Instructions to Print and Organize DRDP (2025) Mini Measures

Print

1. Print two-sided on Letter paper, **flip on the long edge**, at **100% size** (not "fit to page").
2. Keep the sheets in order.

Cut

1. Cut along both dotted lines, through the whole stack.
2. You now have three piles: **top**, **middle,** and **bottom** strips.

Collate

1. Take one strip from each pile in this order: top, middle, bottom.
2. Stack them face-down as you go and repeat until the piles are gone.
3. Flip the stack over. The cover is on top, and the cards are in order.

Finish

1. Keep any strip that has printing on either side. (Some cards have a blank back, and that's intentional.)
2. Throw out any strip that is blank on both sides. (These may appear at the end of a file, on the last sheet or two.)
3. Tap the cards into a neat stack and bind along the **left edge**. A hole punch with a binder ring is the best way to utilize the mini measures.

The final product will look like the image below:
