DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

None

In this session, participants will learn about the Desired Results Developmental Profile.

We will focus on observation skills, rating the DRDP, collecting the DRDP data, the Summary of Findings, and the Child's Developmental Progress form.

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

Desired Results	<p>We observe...</p> <ul style="list-style-type: none">• As each child interacts with other children, adults, and environment 
Desired Results	<ul style="list-style-type: none">• In the natural program setting   <p><small>© 2015 California Department of Education. All rights reserved.</small></p> <p>2</p>

None

Teachers observe children in their natural, daily activities. Agencies will be able to describe children's achievements in learning and development to advocate the strengths and benefits of the program to families and the larger community.

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

None

Good observation and recording methods over time are the cornerstones for using the DRDP effectively.

The DRDP is not a test, but an observation based assessment for children

The person who is the designated teacher should complete the DRDP. Assistants, parents, and other staff should contribute observations.

Note: Family Child Care Networks have a “teacher identified” person complete the DRDP. This person may be the case manager who oversees the network care providers. The case manager consults with care providers and parents in completing the DRDP.

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

None

Desired Results	<p>Collected documentation includes:</p> <ul style="list-style-type: none">• Anecdotal notes• Photos• Work samples• Other evidence of knowledge and behaviors 
Desired Results	 <p>© 2015 California Department of Education. All rights reserved.</p> <p>4</p>

Teachers collect a substantial number of anecdotal notes, photos, work samples, and other pieces of documentation from family members and other staff, that demonstrate the children's mastered developmental levels. The organization of collected documentation can be achieved through "portfolios."

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

None

Desired Results	<p>DRDP serves as a way to...</p> <p>determine how children are benefiting from programs</p>  <p>© 2015 California Department of Education. All rights reserved.</p>
Desired Results	

- The DRDP findings provide information for agencies to use to improve programs.
- Information is shared with families during parent conferences to support parents in supporting the child's progress.
- Information can also be shared with the community to demonstrate how children benefit from involvement in the program.

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

None

Desired Results	
Desired Results	<p>DRDP also serves as a way...</p> <p>to assist providers in meeting each child's developmental needs in each classroom or family child care home</p>  <p><small>© 2015 California Department of Education. All rights reserved.</small></p> <p>6</p>

- The DRDP documents the kind of work that quality programs are already doing every day.
- As teachers learn more about the children in their care, the DRDP information assists them in adapting and modifying curriculum plans and activities for the individual child, as well as activities for small and large groups.

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

None

Children grow and change quickly, so a completed DRDP is a “snapshot” (i.e., a representative moment in time) of a child’s development.

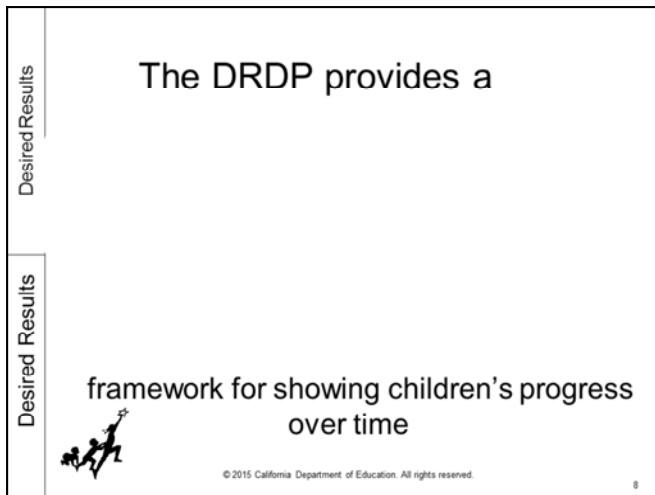

All succeeding observations will document changes that result from growth and progress.

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

None

Each age-level instrument provides a framework that serves in monitoring children's progress throughout the program year.

There are 2 DRDP instruments:

DRDP (2015) – this is one instrument with two views. The DRDP (2015) is a full continuum instrument used for all children infancy through kindergarten entry including children with special needs.

There is an infant/toddler view for use with children infancy to 36 months and there is the preschool view for preschool age children until kindergarten entry.

- DRDP SA - 2 versions to choose from: first, the DRDP–SA complete version which has all 35 measures ; second, the DRDP-SA[®] (2010) simplified version, which has 2 domains with 13 measures.

The DRDP-SA[®](2010) was simplified because the other areas were already being assessed during the school day (e.g., reading, math, etc.). EESD felt it was still important to assess *Self and Social Development* as well as *Health and Safety*.

Each profile provides guidance in documenting observations that reflect the developmental growth for each age group.

SESSION 3: DRDP

Handout

Desired Results	
Desired Results	<p style="text-align: center;">CDE Guidance Management Bulletin June 2015</p> <p>Effective Fall 2015, the DRDP (2015) is required for all EESD programs that provide early education and care for children ages early infancy to kindergarten entry. It is also required for all preschool children with IEPs and for all infants and toddlers with IFSPs.</p>  <p>© 2015 California Department of Education. All rights reserved.</p> <p>9</p>

Treasure Hunt - Version 1"

Treasure Hunt - Version 1

Your group is going on a treasure hunt, looking for answers about the DRDP®. Use the FAQ® as a resource to answer the questions below. Make sure you note which FAQ you used to answer each question.

1. If the program is closed one Friday every month for staff training and clean up. How do I calculate when that first DRDP® is due?
2. Our program likes the Creative Curriculum System. Must we use the CDE proposed curriculum instead?
3. One of the children in my group is amazing! I noted several measures at "Integrating Earlier" and she does more than what is at Integrating Earlier. Is this one of those times I use "Emerging" to show she's emerging to the next level?

Activity: Treasure Hunt

Desired Results for Children and Families Training

Treasure Hunt

GOALS:

The goal of this activity is for participants to become familiar with DRDP guidelines and learn about the FAQ resource.

MATERIALS REQUIRED:

- Copies of DRDP Frequently Asked Questions (FAQ)
- Copies of the two versions of Treasure Hunt

TIME: 30 min

ACTIVITY PROCESS:

1. Have participants work in dyads, triads or table groups. Give one version of questions to each table.
2. Ask each small group to work together to find the answers to the questions, use the FAQ as a resource in answering the questions, and note which FAQ the group used to answer each question.

REFLECTION:

- Return to the large group. Read the Treasure Hunt questions and solicit answers from the group. Correct misconceptions as needed.
- Explain that the DRDP Frequently Asked Questions are available on the Desired Results website, and that participants should check the site regularly to see if there have been updates. Explain that, this resource answers many questions teachers may have about using the DRDP.

Handout

Desired Results	<h2 style="text-align: center;">DRDP Guidelines</h2> <p>An age-appropriate version of the DRDP must be completed within 60 calendar days of the child's enrollment and every six months thereafter.</p>
Desired Results	<div style="display: flex; align-items: center;">  <div style="margin-left: 20px;"> <p>60 calendar days and every 6 months thereafter</p> </div> </div> <div style="display: flex; align-items: center; margin-top: 20px;">  <div style="margin-left: 20px; font-size: small;"> <p>© 2015 California Department of Education. All rights reserved.</p> <p>14</p> </div> </div>

None

- An age-appropriate version of the DRDP must be completed for all children enrolled in a CDE/EESD funded center or family child care home network.

Trainer note: Clarify how often and when DRDPs are required to be completed. Emphasize 60 calendar days from the enrollment date of children. Enrollment is typically determined to be the first date the child receives care.

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

None

Desired Results

Desired Results

Teachers and staff need to become familiar with the DRDP

15

- Get to know the Desired Results, developmental domains, measures, definitions, developmental levels, and descriptors. Read through the introduction and appendices of the assessment for clarification.
- The DRDP tool kit ideas, such as the mini-measures, are on the DR website and helpful in becoming familiar with the DRDP.

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

Desired Results	<p>The DRDP was developed by the:</p> <ul style="list-style-type: none">• California Department of Education, Child Development Division- (now Early Education & Support Division)• WestEd Center for Child and Family Studies• University of California, BEAR Center <p><i>With valuable input from teachers and directors who participated in the research study</i></p> 
Desired Results	<p>© 2015 California Department of Education. All rights reserved.</p> <p>16</p>

None

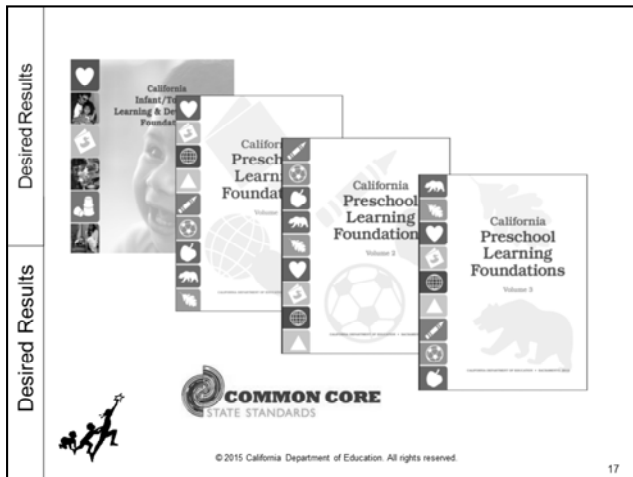

- WestEd and BEAR aligned the instruments and developed new measures.
- BEAR provided overall direction for the study and summarized the data.
- BEAR is the Berkeley Evaluation and Assessment Research Center.

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

None

The DRDP aligns with the:

- Infant and Toddler Early Learning and Development Foundations
- Preschool Learning Foundations, Volumes 1-3
- Common Core Standards
- Head Start Child Development and Early Learning Framework

Now let's look at the instrument in more detail...

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

None

Desired Results	<h3>Build A Tower</h3> <ul style="list-style-type: none">• Use the items on your table.• As a group, build a tower.• You have 5 minutes. 
Desired Results	 <p>© 2015 California Department of Education. All rights reserved.</p> <p>18</p>

Have participants build a tower using (cups, blocks, paper) any accessible material.

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

Desired Results	<h3>Key Points</h3> <ul style="list-style-type: none">• What was your first step?• How did you know to start there?• What does this have to do with children's learning?
Desired Results	 <p><small>© 2015 California Department of Education. All rights reserved.</small></p> <p>19</p>

None

This is the debrief slide.

The purpose of the activity is to make a connection between having a foundation in order to support a structure. For us that structure is children's learning. Our foundation is our California Preschool and Infant toddler Learning and development Foundations. These are important first steps in understanding child development and understanding the skills that children are capable of.

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

Desired Results	<p>Why was it important to align the DRDP to the foundations?</p> 
Desired Results	<p>To ensure we assess what we want children to learn and that it is aligned to what is appropriate for children of this age</p>  <p><small>© 2015 California Department of Education. All rights reserved.</small></p> <p><small>20</small></p>

None

- The state has taken care to build a cohesive system.
- The foundations describe children's learning and development.
- Thus it is important that we are assessing what we want children to learn, and that we align it to what is appropriate for children of this age.

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

Desired Results	<p>What is the relationship between the DRDP and the foundations?</p> <ul style="list-style-type: none">• The foundations tell us what children, with adequate support, typically learn and develop.• The DRDP provides a structure and a tool for recording an individual child's development and documenting progress.• All volumes of the California Learning and Development Foundations provide the research backing for the DRDP 2015
Desired Results	 <p><small>© 2015 California Department of Education. All rights reserved.</small></p> <p>21</p>

None

The developmental domains work in an integrated fashion to support all four Desired Results. Ways to use the foundations and DRDP together:

- Read foundations at the beginning of the school year to understand development in a general way.
- Complete the DRDP twice each year to see children's progress.

Foundations provide the overall developmental landscape or backdrop. The DRDP helps determine where an individual child is on that backdrop.

Desired Results Developmental Profile—Preschool® (2015) DRDP-PP® (2015)

List of Measures Within Domains

Domain	Measure
Self and Social Development (SSD)	1 SS01: Identity of self
	2 SS02: Recognition of own skills and accomplishments
	3 SS03: Expressions of empathy
	4 SS04: Impulse control
	5 SS05: Taking turns
	6 SS06: Awareness of diversity in self and others
	7 SS07: Relationships with adults
	8 SS08: Cooperative play with peers
	9 SS09: Socio-dramatic play
	10 SS10: Friendships with peers
Language and Literacy Development (LLD)	11 SS11: Conflict negotiation
	12 SS12: Shared use of space and materials
	13 LL01: Comprehension of meaning
	14 LL02: Following increasingly complex instructions
	15 LL03: Expression of self through language
	16 LL04: Language in conversations
	17 LL05: Interest in literacy
	18 LL06: Comprehension of age-appropriate text presented by adults
	19 LL07: Concepts about print
	20 LL08: Phonological awareness
	21 LL09: Letter and word knowledge
	22 LL10: Emergent writing

Activity: Compare and Contrast

Trainer notes:

Point out the differences between the Infant toddler view and the Preschool view of the DRDP 2015

Point out the difference in the School Age assessment (developmental levels, measures numbered consecutively)

Compare and Contrast

GOALS:

The goal of this activity is for participants to identify similarities and differences among the three age-level DRDP instruments.

MATERIALS REQUIRED:

- Three age-level List of Measures within Domains
- Three age-level Navigation Maps

TIME: 10 minutes

ACTIVITY PROCESS:

- Ask participants to pull out the three age levels of List of Measures within Domains and Navigation Maps.
- As elbow partners or table groups, have participants find:
 - The one difference in developmental domains among the three age levels
 - Similarities and differences in the developmental levels among the three age-level instruments

REFLECTION:

- Return to the large group. Solicit observations from the group.
- If needed, clarify that the three age-level tools have some of the same developmental domains.
- Point out that the preschool tool uniformly uses the four developmental levels from the examples. Both the infant/toddler and the school-age tools have varying developmental levels depending on the measure.

Navigation Map

Measure
SED 1: Identity of Self in Relation to Others
Child demonstrates awareness of self as distinct from and different from others.

Developmental Domain

Definition
Mark the latest developmental level the child has mastered:

Responding		Exploring		Building		Integrating	
Earlier	Later	Earlier	Later	Earlier	Later	Earlier	Later
Responds in basic ways to others	Does not seem to explore self and others	Recognizes self and familiar people	Communicates own name and names of familiar people (e.g., "mama," "daddy," or sibling's name)	Expresses simple ideas about self and connections to others	Describes self or others based on physical characteristics	Describes own preferences or feelings, and describes the feelings or desires of family members, friends, or others	Compares own preferences or feelings to those of others
Possible Examples							
• Responds to a familiar adult during feeding.	• Responds to a familiar adult when one name is spoken or signed.	• Points to picture of self on the wall.	• Points to picture of self on the wall.	• Points to picture of self on the wall.	• Points to picture of self on the wall.	• Points to picture of self on the wall.	• Points to picture of self on the wall.
• Grasp on adult's finger when adult's hand is touched.	• Play with adult's hand when adult's hand is touched.	• Play with adult's hand when adult's hand is touched.	• Play with adult's hand when adult's hand is touched.	• Play with adult's hand when adult's hand is touched.	• Play with adult's hand when adult's hand is touched.	• Play with adult's hand when adult's hand is touched.	• Play with adult's hand when adult's hand is touched.

- The number of measures in the DRDP K are 55
- The SA DRDP-complete version had 31 measures and the DRDP-SA - simplified version(2010) has 13.

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

None

These are the four components of the DRDP – the 4 Ds.

Trainer note: Review them and emphasize that reading these components can assist staff in knowing the *intent* or purpose of the measure.

The Domain represents a crucial area of learning and development for children.

The Definition specifies the aspect of development that is being observed.

The Descriptor describes observable child behaviors associated with that developmental level.

The Developmental Levels for each measure represent a developmental continuum.

Desired Results	<p>“With the information you learn from observing, you can select the:</p> <ul style="list-style-type: none">• right materials,• plan appropriate activities,• ask questions that guide children in learning to understand the world around them.” <p><i>The Power of Observation</i></p>  <p><small>© 2015 California Department of Education. All rights reserved.</small></p>
Desired Results	

- EESD requires programs to use the DRDP for assessment as a motivator. The real reason we use observation is to get to know children.
- Through observation, we get to know how children learn best, as well as their strengths, need for support materials, and language. In addition, it helps teachers plan engaging activities to help them progress in their development.
- Observation is a skill that can be learned and gets easier with practice. The observations we are making should provide good information that can inform our ratings on the DRDP.
- The next activity will assist in writing meaningful anecdotal notes.

- Before teachers can rate the DRDP, they need to collect relevant information about the children.
 - Once teachers know the “what,” “when,” and “how” they are ready to plan to observe, record, and collect evidence on children’s typical behaviors.
 - Teachers and staff can collect a wide variety of documentation to provide evidence of children’s mastered developmental levels across all of the measures, such as anecdotal notes, work samples, use frequency count sheets, take photos, and other forms of evidence.
 - Enlist all classroom staff, support staff, and parents to contribute documentation to the child’s portfolio. We know that teachers who are successful in implementing an observation-based assessment, plan for observations.
- Trainer note: Remind participants to look at the gallery during breaks for samples.

Activity: Noticing Descriptions and Interpretations

Desired Results for Children and Families Training

Practice Noticing Descriptions and Interpretations

Session 3

GOALS:
This activity is designed to give the participants practice in separating descriptive data from interpretive data. This activity also familiarizes participants with the components of observation skills.

MATERIALS REQUIRED:
Instruction page
Photo page
Post-its
Descriptive/Interpretive Chart

TIME: 10 minutes

ACTIVITY PROCESS:

1. Discuss the importance of good observation skills as it relates to the DRDP.
2. Participants may work alone, with a partner, or in a small group.
3. Direct participants to view the picture on screen or in the binder.

Reflection:
Ask the participants to share insights with the entire group. Encourage discussion of "good" observation skills: include thoughts on objectivity, directness, specificity, mood, and completeness. Some suggested questions are as follows:

- What judgments did you put on hold during the observation?
- What specific details did you see in the photos?
- How can you use descriptive details to determine the mood of the child?
- Does the photo give you any clues about the sequence of the event?

Discuss the following: the setting, who was involved, the actions in the order they occurred, the responses, the interactions, and the ending.

- One of the first steps, is to enter children into the DRDPtech system.
- The Child record will need to be completed for all children
- Ensure that the date of assessment at the top of the page is within 60 days of the child's enrollment
- The information page will already be completed for each rating period inside of DRDPtech. Teachers can edit the information page when necessary
- A tutorial on on Steps to Completing the DRDP is available on the website .

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

None

One of the first steps, is to become familiar with the components of the assessment.

The 4Ds of the DRDP assessment instrument are crucial to helping staff clarify the intent or purpose of each measure.

The domain represents a crucial area of learning.

The definition specifies the aspect of development that is being observed.

The developmental levels represent a developmental continuum. Each level specifies a point along the developmental continuum.

The descriptors give you the behaviors and or skills you must see with mastery to rate at that developmental level.

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

None

Desired Results

Desired Results

A Deeper Look at the Descriptors

Developmental Domain: COG - Cognition, Including Math and Science
COG 5: Number Sense of Quantity
Child shows developing understanding of number and quantity.

Mark the latest developmental level the child has mastered:

Responding		Exploring		Building		Integrating
Earlier	Later	Earlier	Later	Earlier	Later	Earlier
Responds to people or objects in basic ways	Responds to changes in the number of objects observed or experienced with	Demonstrates awareness of quantity	Uses number names, but not always correctly, in situations related to number or quantity	Identifies small quantities without counting, up to three	Counts up to five objects using one-to-one correspondence and begins numbers in order one through ten	Shows understanding that the last number counted is the total number of objects in the group
<p><i>Possible Examples:</i></p> <div style="border: 1px solid black; padding: 5px; display: inline-block;"> Descriptor Each developmental level has a descriptor that defines the behaviors that would be observed if a child were at that developmental level. </div>						

© 2015 California Department of Education. All rights reserved.

37

The descriptor can be found right under the developmental level, in every measure.

DR Activity Sheet #6: A Deeper Look at the Descriptors

INTENT: Examine the behaviors and skills in the descriptors that are needed to rate that developmental level. This will improve reliability when rating.

GOAL: Gain deeper understanding of the skills and behaviors within each descriptor by comparing documentation and descriptors for Measures COG 5, COG 7, and COG 9.

MATERIALS REQUIRED:

- PowerPoint slides
- DRDP Measures COG 5, COG 7, and COG 9
- Video clip from 2:50-3:17 - LLD Foundations: Speaks Clearly
- Post-it notes

TIME: 30 minutes

ACTIVITY PROCESS

1. Display the PowerPoint slide with the math video.
2. Participants read the descriptors for COG 5. Direct them to circle the word **or**, highlight the ; followed by the word **and**, and underline the word **and** when it connects two skills.
3. It is important to emphasize: 1) What ; followed by **and** means 2) What **and** means 3) What **or** means.
4. Participants compare their work with their neighbor's circles, highlights, and underlines to see if they identified them all. Make needed corrections or additions.
5. Discuss what the measure is assessing and what children might do for each of the developmental levels.
6. Repeat the process for COG 7 and COG 9.
7. Show the video clip and ask them to take notes on a post-it or a piece of paper.
8. What is this child able to do?
9. Which part(s) of the descriptor for COG 5 does the video address?
10. Which part(s) of the descriptor for COG 7 and COG 9 does the video address?

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

None

Developmental Domain: COG — Cognition, Including Math and Science									
COG 3: Number Sense of Quantity									
Child shows developing understanding of number and quantity									
Mark the latest developmental level the child has mastered:									
Responding		Exploring		Building		Integrating			
Earlier	Later	Earlier	Later	Earlier	Middle	Later	Earlier		
Responds to people or objects in basic ways	Responds to changes in the number of objects observed or interacted with	Demonstrates awareness of quantity	Uses number names, but not always correctly, in situations related to number or quantity	Identifies small quantities without counting, up to three	Counts up to five objects using one-to-one correspondence; and further numbers in order, one through ten	Shows understanding that the last number counted is the total number of objects in the group	Solves simple everyday problems involving up to 10 objects, using one-to-one correspondence and number names; correctly, up to 10		
<p>Desired Results</p> <p>If the descriptor has ; followed by and the child <u>must</u> do all the behaviors <u>but not necessarily</u> in the same observation</p> <p>BUT</p> <p>© 2015 California Department of Education. All rights reserved.</p>									

- The language inside the descriptors is very important.
- If the descriptor has a ; AND the child must do all the behaviors but not necessarily in the same observation.
- For example, if the descriptor says walk; and skips, the child needs to exhibit both behaviors. He could walk today and skip tomorrow.

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

Developmental Domains: COG — Cognition, Including Math and Science

COG 7: Shapes
Child shows an increasing knowledge of shapes and their characteristics.

Mark the latest developmental level the child has mastered:

Responding		Exploring		Building			Integrating
Earlier	Later	Earlier	Later	Earlier	Middle	Later	Earlier
	There are no earlier levels for this measure.	Explains shapes of objects	Manipulates objects based on shape	Matches similar shapes and distinguishes them from dissimilar shapes without necessarily naming them	Identifies or names several shapes in the environment (e.g., circle, square, triangle)	Recognizes shapes when they are presented in different orientations or as parts of other objects	Describes several shapes and the differences between them

Desired Results

If the descriptor says and, then the child MUST be able to do all of the behaviors and they need to be observed together.

© 2015 California Department of Education. All rights reserved.

None

- BUT if the descriptor says AND then the child must do all the behaviors and they need to be observed together.
- For example, if the descriptor says “walk AND skip” the child needs to walk and skip in the same observation.

DESIRED RESULTS TRAINING

Conditional Measures

Conditional Measures for Preschool-Age Children

Some measures in the DRDP preschool form are conditional measures that are assessed when certain conditions are met. These measures should be used if they exist in the child's environment or are being planned for the child's learning activities and supports, and documenting progress.

Measure	Conditions Under Which to Assess
Early Development Measures	
ED-01-01 Motor Function	• Required for all infants and toddlers
ED-01-02 Self-Feeding	• Recommended for preschool children when this information would be useful for documenting progress or planning the child's learning activities and supports
ED-01-03 Social Interaction	• Required for all of these four measures to assess
English Language Development Measures	
ELD-01-01 Communication in English	• Used if a language other than English is spoken in the child's home or community or the child is bilingual
ELD-01-02 Language Understanding	• Recommended for preschool children when this information would be useful for documenting progress or planning the child's learning activities and supports
ELD-01-03 English Language Proficiency	• Required for all of these four measures to assess
Physical Development and Health Measures	
PD-01-01 Motor Function	• Required for all preschool-age children with IDH
PD-01-02 Health and Safety	• Recommended for preschool children when this information would be useful for documenting progress or planning the child's learning activities and supports
PD-01-03 Physical Development	• Required for all of these four measures to assess

Rating Conditional Measures

If you are using the conditional measures, you will mark them on the DRDP according to the following guidance:

Measure	How to Mark the DRDP
Early Development Measures	
ED-01-01 Motor Function	• If the measure is not assessed, do not mark the measure.
ED-01-02 Self-Feeding	• If the measure is not assessed, do not mark the measure. If it is assessed, mark the measure as "Not Assessed" or "Assessed" (if the child is using the measure).
ED-01-03 Social Interaction	• If the measure is not assessed, do not mark the measure. If it is assessed, mark the measure as "Not Assessed" or "Assessed" (if the child is using the measure).
English Language Development Measures	
ELD-01-01 Communication in English	• If the measure is not assessed, do not mark the measure. If it is assessed, mark the measure as "Not Assessed" or "Assessed" (if the child is using the measure).
ELD-01-02 Language Understanding	• If the measure is not assessed, do not mark the measure. If it is assessed, mark the measure as "Not Assessed" or "Assessed" (if the child is using the measure).
ELD-01-03 English Language Proficiency	• If the measure is not assessed, do not mark the measure. If it is assessed, mark the measure as "Not Assessed" or "Assessed" (if the child is using the measure).
Physical Development and Health Measures	
PD-01-01 Motor Function	• If the measure is not assessed, do not mark the measure. If it is assessed, mark the measure as "Not Assessed" or "Assessed" (if the child is using the measure).
PD-01-02 Health and Safety	• If the measure is not assessed, do not mark the measure. If it is assessed, mark the measure as "Not Assessed" or "Assessed" (if the child is using the measure).
PD-01-03 Physical Development	• If the measure is not assessed, do not mark the measure. If it is assessed, mark the measure as "Not Assessed" or "Assessed" (if the child is using the measure).

-----------------	--

**A Quick Guide to the DRDP (2015):
Assessing Children Who Are
Dual Language Learners**

Quick Guide to the DRDP (2015) provides useful information for better understanding and using the DRDP (2015). Please direct staff to the other Quick Guide on using the DRDP (2015).

Young dual language learners are young children learning two or more languages at the same time, as well as those learning a second language while continuing to develop their first language. Many children arrive at school from homes where languages other than English are spoken. Over the development of language and literacy skills, a child's first language(s) and English are important for the development of skills in a second language, and therefore, should be considered as the foundational step toward learning English.

Code Switching: A Typical Feature of Dual Language Development

When assessing young dual language learners, keep in mind that code switching is a feature of language development for children who are learning two or more languages. This is well documented in the research literature. Code switching is the use of multiple languages within a single conversation. Even when children mix their two languages they tend to have the grammatical rules of each.

- "I want fish." ("I want fish" in English.) is an example of inserting a Spanish noun within an English sentence.
- "I want fish or apple?" ("I want fish or apple?" in English.) is an example of using English syntax within a Spanish sentence.

As early as three years of age, children code switch to playfully experiment with the two languages and to serve their own social goals, such as to emphasize a point, elaborate, interrupt, focus the language preference of their listeners, and be included or exclude other children as they negotiate new entry to social situations. Other code switching is influenced by the context or purpose of the child's communication. For example they might code switch when speaking with one person, or may alternate exclusively use one language with one person and then another language with another person.

Understanding the Language and Literacy Development (LLD) Measures and the English Language Development (ELD) Measures in the DRDP (2015)

The measures in the Language and Literacy Development (LLD) domain are used to assess all children's progress in developing foundational language and literacy skills, which can be demonstrated in any language. The young dual language learner may demonstrate knowledge and skills related to language and literacy development in his home language, in English, or in both languages.

The measures in the English Language Development (ELD) domain are used to assess the progress in learning to communicate in English at preschool age children who are in a second environment where a language other than English is spoken. The developmental progression as indicated by the ELD domain measures is not age-related but rather reflective of a child's experience with English. Children who are dual language learners will vary substantially in their acquisition of English language competencies, depending on factors such as the degree of exposure to English, level of support provided in their home language, and their motivation to acquire English.

In your folder is a handout Assessing Children Who are Dual Language Learners which explores code switching.

Give teachers time to read the handout (8-10) minutes and circle what is important to them.

What are some things that stood out to you from the handout?

Use chart paper to chart responses about Code Switching.

Desired Results	 Key points for LLD & ELD
Desired Results	<ol style="list-style-type: none">1. LLD is used with all children to measure progress in their home language.2. ELD is used with any child where a language other than English is spoken in the home.  <small>© 2015 California Department of Education. All rights reserved. 64</small>

None

1. The Language and Literacy Development measures are used to assess progress in developing foundational language and literacy skills. These measures are used with all children. Children who are dual language learners may demonstrate mastery in their home language, in English, or in both. This is true not only for Language and Literacy Development, but for all other domains as well, except for the English Language Development domain.
2. The four English Language Development measures are used to document and assess progress in learning to communicate in English. These four measures are used if another language other than English is spoken in the child's home.
3. Communication in *all* languages the child uses should be considered when collecting documentation and completing the measures in all domains

Refer to Intro 6 and the appendices for more information on Assessing Dual Language Learners.

Activity: Completing a Developmental Profile

Desired Results for Children and Families Training

Completing a Developmental Profile

GOALS:
The goal of this activity is to provide the participants with practice in using observation notes to complete a child's profile.

MATERIALS REQUIRED:

- Copies of Ruby's preschool portfolio, "Ruby"
- Copies of a DRDP-2015 (or age appropriate assessment)
- Copies of a partially completed DRDPtech Measures Rated report for Ruby

TIME: 45 minutes

VARIATION: Participants working with children of other ages are free to use one of the other portfolios (e.g. "Mai-14 Months" and "Ulei- Nine-Ten Years.")

ACTIVITY PROCESS:

- Distribute copies of all materials.
- Ask the participants to form pairs and read through the portfolio. Study the photos, work samples, and dated observation notes.
- Each pair should work together to find information about each child to record on the DRDPtech Measures Rated report
- Participants mark the three to four measures that have no rating with the highest level mastered. They also need to be prepared to share what documentation provided support.

REFLECTION:
Return to the large group. Ask participants to share lessons learned in doing this activity. What will the biggest challenges be in completing this process for each of the real children in the program? How might participants address these challenges?

- A progress form is used during parent conferences to describe children's development and growth.
- The progress form provides a review of the child's strengths, areas that need improvement, and goals for developmental growth in the program and at home.
- The information teachers write on the form is based on the DRDP, observations, work samples, and other evidence from the child's portfolio, as well as information provided by parents.

Child's Developmental Progress Form

Child's Name: _____
Date of Conference: _____
Age: _____

This form describes your child's developmental progress in achieving four broad desired results for all children:

- Children are physically and socially competent
- Children are personally and socially competent
- Children are academically and cognitively competent
- Children are safe and healthy

Your child's strengths include: _____

When your child is currently working on include: _____

We (teachers, caregivers, families) can help your child learn and develop in our program by: _____

You can help your child learn and develop at home by: _____

Person Conducting the Conference: _____
Name: _____
Title: _____
Signature: _____

Parent/Guardian: _____
Name: _____

Desired Results	<h3>What is DRDPtech®?</h3> <ul style="list-style-type: none">• An online data entry system• An easy way to compile information about your students• Tool for printing out summary reports
Desired Results	 <p>© 2015 California Department of Education. All rights reserved.</p> <p>72</p>

None

Teachers can complete the DRDPtech online, via the internet using a password and username. The system allows for automatic storage of DRDP data. The data entry system compiles all the data and provides multi level summary reports by student, or by group, and even sub group that can be shared with families and administrators.

Handout

None

All reports are designed in collaboration with EESD. They provide information about children's competencies across developmental domains, and overtime progression. Three types of reports are featured in this slide.

1st Group Summary by Percentage (on left) - Breaks down the data measure by measure so you can see exactly how the measures are being rated. We will look at a sample of this a bit later.

2nd Child's Developmental Progress by Domain- The bar graph displays where the average rating is for the child within a domain. This report gives you the overall developmental level based on how the child was rated on the measures in that domain.

3rd Child's Developmental Progress Over Time by Domain Report - Displays how the individual child is progressing from each reporting period, including a child who moves from an infant/toddler class to preschool.

These reports can be pulled at both the child level and the group level to help teachers plan curriculum and meet the individual needs of children.

Programs are required to summarize the data both at the classroom and the contract level to determine key findings and action steps. These are trends or main points that require action.

Trainer note: After sharing, ask participants to view the sample DRDP Classroom Summary of Findings.

These findings will inform administrators and guide them in making continuous program improvements.

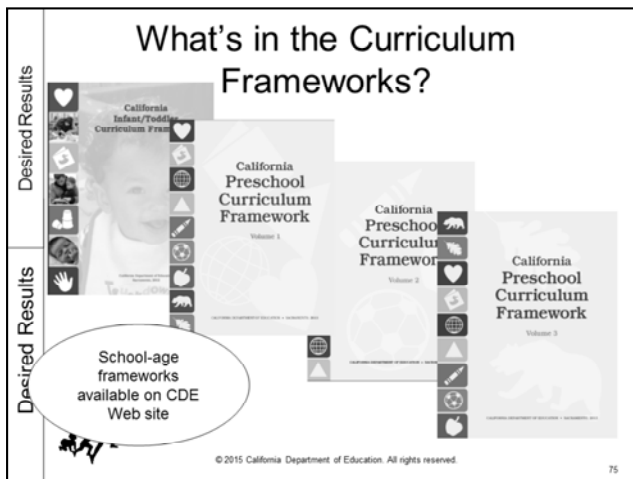

EESD field service consultants will be checking the DRDP Classroom Summary of Findings forms to make sure programs are using the data to inform the “continuous improvement” process.

None

- It's important to plan to observe. When planning an activity for children, think about what to plan in relation to the DRDP. This does not mean setting up a testing situation, rather creating an invitation for children to have interactions with materials, their peers, or an adult that might provide an observation opportunity related to the DRDP.

DESIRED RESULTS TRAINING

SESSION 3: DRDP

Handout

None

This is one example of the data can look like. In your classroom or agency planning process, you would look at the DRDP data that is provided through your DRDPtech reports to support planning for the specific children in your own classroom. The data identifies what developmental level children have mastered for each domain.

EESD 3600

**Instructions For
Desired Results Developmental Profile Summary of Findings (EESD 3600)**
For The Classroom and Family Child Care Home Level

A critical step toward supporting children's learning and developmental progress is for teachers to complete a Desired Results Developmental Profile (DRDP) for each child in the classroom or family child care home. Teachers should refer to the individual developmental profiles and the summary of all the developmental profiles for the classroom or home setting, as a guide for ongoing planning.

To help ensure DRDP data is linked to ongoing classroom or group planning for children, the DRDP Summary of Findings (EESD 3600) form has been developed as a resource. The DRDP Summary of Findings is a recommended form to assist teachers and providers in the planning process. Regardless of whether this resource is used or the program develops their own form, the written process must be completed and include all information detailed below. To ensure activity plans reflect the results of classroom or family child care home DRDP data.

The EESD 3600 form includes Key Findings, Action Steps, Expected Completion Date and/or Ongoing Implementation and Persons Responsible, and Follow-Up and Reflection. The first three sections of this form are completed after the first 60-day assessment period. The Follow-Up section should be completed periodically, with Reflections recorded after the six-month follow-up assessment period to document progress of the Key Findings.

Top Section of EESD 3600 Form

- Complete the Contract Name. Identify the Contract Type, under Family Child Care Home Education Network (FCHEN), and Age Group. The contract type may be California State Preschool Program (CSPP), California Center-based (CCTR), California Security Handicapped (CHNH), Family Child Care Home (FCHH), or California Migrant (CMH).
- Record the Planning Date. This is the date the first three sections of the form are completed. Identify the Lead Planner's Name and Position. This is the teacher completing the EESD 3600 form.
- Record the Follow-up Date(s). These dates indicate when the Action Steps have been reviewed during the following six months. The Follow-up Date will also indicate when reflections are recorded (see Follow-up and Reflection below).

Activity: Writing a Summary of Findings

Desired Results

Writing a Summary of Findings

California Department of Education
Early Education and Support Division

EESD 3600
March 2015

Writing a Summary of Findings

The goal of this activity is to provide participants with practice in identifying key findings in the DRDP. Group Data Summary, Developmental Profile, and also group experience.

Writing a summary to findings

MATERIALS REQUIRED:

- Copies of the DRDP: Summary of Findings
- Narrative
- Copies of the completed sample DRDP: Group Data Summary
- DRDP: Classroom Summary of Findings form
- Sample of completed DRDP: Classroom Summary of Findings form

ACTIVITY PROCESS

1. Read (or ask participants to read) the DRDP: Summary of Findings. Narrative, Findings, and Follow-up and Reflection sections. Go to the end of the narrative section and identify key findings.

2. Ask each group to identify key findings from the narrative and summarize them in the DRDP: Classroom Summary of Findings form.

3. Ask each group to discuss the findings identified for the narrative and summarize them in the DRDP: Classroom Summary of Findings form.

4. Ask each group to discuss the findings identified for the narrative and summarize them in the DRDP: Classroom Summary of Findings form.

Program and staff understand the DRDP and its purpose, and use it to plan and implement the program.

*Items marked with "Optional" and "If Available" can be completed at various optional times during the year.

Visit the [DRDP website](#) for all forms, resources, and updated information on the Desired Results System.

Tip on Training Staff on the Desired Results System:

A knowledge and understanding of the DRDP is a necessary skill for all staff. They should effectively learn how to use the DRDP to improve the quality of care in your program.

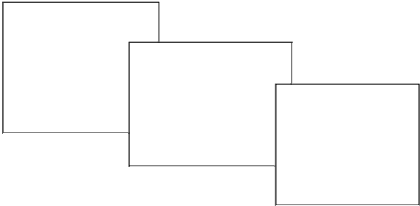

Adapted from the DRDP and its purpose, and use it to plan and implement the program.

- To support participants in planning month to month training activities, direct participants to the DR system self-study checklist on the DIMEN 23-24 pages in their DR binder. In the Resources section, at the back of the binder, participants will find calendar pages.
- Requirements are listed on the checklist with suggested times (months) for completion.

Treasure Hunt - Version 1”

Treasure Hunt - Version 1

Your group is going on a treasure hunt, looking for answers about the DRDP. Use the FAQS as a resource to answer the questions below. Make sure you note which FAQ you used to answer each question.

1. If the program is closed one Friday every month for staff training and clean up. How do I calculate when that first DRDP is due?
2. Our program likes the Creative Curriculum System. Must we use the CDE proposed curriculum instead?
3. One of the children in my group is amazing! I rated several measures at "Integrating Earlier" and she does more than what is at Integrating Earlier. Is this one of those times I use "Emerging" to show she's emerging to the next level?

Measure **Developmental Domain**

SED 1: Identity of Self in Relation to Others
Child shows increasing awareness of self as distinct from and also related to others.

Mark the latest developmental level the child has mastered:

Responding		Exploring		Building		Integrating	
Earlier	Later	Earlier	Later	Earlier	Later	Earlier	Later
Responds to subtle ways to others	Does not seem to explore self and others	Recognizes self and familiar people	Communicates own name and names of familiar people (e.g., "Mama," "Daddy," "Mr. [child's name])	Expresses simple ideas about self and connections to others	Describes self or others based on physical characteristics	Describes own preferences or feelings, and	Compares own preferences or feelings to those of others
Possible Examples							
<ul style="list-style-type: none"> Attends to a familiar adult during meeting. Quiet when leaves a familiar adult. Grabs an adult's finger when adult's hand is touched. 	<ul style="list-style-type: none"> Examines own hand or feet in meeting with an unfamiliar adult. Touches others' hair when in well-known setting. Plays with sand by repeating pattern and repeats. 	<ul style="list-style-type: none"> Identifies a familiar adult when not named, spoken or signed. Points to picture of self on the wall. Indicates when a familiar adult enters the room. 	<ul style="list-style-type: none"> Communicates, "We have a," "The name is," "Mama," "Daddy," "Mr. [child's name]." Points to picture of self on the wall. Identifies familiar people. Points to picture of self on the wall. Identifies familiar people. Points to picture of self on the wall. 	<ul style="list-style-type: none"> Acts out roles from own family (e.g., "Mama," "Daddy," "Mr. [child's name]"). Communicates, "The baby is crying," "The baby is sleeping," "The baby is eating." Identifies own height, weight, or growth. Identifies own growth. Identifies own growth. 	<ul style="list-style-type: none"> Communicates, "I am not," "I am not," "I am not." Identifies own height, weight, or growth. Identifies own growth. Identifies own growth. 	<ul style="list-style-type: none"> Communicates, "I am not," "I am not," "I am not." Identifies own height, weight, or growth. Identifies own growth. Identifies own growth. 	<ul style="list-style-type: none"> Communicates, "I am not," "I am not," "I am not." Identifies own height, weight, or growth. Identifies own growth. Identifies own growth.

