment for the classroom butterflies.</li> </ul>	<ul> <li>Listens to various percussion rhythms from around the world and identifies what makes some rhythms similar and others unique.</li> <li>Communicates that it is cloudy and rainy today, but it was cloudy and not rainy yesterday, then asks why some clouds bring rain and some do not.</li> <li>Folds paper airplanes in two different designs and then flies both planes to test how different designs affect the speed.</li> </ul>	<ul> <li>Learns about how sound travels in waves in a science lesson by playing a drum in different areas and explores how percussion acoustics change in different situations.</li> <li>Compares the available building tools to the common structures of different ancient civilizations and brainstorms how alternative tools may have led to different structures.</li> <li>Builds ramps of varying heights and lengths, then tests ideas about how fast and how long objects will roll on the different ramps.</li> </ul>	<ul> <li>Asks, "What would it be like if you could see sound waves?"</li> <li>Draws a diagram on their tablet to suggest some ideas for how climate change may affect how plants will grow in the future.</li> <li>Asks what the world would be like if certain historical events had not occurred (e.g., the Revolutionary War), and then brainstorms some possible outcomes.</li> </ul>			

ATL 2

**Curiosity, Interest, and Initiative** 

ATL 3: Problem-Solving
Child develops increasing ability to come up with, adjust, and reflect on strategies to solve everyday problems and problems related to learning activities

#### Mark the latest developmental level the child has mastered:

Respo	onding	Expl	oring		Building	
Earlier	Later	Earlier	Later	Earlier	Middle	Later
Orients toward people, sounds, or objects	Explores doing things with people or objects and attends to what happens	Tries different ways to do things using people or objects when encountering problems	Uses effective strategies, suggested by others or observed, to solve problems	Comes up with strategies to solve everyday problems, with adult support	Identifies different aspects of everyday problems and comes up with strategies to try to solve them	Pauses and examines everyday problems before trying out one or more targeted strategies to solve them
Responds with more alertness (e.g., widens eyes) as an adult moves a toy car in the air in front of them.      Turns toward an adult who is speaking.      Responds to a touch on the hand or cheek by becoming still or by moving.	<ul> <li>Waves a toy car back and forth in the air, then brings it to their mouth.</li> <li>Pushes items off a tray or slides them back and forth during mealtime.</li> <li>Laughs as a familiar adult plays peekaboo using a blanket and reaches for the blanket.</li> </ul>	<ul> <li>Holds a toy car upside down and tries to push it back and forth on a flat surface, then turns it over and tries pushing it back and forth again.</li> <li>Tries to open a box, then hands it to a nearby adult, who then opens the box and hands it back.</li> <li>Tries to grasp an object in a small container and then shakes the container.</li> </ul>	<ul> <li>Watches an adult pull a toy car back to make it go forward, then tries to pull the car back on their own.</li> <li>Tries to put their right shoe on their right foot when it was not fitting on their left foot after an adult suggests, "What about the other foot?"</li> <li>Tries to fit different shapes into specific holes, observes another child do it, then tries to do it the same way and fits most of the shapes in the same shaped holes.</li> </ul>	<ul> <li>Places a toy car on the car ramp at an angle such that it does not roll down. Then, when an adult wonders if the wheels are touching the track, rotates the car straight so that it rolls down the ramp.</li> <li>Moves toward the napkin holder after they spill some water at mealtime and an adult asks, "Uhoh, how should we clean this up?"</li> <li>Goes to get the watering can when they notice the plants are dry and an adult asks, "How can we help this plant?"</li> </ul>	<ul> <li>Places on a car ramp a toy car that is too large and, when the car does not roll down the ramp, checks that the car is lined up straight on the ramp. Returns to the toy box for a smaller car to try instead.</li> <li>Looks carefully at the jacket, after having difficulty putting their arm through the sleeve. Then pulls out the jacket sleeve so it is no longer inside out.</li> <li>Explains to a peer that there are not enough baskets for everyone playing "shopping trip" so they will use a small plastic crate as a basket.</li> </ul>	<ul> <li>Notices a toy car stuck part-way down the car ramp, looks at the stuck car from each side of the ramp, then pushes another toy car down the ramp to dislodge it.</li> <li>Studies the box of crayons and tries using different colored crayons together to create the color purple, because the purple crayon is missing.</li> <li>Notices a bump in the circle time rug and pauses and looks at the edges of the rug. Then asks an adult to move the chair on the corner of the rug so they can pull the rug to make it smooth.</li> </ul>

Integrating and Extending in next table

## **ATL 3: Problem-Solving** continued

O Unable to rate this measure due to extended absence.

