July 2019 - Quick Guide to Getting Started DRDP Online

☐ **Lead Agency Administrator**
   - Select the assessment view.
     - Select one view for each age level.
     - Once the view is selected, it cannot be changed for a year.
   - Review users who are administrators to ensure administrators who have left are inactive and new users are uploaded with correct roles.

☐ **Administrators**
   - Add new users to your system.
   - Check that all users are in the system with the appropriate permissions.
     - Become familiar with the roles and permissions chart. Teachers and teachers of record have limited permissions.
     - Assign users to appropriate sites and classes, so that they have access to the children in those sites and classes.
   - Create classrooms for the current rating period. Be specific in naming the classrooms, make the name unique to the site.
     - Classrooms are created for every new rating period (this can be manually or with an upload template).
     - Name the classroom using a unique name to the site and rating period. (per rating period and site, only one class can have a specific name)
     - Use the Upload Template or create classrooms manually.
   - Add children to the system and enroll into classes.
     - Children can be reenrolled from previous rating periods or new children can be added (either manually or by using the upload template).
     - The “Download Demographics” link allows administrators to make changes to currently enrolled child information and re upload into DRDP Online.
     - Children who are returning to your program for the current rating period can be reenrolled manually by using the manage enrollment function or by upload template.
     - Children can be added manually using add new child feature or by upload template.