Developmental Domain: COG — Cognition, including Math and Science

COG 3: Number Sense of Quantity
Child shows developing understanding of number and quantity.

Mark the latest developmental level the child has mastered:

Responding		Exploring		Building			Integrating
Earlier	Later	Earlier	Later	Earlier	Middle	Later	Earlier
Responds to people or objects in basic ways	Responds to changes in the number of objects observed or interacted with	Demonstrates awareness of quantity	Uses number names, but not always correctly, in situations related to number or quantity	Identifies small quantities without counting, up to three	Counts up to five objects using one-to-one correspondence and builds numbers in order, one through five	Shows understanding that the last number counted is the total number of objects in the group	Solves simple everyday problems by counting one-to-one objects, using one for one counting procedure, and builds numbers correctly, up to 20

Management Bulletin 15-03

Early Education and Support Division

Subject: Information about the Implementation of the Desired Results Developmental Profile (2015) (DRDP [2015]) for providers of early education services funded by the Early Education and Support Division (EESD) and the Special Education Division (SED).

Number: 15-03

Date: June 2015

Expires: Until Rescinded

Authority: California *Education Code (EC)* sections 8203, 8203.5, 8261, and 8282; *California Code of Regulations*, Title 5, sections 18270 and 18272

Attention: Executive Directors and Program Directors of all EESD's CCTR, CSPP, CFCC, CMIG and CHAN contracts and SED-funded Early Education programs

Purpose

The purpose of this Management Bulletin (MB) is to provide guidance on the implementation of the DRDP (2015) assessment to the California Department of Education (CDE), EESD programs and SED programs serving children from early infancy to kindergarten entry.

Authority

For EESD: *California Code of Regulations*, Title 5, Section 18272 requires EESD contracted centers, preschools, and FCCHEN to complete the age-appropriate DRDP for each child enrolled in the program for at least ten hours per week. The DRDP must be completed for each child within 60 calendar days of the child's enrollment in the program and at least once every six months thereafter.

For SED: Public Law 108-446, the Individuals with Disabilities Education Improvement Act of 2004 (IDEIA 2004) and regulations from the U.S. Department of Education's Office of Special Education Programs (OSEP) form the legal basis for the participation of infants and toddlers and their families with Individual Family Service Plans (IFSPs) and preschool-age children with Individualized Education Programs (IEPs) in the DRDP Assessment System. For information on eligible children and assessment timelines, visit <http://draccess.org/system/DRDPAccessSystemFedRequirements.html>.

[Return to Top](#)

Background

About the DRDP (2015)

The DRDP (2015), a developmental continuum from early infancy to kindergarten entry, is designed to assess the developmental progression of all children in CDE, funded programs including children with an IFSP or an IEP. The assessment has an Infant-Toddler view for children younger than three years of age, and a Preschool view for children who are age three years and older. The Infant-Toddler and Preschool views include measures in five domains: (1) Approaches to Learning-Self Regulation, (2) Social and Emotional Development, (3) Language and Literacy Development, (4) Cognition, and (5) Physical Development Health. The Preschool view includes the additional domains of: (1) History-Social Science, (2) English-Language Development, (3) Visual and Performing Arts, and (4) additional measures for Mathematics and Science in the Cognition domain. The assessment is fully aligned to the California Early Learning Foundations and the Head Start Child Development and Early Learning Framework.

During the spring of 2014, a field study was conducted with a group of approximately 1,600 children from EESD and SED programs. Data gathered from this study was used to refine the DRDP (2015) instrument. During the 2014–15 program

year, a calibration study was conducted with a group of more than 20,500 children served in EESD and SED programs in preparation for full implementation in the 2015–16 contract year.

Policy

Implementation of the DRDP (2015) for EESD and SED Programs

Beginning with the 2015–16 contract year, the use of the DRDP (2015) is required for all direct service agencies that contract with the EESD to provide early education and care for children ages early infancy to kindergarten entry. It is also required for all preschool children with IEPs and for all infants and toddlers with IFSPs reporting to the California Special Education Management Information System (CASEMIS). Training will be provided to EESD and SED assessors via webinars, training modules, and in-person training. For up-to-date information regarding training activities, check the following Web sites:

- For EESD funded programs, go to <http://www.desiredresults.us>.
- For SED funded programs or for information about children with IFSPs and IEPs, go to <http://www.draccess.org>.

Children dually enrolled in SED and EESD programs will no longer need to be assessed on both the DRDP access and the DRDP (2010). They will be assessed using the DRDP (2015) instrument. **When children are served by both EESD and SED programs, the teachers and specialists are to collaborate on one assessment** following the more stringent timeline, and handle DRDP data according to the requirements of each Division.

For EESD contractors who begin the observation process in July, a draft DRDP (2015) assessment was posted on the <http://www.desiredresults.us> Web site on **June 15, 2015**. The official DRDP (2015) will be posted by **August 3, 2015**. Programs may use the draft document to guide their observations until the final version is released. The finalized assessment will contain additional information.

Using DRDPtech® to Record Assessment Data for EESD Programs

DRDPtech®, a secure cloud application, is provided free of charge to: (1) EESD-funded programs, (2) California Head Start programs, (3) California School Districts and County Offices of Education, and (4) California Tribal Child Care and Development Fund Child Care. Beginning in the 2015–16 program year, EESD-funded agencies are required to use the DRDPtech® to obtain psychometrically valid reports. Use of DRDPtech® will also meet the record retention requirement. This means no paper copies of the instrument are required for individual children when assessment data is stored in DRDPtech®. For agencies that use commercial vendors, an Excel format will be provided so data can be uploaded into DRDPtech® to take advantage of the psychometrically valid report functions.

For EESD-funded agencies that cannot access DRDPtech® through the Internet, an optional rating record is available. This is an Inspiron form that can be completed as a hard copy and submitted to be scanned into the DRDPtech® system. Additional instructions regarding submission will be found on the bottom of the Inspiron form. This service will be available for a small per-child charge (\$1 per child). The Inspiron DRDP (2015) form will be available beginning **September 8, 2015**. Please contact desiredresults@wested.org for more information and to receive copies of the form.

The DRDPtech® (2015) will be online and available to enter child information **by August 28, 2015**. If an agency is not already using DRDPtech®, begin the setup process by linking to <http://www.desiredresults.us> and click on DRDPtech® at Quick Links. Please allow adequate time to set up an account prior to meeting the submission deadline (typically two weeks).

For EESD-funded agencies that are unable to use DRDPtech®, an exemption can be obtained by contacting your assigned EESD Field Service Consultant. You will be asked to complete and submit a form which is renewed each fiscal year. For a list of consultants by region, please visit <http://www.cde.ca.gov/sp/cd/ci/assignments.asp>.

This requirement for the use of DRDPtech® also applies to contractors serving school age children and using the DRDP-SA.

Submitting DRDP (2015) Data to CASEMIS for SED Programs

SED programs will submit DRDP (2015) data to CASEMIS. **SED programs do not enter DRDP data into DRDPtech®**. For questions about CASEMIS, contact casemis@cde.ca.gov. For more information about SED requirements for DRDP (2015), including training, reports, technical assistance, or requirements, contact the Desired Results Access Project by e-mail at info@draccess.org, by phone at 1-800-673-9220, or by visiting <http://draccess.org/prodevelopment/>.

Directives

Assessment Cycle	For EESD Programs	For SED Providers
First assessment	Completed within the first 60 days of enrollment in program.	Completed for any child made eligible by October 1 and submitted to CASEMIS by February 1 .
Next assessment	Completed every six months after initial assessment.	Completed for any child made eligible for services by March 1 of the program year. Data is submitted to CASEMIS by July 1 .
Limitation	If child is enrolled for less than 10 hours per week, an assessment is not required.	If a child is eligible for services, an assessment is required regardless of hours of service received.
Limitation	If a child is ill for an extended period of time or is out of the country and not attending the program, an assessment may not be possible and should be documented.	If a child is ill for an extended period of time or is out of the country and not attending the program, an assessment may not be possible and should be documented.

EESD Programs

Questions regarding the information in this MB can be addressed by contacting Serene Yee, Consultant, Quality Improvement Office, by phone at 916-322-1048 or by e-mail at syee@cde.ca.gov.

SED Programs

Questions regarding special education's participation in the DRDP Assessment System may be addressed to Sheila Self, Consultant, Policy Program Services Office, by e-mail at sself@cde.ca.gov.

If you have any questions regarding the information in this management bulletin, please contact your assigned Early Education and Support Field Services Consultant at <http://www.cde.ca.gov/sp/cd/ci/assignments.asp> or by phone at 916-322-6233.

Treasure Hunt

Session 3

GOALS:

The goal of this activity is for participants to become familiar with DRDP guidelines and learn about the FAQ resource.

MATERIALS REQUIRED:

- Copies of DRDP Frequently Asked Questions (FAQ)
- Copies of the two versions of Treasure Hunt

TIME: 30 min

ACTIVITY PROCESS:

1. Have participants work in dyads, triads or table groups. Give one version of questions to each table.
2. Ask each small group to work together to find the answers to the questions, use the FAQ as a resource in answering the questions, and note which FAQ the group used to answer each question.