#### Mark the latest developmental level the child has mastered:

	Integrating		Extending			
Earlier	Earlier Middle		Earlier	Middle	Later	
Examines novel or complex problems and seeks help to come up with strategies to solve them	Uses strategies to solve the first part of novel or complex problems, then examines the next part of problems, and shifts strategy to solve them, sometimes with adult support	Uses a variety of strategies to solve novel or complex problems on own	Identifies some potential novel or complex problems and takes steps to proactively solve them	Describes or demonstrates strategies that might be used to solve novel or complex problems, sometimes with adult support	Identifies and uses strategies to solve novel or complex problems on own, examines the result, and then pivots to another strategy as needed	
——Possible Examples ————						
<ul> <li>Places multiple pieces of a new car track set on a flat surface and, when the pieces do not fit together, asks a peer if they know how to put together the track.</li> <li>Tries to make a pattern with different colored animals (cat, dog, bear), then communicates to an adult that they can't make the ABC pattern with only two colors. The adult asks, "Is there another way to organize them besides by color?" so they try patterning by animal type.</li> <li>Tries to rebuild a large block structure that keeps falling down, studies the block pieces for a while, then gestures for a larger piece to use at the base.</li> </ul>	<ul> <li>Lines up pieces of car track carefully and fits them together on the table, tries to extend the track over the edge of the table and, after an adult asks if the track needs more support, uses blocks to prop up the additional pieces of track.</li> <li>Uses the strategy of decoding each sound and communicates "cack-y" when trying to read the word "cake" for the first time. Realizes "cack-y" is not a word, tries the "long a" sound instead, and reads "cake."</li> <li>Notices all the chairs at the table are taken and brings a chair over from another table. Realizes there isn't room at the table for another chair and finds a seat at a different table.</li> </ul>	<ul> <li>Uses their fingers to figure out how many pieces of track they need to build their car ramp, then lines up the pieces of track and counts them.</li> <li>Looks for another glue stick when they run out of glue. Finds there aren't any more glue sticks left and uses a combination of tape and string secure the pieces of the art project together.</li> <li>Tries to sound out an unfamiliar word and checks the "word wall" for it before asking a familiar adult for help.</li> </ul>	<ul> <li>Notices that one of the wheels fits too loosely on the toy car they are building and tries a wheel with a smaller hole so that it fits more snugly on the axle.</li> <li>Switches from a problem on the math worksheet that they do not know how to solve to a more familiar problem, completes that one, and then returns to work on the original problem.</li> <li>Begins reading a book and notices it is too hard for them so goes to an adult to help them find a better book.</li> </ul>	<ul> <li>Communicates how they could tape pieces of track together to make the car ramp wider after an adult asks if there is enough room for two cars.</li> <li>Explains how they figured out the meaning of a new word using context cues.</li> <li>Shows an adult some different ways they could figure out a new math problem.</li> </ul>	<ul> <li>Builds their own car ramp by taping together pieces of cardboard, runs a toy car down it, then adds sides to the ramp when the car falls off the edge before reaching the bottom of the ramp.</li> <li>Uses a t-chart to compare and contrast two books, then switches to using a Venn diagram when they realize they also want to show similarities between the two books.</li> <li>Solves the multiplication problems six times three and seven times three from memory, notices they got the same answer for both, and tries a different strategy of solving six and seven times two first and then adding six and seven.</li> </ul>