REFLECTION:

- Return to the large group. Read the Treasure Hunt questions and solicit answers from the group. Correct misconceptions as needed.
- Explain that the DRDP Frequently Asked Questions are available on the Desired Results website, and that participants should check the site regularly to see if there have been updates. Explain that, this resource answers many questions teachers may have about using the DRDP.

Treasure Hunt - Version 1

Your group is going on a treasure hunt, looking for answers about the DRDP. Use the FAQs as a resource to answer the questions below. Make sure you note which FAQ you used to answer each question.

1. If the program is closed one Friday every month for staff training and clean up. How do I calculate when that first DRDP is due?
2. Our program likes the Creative Curriculum System. Must we use the CDE proposed curriculum instead?
3. One of the children in my group is amazing! I rated several measures at “Integrating Earlier” and she does more than what is at Integrating Earlier. Is this one of those times I use “Emerging” to show she’s emerging to the next level?
4. We are part of a FCCHEN, and I supervise 6 family childcare homes. The providers tell me they are not allowed to complete DRDPs. Is this true? Who is responsible for completing the DRDP’s on the children in their care?
5. We have an inclusive preschool program. Do I still complete the DRDP on children in the program that have an IEP?

Treasure Hunt - Version 2

Your group is going on a treasure hunt, looking for answers about the DRDP. Use the FAQs as a resource to answer the questions below. Make sure you note which FAQ you used to answer each question.

1. I'm teaching a 3-year-old classroom, but I also have a two-year-old who will turn three around Thanksgiving. The first DRDP is due while she's still two, though. Do I have to use the Infant/Toddler view with her even though she's in a preschool classroom?
2. Our program hates wasting so much paper. Can we use the same DRDP forms for both the fall and spring assessment periods? And if not, is there another paper-saving option that you can think of?
3. We really don't have room at our school to keep all the children's portfolios for five years, should we rent out one of those storage spaces?
4. The DRDP is so long, we only want to use some measures in certain domains. Can we skip measures?
5. This is my first time using DRDP, where do I go to find free training opportunities?

DRDP (2015) - A Developmental Continuum from Early Infancy to Kindergarten Entry Requirements

1. When is the Desired Results Developmental Profile (DRDP) to be completed?

The first DRDP assessment instruments must be completed within 60 calendar days of the child's first day of enrollment in the program and every six months thereafter. Completing the DRDP (rating the child's development on the DRDP measures) is usually completed over a two-week period; however, teachers and caregivers are expected to record observations and gather evidence on an ongoing basis.

2. For part-time preschoolers who are attending one or two days a week, would the 60 days count from days of enrollment or calendar days?

The DRDP must be completed for all children within 60 calendar days regardless of the circumstances. Remember, in order for a DRDP to be completed, children must attend the program ten hours a week or more.

3. Who is required to administer the DRDP?

The child's primary teacher or caregiver is responsible for completing the DRDP. It should not be done by teacher aides or by parents, although their comments and other anecdotal observations may be used to inform the child's primary teacher or caregiver ratings. The staff person who completes the developmental profile should be able to understand the child's language, or use an interpreter if necessary.

4. Which version of the Desired Results Developmental Profile (DRDP) should be used?

Use the DRDP (2015)–Infant/Toddler for children who are not yet three years of age. Use the DRDP (2015)–Preschool for children who are three years of age until kindergarten enrollment. It may also be used for children who are at least two years and seven months entering a preschool classroom who will turn three on or before December 2. Use the Desired Results Developmental Profile– School Age (DRDP-SA©), Complete Version, for children from kindergarten entry through 12 years of age.

5. Is it okay to use DRDP-K© for preschool children?

The DRDP-K is an assessment instrument that is designed for teachers to use to reflect on the learning, development, and progress of all children during the transitional kindergarten/kindergarten year.

6. How long should the DRDP forms be maintained on file?

The five year requirement for maintaining records has not changed. DRDP records must be kept for five years (the same as it has always been). DRDPtech allows programs to store these records in a free, secure online system.

7. Should the portfolios be kept on file also?

Portfolios should be kept on file while the child is enrolled in the program. Once the child leaves the program, the portfolio should be sent home with the child. There is no need to store them for five years.

8. Should there be a comment for each measure?

There must be enough evidence to document the child's mastery level. Reference the child's portfolio, an anecdotal note, or summarize other evidence.

Desired Results Developmental Profile (DRDP) Formatting

9. Should the DRDP be copied each time it is administered?

Programs may use either of the following options:

Each time teachers are completing the DRDP assessment; they need a new assessment to rate.

Effective Fall 2015/2016 program year all EESD programs are required to enter DRDP ratings into DRDPtech.

The DRDP instruments and the DRDP Rating Records can be found on the Web site at <https://desiredresults.us/content/drdp-forms>

10. What is the purpose of the DRDP Rating Record?

In order to maintain the validity and reliability of the DRDP, each time the teacher completes the DRDP, teachers

are asked to come to the rating with “fresh eyes.” The DRDP Rating Record is simply for the convenience of the program to avoid duplicating the instrument two times or more. Ratings for all rating periods must be entered into DRDPtech.

11. Can two bubbles be used on the instrument so that the same instrument can be used twice?

No, each time the teachers complete the DRDP, they should be looking at it with “fresh eyes.” Research shows that teachers are most objective when they look at the evidence and documentation and then rate the measure. When referring to previous ratings, teachers may rate the child higher or lower than their true developmental level because of their expectations of growth since the last rating.

12. Is it okay to modify or skip measures from the DRDP?

All components of the DRDP are research based. They work together to provide the child's developmental profile along a continuum. The DRDP has gone through formative evaluations to demonstrate that it is a reliable and valid assessment instrument in its current form. Modifying or skipping measures compromises the reliability and validity factors.

13. Can observations be put directly into DRDPtech so information can be stored in one place?

In order to rate the DRDP, look at the child's portfolio, anecdotal notes, teacher's records, and any other evidence of the child's progress during the rating period. *DRDPtech will not have the option to put documentation or observations. Programs and teachers already have a system for documentation collection and they are encouraged to continue to use that system, there is no need to double do the work and reenter it into DRDPtech.*

14. Is the DRDP available in computerized version (meaning profiles can be filled out electronically and summaries automatically generated)?

DRDPtech is a server-based computer support system for the Desired Results Developmental Profile (DRDP) assessment instruments. DRDPtech is designed to allow teachers, program administrators, and other designated staff to enter the results of assessments using the DRDP instruments and to produce a variety of reports about the results for individual children and groups of children. Effective Fall 2015/2016 program year all EESD programs are required to enter DRDP ratings into DRDPtech.

15. Can a child demonstrate mastery of a developmental level on the Desired Results Developmental Profile (DRDP) in their home language?

Children in all age groups can demonstrate mastery of a developmental level in their home language. The teacher who completes the DRDP should speak the child's home language, or have assistance from another adult such as an assistant teacher or caregiver, director, or parent, who does speak the child's home language.

Developmental Levels

16. After marking the last developmental level on a measure can "Emerging to the next level" be marked?

No, since there is not a next developmental level available for reference on the age level instrument, there is no definition of what a child would be emerging towards. The only exception is; when rating full-continuum measures with infants and toddlers if the child has mastered the last level that can be rated and the child demonstrates some behaviors in the level that follows.

17. If a child reaches the last developmental level on an age level instrument, what should occur next?

Staff should continue documenting and observing the child and using the information to plan curriculum.

18. Will most preschoolers reach the integrating earlier level prior to enrolling in kindergarten?

The Desired Results Developmental Profile (DRDP) research shows that most preschoolers will reach the Building level by the end of their preschool years. The DRDP is calibrated to accommodate a broader range of abilities. There is some overlap both with the DRDP (2015) instrument and the DRDP-K instrument in order to encompass the range of abilities.

19. If the first level has not yet been marked, can *Emerging* be marked?

No. Emerging is a way of showing that the child is moving from the present developmental level to the next developmental level. Since there is no first developmental level, the child is not emerging from a developmental level to the next developmental level.

20. Is *Emerging* a developmental level?

No. A developmental level must be marked whenever the child is emerging to the next developmental level.

Children with Special Needs

21. For a child on an IEP, what instrument should be used?

Effective fall 2015, the DRDP (2015) is required for all EESD programs that provide early education and care for children ages early infancy to kindergarten entry. It is also required for all preschool children with IEPs and for all infants and toddlers with IFSPs

Availability of Training/Training Documents

22. Are training materials available on the Web site?

Training materials* are available on the Desired Results Web site under [Training/Materials](#).

In addition, you may refer to our Getting to Know You through Observation DVD and training workbook. It has many great ideas, plus clips of children to use for training.

* These materials are intended solely for use by state-funded agencies for educational purposes. Commercial use is not authorized without express permission.

23. Is there any other training available?

Yes, teacher training is available for a fee. Teacher training dates and locations are posted on the Desired Results Web site under [Training/Onsite Training](#).

24. Is a training of trainer's available on the DRDP?

The Desired Results Trainer's Institute trains a cadre of trainers on the DRDP. The materials provided at the Desired Results Regional Training can be utilized for training staffs.

25. Where can I find a list of Desired Results certified trainers?

The WestEd Desired Results Training and Technical Assistance Project is the sole CDE, EESD contractor authorized to provide training on the DRDP and to certify trainers to provide training on the DRDP within their agencies. Call (805) 312-0338 to arrange a training at your site.

26. Is there a training video or materials for the Desired Results Developmental Profile (DRDP)?

Online courses on the DRDP, Observation of Young Children, and-Dual Language Learners are available through the California Early Childhood Online (CECO) website at <http://www.caearychildhoodonline.org/>. You can also find training on Foundations and Framework on the California Preschool Instructional Network website at www.cpin.us. Tutorials and New Administrator training materials are posted on the Desired Results website <https://desiredresults.us>

27. Is there also a state-adopted curriculum based on research from the Desired Results system as a guide?

The California Department of Education does not approve texts, materials, or particular curriculum for preschool programs. These are all local decisions. The state of California has adopted preschool learning foundations to give guidance to programs on what children should know and be able to do at the end of preschool. A curriculum framework has been developed to provide guidance for using the foundations in program planning, instructional strategies and professional development. Please check the California Department of Education's Web site for more information at www.cde.ca.gov/sp/cd/re/psfoundations.asp

Using with Specific Programs

28. Is this instrument aligned with the Head Start (HS) framework?

Yes, it is. At the request of Early Education and Support Division (EESD), SETA Head Start has completed a crosswalk between the DRDP-PS instruments and the Head Start Outcomes Framework and has graciously agreed to share it statewide. There is full alignment and no need for additional measures. They have also completed the alignment of the DRDP-IT for use in Early Head Start.

29. How many times a year is the DRDP completed in a Head Start program?

Head Start requires completion of the DRDP twice a year. However, as with any program, the agency may require it be completed more frequently. Please check with your Head Start training specialist for more information.

30. If the DRDP (2015)-PS is completed 3 times a year, as some programs require, are the results still valid?

Yes, the results will still be valid since the instrument is calibrated and not dependent on frequency.

Family Child Care Home Education Network

31. In a Family Child Care Home Education Network (FCCHEN), who may complete the Desired Results Developmental Profile (DRDP)?

The DRDP is to be completed by those agency staff members that are designated as teachers.

32. Are trained Family Child Care providers in an FCCHEN allowed to complete DRDP?

Family Child Care Home Education Network teachers are responsible for completing the DRDP. Agencies may call them specialists or coordinators. Certainly, family child care providers are encouraged to assist in collecting evidence and documentation of the child's growth and progress. However, since they are not employees or direct contractors of the state, they cannot be required to complete the DRDP.

Preschool Learning Foundations

33. How does the Desired Results Developmental Profile (DRDP) (2015) relate to the foundations?

Foundations focus on nine domains: social-emotional development, language and literacy, English-language development, mathematics, visual and performing arts, physical development, health, as well as history/social science. The foundations provide early childhood educators, parents, and the public with a clear understanding of the wide range of knowledge and skills that preschool children typically attain when participating in a high-quality preschool program. The DRDP (2015) is a child observation tool aligned with the foundations. The DRDP (2015) provides teachers with a means to assess children's learning along a continuum of four different developmental levels. The foundations and the DRDP (2015) are to be used together to plan the environment, play, learning activities and instruction to meet the needs of the children and provide a high-quality preschool experience.

Still have questions?

E-mail us at desiredresults@wested.org for a prompt response!

The Desired Results Training and Technical Assistance Project is brought to you by the California Department of Education, Early Education and Support Division in collaboration with the [Center for Child and Family Studies](#) at [WestEd](#).

2. Save paper	#9 and #11
3. Portfolios	#7
4. All the measures	#12
5. Training	#26

Compare and Contrast

GOALS:

The goal of this activity is for participants to identify similarities and differences among the three age level DRDP® instruments.

Session 3

MATERIALS REQUIRED:

- Three age-level List of Measures within Domains
- Three age-level Navigation Maps

TIME: 10 minutes

ACTIVITY PROCESS:

1. Ask participants to pull out the three age levels of List of Measures within Domains and Navigation Maps.
2. As elbow partners or table groups, have participants find:
 - The one difference in developmental domains among the three age levels
 - Similarities and differences in the developmental levels among the three age-level instruments.

REFLECTION:

- Return to the large group. Solicit observations from the group.
- If needed, clarify that the three age-level tools have some of the same developmental domains.
- Point out that the preschool tool uniformly uses the four developmental levels from the example. Both the infant/toddler and the school-age tools have varying developmental levels depending on the measure.

Measure 1

Identity of self and connection to others

SSD 1 (of 9)

Desired Results Developmental Profile® (DRDP®) Terms and Definitions

Developmental Domain:	A domain represents a crucial area of learning and development for young children. There are two domains in the DRDP-SA® (2010).
Measure:	A measure focuses on a specific competency. A child's observed behavior is assessed along a continuum of developmental levels. Measures are the individual observational items on the DRDP-SA® (2010). Several measures make up a domain, with each measure covering one of the aspects of development included in that domain.
Definition:	The definition of a measure specifies the aspect of development being observed.
Developmental Level:	The developmental levels for each measure represent a developmental continuum. Each level specifies a point along the developmental continuum. In the DRDP-SA® (2010) Simplified Version, measures in the SSD domain have five developmental levels and measures in the HLTH domain have four developmental levels. The developmental levels are defined on page iii of the front matter of the DRDP-SA® (2010).
Descriptor:	Each developmental level has a descriptor that describes observable child behaviors associated with that developmental level.
Examples:	Each descriptor is illustrated with several examples of behaviors that are consistent with that developmental level. An example is one of many possible ways a child might demonstrate a particular developmental level. It is anticipated that teachers will identify other examples as they complete their observations.

DRDP® Developmental Domain Acronyms

SSD	Self and Social Development
HS	Health and Safety

DRDP (2015) Examples

GOALS:

Encourage participants to think beyond the provided DRDP examples which illustrate just some of the ways a child may demonstrate mastery.

MATERIALS REQUIRED:

- Copies of measures LLD5, COG 3, PD HLTH4, from the DRDP (2015)
- Post-its and writing implements

TIME: 20 minutes

PROCESS:

1. Divide a large group into small groups of three to five people or table groups.
2. Give each group a copy of one of the measures.
 3. Ask each group to write one more example at each of the developmental levels for that measure, and to put each one on a post-it.
 4. Ask group to pass their measure page and post-its to another table. That table sorts the new examples under the corresponding developmental levels.
 5. Switch back with original table. Have tables discuss any discrepancies.

REFLECTION:

Return to the large group. Review the activity and resolve any questions.

LLD 5: Interest in Literacy

Child shows interest in books, songs, rhymes, stories, and other literacy activities in increasingly complex ways

Mark the latest developmental level the child has mastered:

Responding		Exploring		Building		Integrating
Earlier ○	Later ○	Earlier ○	Later ○	Earlier ○	Middle ○	Later ○
Attends or responds to people or things in basic ways	Plays with books; and Responds to other literacy activities	Attends briefly to a familiar adult reading books, singing songs, or saying rhymes	Looks at books on own briefly, or Chooses to join reading, singing, or rhyming activities led by an adult	Looks at books page by page, or Participates, from beginning to end, in listening to stories, singing songs, or playing rhyming games, when supported by an adult	Initiates looking at and talking about books, listening to and talking about stories, singing songs, or playing rhyming games	Extends literacy activities by retelling a story, drawing pictures about a story, or acting out a story
Possible Examples	<ul style="list-style-type: none">• Interacts with a cloth or board book by holding or mouthing it.• Pats a textured board book.• Vocalizes or laughs in response to an adult singing and gesturing a simple finger-play song, such as, "Pat-a-Cake" or "Los cinco deditos," ["Five Little Fingers," a finger play in Spanish].	<ul style="list-style-type: none">• Looks at pictures in a book for a short time while a familiar adult reads the book.• Reaches to turn the page of a board book as a familiar adult talks or signs about the pictures on the page.• Uses simple hand movements to participate during a familiar song or rhyme with a familiar adult.• Touches textured or tactile content on pages of a book as an adult is reading the book.	<ul style="list-style-type: none">• Joins a group doing a simple finger play led by an adult.• Points at a picture when joining an adult who is reading a book, newspaper, or tablet.• Picks up a book and looks at pictures, turns a few pages, and then drops the book to go play.	<ul style="list-style-type: none">• Pretends to read a book from start to finish.• Explores a book with Braille and tactile content with hands.• Sings some words of a familiar song, from beginning to end, with an adult.	<ul style="list-style-type: none">• Asks questions or communicates about why something happened in a story.• Starts a song or rhyme with others while playing outside.• Uses finger puppets while reciting a familiar rhyme.	<ul style="list-style-type: none">• Uses flannel-board pieces to retell parts of a story after story time.• Retells a familiar story to a peer while pretending to read from a book.• Uses a communication device to tell the sequence of events in a favorite story.• Pretends to be a character from a story, using props.
						<ul style="list-style-type: none">• Chooses to read a book related to a particular theme or interest (e.g., dinosaurs or fairies).• Asks for help finding a book about bugs after a nature walk.• Participates, with others, in using the computer to create a story about a class trip.• Makes up own version of rhyming song with peers' names.

PD-HLTH 4: Fine Motor Manipulative Skills

Child demonstrates increasing precision, strength, coordination, and efficiency when using muscles of the hand for play and functional tasks*

Mark the latest developmental level the child has mastered:

Responding		Exploring			Building			Integrating
Earlier ○	Later ○	Earlier ○	Middle ○	Later ○	Earlier ○	Middle ○	Later ○	Earlier ○
Moves arms or hands in basic ways	Uses arms or hands to make contact with objects in the environment	Grasps objects with entire hand	Grasps objects with fingers and thumb	Explores ways to use one hand, or to use both hands doing the same movements, to manipulate objects	Manipulates objects with one hand while stabilizing the objects with other hand or with another part of body	Manipulates objects with both hands doing different movements	Manipulates objects, using hands, with strength, accuracy, and coordination	Performs, with efficiency, a variety of tasks that require precise manipulation of small objects
Possible Examples								
• Curls fingers around an adult's finger.	• Holds a stuffed toy against body.	• Uses fingers and palm to grasp toys of different shapes or sizes.	• Holds a spoon, using thumb and fingers.	• Lifts a cup to mouth with both hands, but may spill some.	• Holds play dough with one hand while cutting it with a wooden knife.	• Uses scissors to cut out simple shapes (e.g., circle, square) on paper.	• Takes a cap off of a marker by twisting with one hand, then pulling with both hands in opposite directions.	• Makes a necklace by stringing a variety of small beads with narrow holes.
• Brings fist to mouth.	• Pulls an object closer, using a raking motion.	• Holds a stacking ring with full fist.	• Pinches cereal pieces between finger and thumb.	• Scribbles back and forth on pavement with sidewalk chalk, using one hand.	• Steadies a container of block accessories on lap while picking out the tree-shaped blocks.	• Pushes a cord through a large bead, using one hand, while moving the bead onto the cord with the other hand.		• Uses a computer mouse to draw details of a picture on a computer screen.
• Makes small movements of arms and hands near the sides of body.	• Pushes hands against an adult.	• Holds a spoon with full fist while being fed by an adult with another spoon.	• Picks up a stacking ring, using fingers and thumb.	• Grasps and turns a doorknob, but may not have strength or coordination to open the door.	• Scoops sand into a container with one hand while holding the container with other hand.	• Peels a banana or orange after adult starts the peel.	• Unfastens buckle on chest strap of wheelchair.	• Rotates pencil within the hand to use the eraser when scribbling with a pencil.
						• Buttons two to three large front buttons on a shirt.	• Fastens snaps on pants made of thicker, stiffer materials, such as denim jeans.	• Uses scissors to cut more challenging materials such as fabric or cardstock during an art activity.