# **SED 5: Emotional Knowledge and Regulation**Child develops an increasing ability to identify and process emotions

#### Mark the latest developmental level the child has mastered:

Respo	nding	Expl	oring		Building	
Earlier	Later	Earlier	Later	Earlier	Middle	Later
Calms in response to care from a familiar adult	Orients to a familiar adult when distressed and responds when comforted by them	Shows preference for certain familiar adults for comfort and care	Comforts self or seeks comfort from familiar adults	Seeks out familiar adults for support when experiencing an emotion	Recognizes basic emotions (e.g., happy, mad) in self	Makes connections for reasons behind basic emotions, sometimes with adult support
Possible Examples  Stops crying when picked up by a familiar adult.  Relaxes in a familiar adult's arms when being held.  Quiets to the voice of a familiar adult.	<ul> <li>Cries and turns toward a familiar adult when startled by a sudden loud sound, then stops crying when the adult murmurs and pats them gently.</li> <li>Nuzzles face into a familiar adult's shoulder after crying during a diaper change.</li> <li>Looks toward a familiar adult when startled and relaxes when picked up.</li> </ul>	<ul> <li>Moves toward a preferred familiar adult, not an unfamiliar adult, when startled by a sudden loud sound.</li> <li>Moves toward a preferred familiar caregiver when another adult enters the room.</li> <li>Calms when a familiar adult moves to sit closer on the floor.</li> </ul>	<ul> <li>Puts hands over ears when startled by a sudden loud sound, then communicates, "Hold me," to a familiar adult.</li> <li>Climbs into a familiar adult's lap and communicates, "Mine, mine."</li> <li>Rocks back and forth and hums to self after dropping a basket of toys.</li> </ul>	<ul> <li>Goes to a familiar adult and communicates, "What was that?" when startled by a sudden loud sound.</li> <li>Communicates, "Tôi muốn ngồi ở đây" ["I want to sit here," in Vietnamese] to a familiar adult when upset that there are no empty chairs near a peer.</li> <li>Hugs a familiar adult with relief after the adult helps them find their misplaced doll.</li> </ul>	<ul> <li>Identifies which faces are happy, sad, or scared when looking at a picture book about emotions with a familiar adult.</li> <li>Points to the "sad" face on a communication board, then gestures to a broken toy.</li> <li>Jumps up and communicates, "Estoy muy feliz!" ["I'm so happy," in Spanish], after adult communicates it's time to go outside.</li> </ul>	Communicates that they felt scared because they did not know where it came from, when an adult notices them looking around after a sudden loud sound.      Responds "yes" using a communication board when an adult asks, "Are you sad because you wanted to play?" after responding "no" to other reasons the adult offered.      Communicates, "موب و لى الله الله الله الله الله الله الله ا

Integrating and Extending in next table

## **SED 5: Emotional Knowledge and Regulation** *continued*

- $\bigcirc$  Child is emerging to the next developmental level.
- O Unable to rate this measure due to extended absence.

#### Mark the latest developmental level the child has mastered:

	Integrating		Extending			
Earlier	Middle	Later	Earlier	Middle	Later	
Uses a few strategies to process their emotions, sometimes with adult support	Makes connections between some of their emotional experiences and sensory experiences	Uses numerous or varied strategies to process their emotions in different situations	Demonstrates one of the following: (1) Uses words, pictures, or objects to communicate about their varied emotional experiences in different situations (2) Describes anticipated emotional responses to upcoming situations (3) Uses different strategies, tailored to different situations, to process their emotions	Demonstrates two of the following: (1) Uses words, pictures, or objects to communicate about their varied emotional experiences in different situations (2) Describes anticipated emotional responses to upcoming situations (3) Uses different strategies, tailored to different situations, to process their emotions	Demonstrates all three of the following: (1) Uses words, pictures, or objects to communicate about their varied emotional experiences in different situations (2) Describes anticipated emotional responses to upcoming situations (3) Uses different strategies, tailored to different situations, to process their emotions	
<ul> <li>Possible Examples</li> <li>Takes a few deep breaths and hugs a familiar adult after being startled by a sudden loud sound.</li> <li>Chooses "hug a favorite toy" from the "Calm Down" poster that the adult points to, then goes to the cozy corner and hugs a soft toy to calm down.</li> <li>Goes to the carpet and jumps up and down after an adult prompts, "What is something you could do when you are so excited it is hard to sit at the table?"</li> </ul>	<ul> <li>Communicates to a familiar adult that their tummy hurts when they feel scared.</li> <li>Communicates, "I'm jumping up and down because I'm so excited."</li> <li>Draws a picture of themself on stage to accompany a writing prompt about a time they were nervous.</li> </ul>	<ul> <li>Whispers "it's ok" to themself, then asks a peer what happened after being startled by a sudden loud sound.</li> <li>Becomes upset when the book they wanted to read is not available, then takes a few deep breaths to compose themselves and asks if they can read it next.</li> <li>Goes to their cubby to take out a picture of their abuela, who just left after visiting for a week.</li> </ul>	<ul> <li>(1) Explains that the sudden loud sound only scared them a little, but their peer's Halloween costume scared them a lot.</li> <li>(2) Draws a picture detailing how they will feel happy on the last day of school and also sad to say goodbye to their teachers.</li> <li>(3) Requests permission to go to the cozy corner alone to calm down after having a disagreement with a peer.</li> </ul>	<ul> <li>(1) Communicates that they were disappointed that their team lost, and they also felt proud for trying their best.</li> <li>(2) Communicates to a peer that they will be more excited and less scared, when they present their project to the class.</li> <li>(3) Communicates how they like to find room to dance and act silly to get their nervous energy out.</li> </ul>	<ul> <li>(1) Demonstrates how their excitement "grows" as it gets closer to winter break by selecting gradually bigger smiley faces on their tablet.</li> <li>(2) Communicates how they will feel relieved once their tooth falls out.</li> <li>(3) Takes deep breaths when they feel scared while alone, talks about what happened when they feel scared while interacting with peers, and asks for a hug when they feel scared while interacting with a familiar adult.</li> </ul>