* Children who do not have use of one or both hands may still be rated as demonstrating mastery at a level if they can accomplish the functional intent of the descriptor using other body parts, or prosthetic devices.

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence

Practice Noticing Descriptions and Interpretations

Session 3

GOALS:

This activity is designed to give the participants practice in separating descriptive data from interpretive data. This activity also familiarizes participants with the components of observation skills.

MATERIALS REQUIRED:

Instruction page
Photo page
Post-Its
Descriptive/Interpretive Chart

TIME: 10 minutes

ACTIVITY PROCESS:

1. Discuss the importance of good observation skills as it relates to the DRDP.
2. Participants may work alone, with a partner, or in a small group.
3. Direct participants to view the picture on screen or in the binder.

Reflection:

Ask the participants to share insights with the entire group. Encourage discussion of “good” observation skills. Include thoughts on objectivity, directness, specificity, mood, and completeness. Some suggested questions are as follows:

- What judgments did you put on hold during the observation?
- What specific details did you see in the photos?
- How can you use descriptive details to determine the mood of the child?
- Does the photo give you any clues about the sequence of the event?
- Discuss the following: the setting, who was involved, the actions in the order they occurred, the responses, the interactions, and the ending.

Adapted by permission from The Art of Awareness, ©2000 Deb Curtis & Margie Carter, Redleaf Press. St. Paul, Minnesota, www.redleafpress.org

Practice Noticing Descriptions and Interpretations

1. Look at the photos.
2. Using a post-it paper for each observation, record your reactions.

Example:

"He's making a mess. I better stop him before he gets that black marker all over himself and his clothes."

1. Place notes in appropriate side of the sheet - **Descriptive or Interpretive**
2. Review observations.
3. Sort them into categories termed **Descriptive and Interpretive**.
4. Use the following questions to guide your discussion:
 - Which observations have the details of what actually happened?
 - Which observations have your interpretation of what might have been occurring?
 - Compare your observations to the following examples:

Descriptive	Interpretive

Descriptive Example

"He has a black marker clutched in his left hand and he is making black marks around his belly button."

Interpretive Example

"He is exploring how the marker feels and looks on his body."

What do you see in these two photos?

Reprinted with permission from The Art of Awareness, ©2000 Deb Curtis & Margie Carter, Redleaf Press. St. Paul, Minnesota, www.redleafpress.org

DESCRIPTIVE	INTERPRETIVE

A Deeper Look at the Descriptors

GOAL: Gain deeper understanding of the skills and behaviors within each descriptor by comparing documentation and descriptors for Measures COG 5, COG 7, and COG 9.

MATERIALS REQUIRED:

- PowerPoint slides
- DRDP Measures COG 5, COG 7, and COG 9
- Video clip from 2:50-3:17 - LLD Foundations: Speaks Clearly
- Post it notes

TIME: 30 minutes

ACTIVITY PROCESS

1. Display the PowerPoint slide with the math video.
2. Participants read the descriptors for COG 5. Direct them to circle the word **or**, highlight the ; followed by the word **and**, and underline the word **and** when it connects two skills.
3. It is important to emphasize: 1) What ; followed by **and** means 2) What **and** means 3) What **or** means.
4. Participants compare their work with their neighbor's circles, highlights, and underlines to see if they identified them all. Make needed corrections or additions.
5. Discuss what the measure is assessing and what children might do for each of the developmental levels.
6. Repeat the process for COG 7 and COG 9.
7. Show the video clip and ask them to take notes on a post-it or a piece of paper.
8. What is this child able to do?
9. Which part(s) of the descriptor for COG 5 does the video address?
10. Which part(s) of the descriptor for COG 7 and COG 9 does the video address?

Session 3

LLD and ELD Directions Activity

GOAL:

Participants will be able to learn how to use and become familiar with the LLD and ELD measures.

MATERIALS REQUIRED:

- PowerPoint slides
- DRDP (2015) Preschool View
- Assessing Dual Language Learner handout

TIME: 15 minutes

ACTIVITY PROCESS:

1. Facilitator will show slide of the Instructions for Using the Language and Literacy Development (LLD) and English Language Development (ELD) Measures.
 2. Facilitator will ask participants to highlight question #12 inside the assessment and explain that if another language other than English is spoken in the child's home, they ELD measures must be completed.
 3. Facilitator will show slide of the Assessing Children that are Dual; Language Learners handout. Provide 8-10 minutes to read the handout and highlight what stands out to them.
4. After the reading, facilitator will chart responses from the group "What was important to you?"

REFLECTION:

Facilitator shows the slide of the Key Points for ELD & LLD and reviews the key points with the group.

OPTIONS:

1. Participants can partner read the article.
2. Participants can chart their own response on chart paper (the top 3 important themes from the handout).

A Quick Guide to the DRDP (2015): Assessing Children Who Are Dual Language Learners

Quick Guides to the DRDP (2015) provide useful information for better understanding and using the DRDP (2015). Please check out the other Quick Guides coming soon.

Young dual language learners are young children learning two or more languages at the same time, as well as those learning a second language while continuing to develop their first (or home) language. Many children arrive at school from homes where languages other than English are spoken. Overall, the development of language and literacy skills in a child's first (or home) language are important for the development of skills in a second language, and therefore, should be considered as the foundational step toward learning English.

Code Switching: A Typical Feature of Dual Language Development

When assessing young dual language learners, keep in mind that code switching is a feature of language development for children who are learning two or more languages. This is well documented in the research literature. Code switching is the use of multiple languages within a single conversation. Even when children mix their two languages they tend to honor the grammatical rules of each:

- "I want leche." ["I want milk" in English.] is an example of inserting a Spanish noun within an English sentence
- "¡And then el niño se cayó!" ["And then the boy fell down" in English.] is an example of using English linking words within a Spanish sentence

As early as three years of age, children code-switch to playfully experiment with the two languages and to serve their own social goals, such as to emphasize a point, elaborate, interrupt, honor the language preference of their listener, and be included or exclude other children as they negotiate new roles in social situations. Often code-switching is influenced by the context or purpose of the child's communication. For example they might code-switch when speaking with one person, or may almost exclusively use one language with one person and then another language with another person.

Understanding the Language and Literacy Development (LLD) Measures and the English-Language Development (ELD) Measures in the DRDP (2015)

The measures in the Language and Literacy Development (LLD) domain are used to assess all children's progress in developing foundational language and literacy skills, which can be demonstrated in any language. The young dual language learner may demonstrate knowledge and skills related to language and literacy development in their home language, in English, or in both languages.

The measures in the English Language Development (ELD) domain are used to assess the progress in learning to communicate **in English** of **preschool-age** children who are in a home environment where a language other than English is spoken. The developmental progression articulated by the ELD spoken measures is not age-related but rather indicative of a child's experiences with English. Children who are dual language learners will vary substantially in their acquisition of English language competencies, depending on factors such as the degree of exposure to English, level of support provided in their home language, and their motivation to acquire English.

For children who speak English at home, the assessor will complete the LLD measures only. Still, assessors should keep in mind that children who speak English at home may begin to use some words and phrases from other languages that they learn from their peers and adults in the classroom, family friends, the broader community, and the media. Children may also begin to mix these words and phrases with English. This experimentation with other languages contributes to children's overall development of language and literacy skills.

Remember: for all children (infants, toddlers, and preschool-age) the assessor will complete the LLD measures. For preschool-age children who are dual language learners the assessor will complete both the LLD and the ELD measures.

Collecting Documentation for Young Dual Language Learners

Children who are dual language learners may demonstrate knowledge and skills in their home language, in English, or in both languages. Communication in all languages the child uses should be considered when the Language and Literacy Development (LLD) measures of the DRDP (2015) are completed, as well as measures in the other domains.

The assessor who completes the instrument for a child who is a dual language learner should speak the child's home language. If not, the assessor must receive assistance from another adult who speaks the child's home language, for example an assistant teacher, a program director, an interpreter, or an adult family member who does speak the child's home language. If the adult who speaks the child's home language is not the child's family member or the assistant teacher in the child's class, the program should make arrangements for the adult and child to have time to interact. The adult can then communicate what s/he observes during the interaction to the assessor.

Completing a Developmental Profile

Session 3

GOALS:

The goal of this activity is to provide the participants with practice in using observation notes to complete a child's profile.

MATERIALS REQUIRED:

- Copies of Ruby's preschool portfolio, "Ruby"
- Copies of a DRDP (2015) (or age appropriate assessment)
- Copies of a partially completed DRDPtech Measures Rated report for Ruby

TIME: 45 minutes

VARIATION: *Participants working with children of other ages are free to use one of the other portfolios (e.g. "Mai—14 Months" and "Uriel— Nine-Ten Years.")*

ACTIVITY PROCESS:

1. Distribute copies of all materials.
2. Ask the participants to form pairs and read through the portfolio. Study the photos, work samples, and dated observation notes.
3. Each pair should work together to find information about each child to record on the DRDPtech Measures Rated report.
4. Participants mark the three to four measures that have no rating with the highest level mastered. They also need to be prepared to share what documentation provided support.

REFLECTION:

Return to the large group. Ask participants to share lessons learned in doing this activity. What will the biggest challenges be in completing this process for each of the real children in the program? How might participants address these challenges?

Infant/Toddler Portfolio

Language and Motor

Children show growing abilities in communication and language

Children demonstrate an increased proficiency in motor skills

Mai is 14-months-old. English is her primary language. She has attended the Infant/Toddler program for three months.

8-10

Mai smiles and walks unsteadily to mom when she comes to pick her each day. She raises her arms to say “Up”.

8-12

Mai says “hi” when she arrives at the center. She says “hi” when other children arrive.

8-17

Mai says “uh-oh” when she loses her balance and falls. She says “uh-oh” when other children or objects fall. If they cry – she gets a concerned look

8-16

Mai found Alex’s pacifier. She said “uh-oh”. She walked to Alex and gave him the pacifier. She smiled as Alex put the pacifier in his mouth.

LANGUAGE with Mai

8-23

When Joan tells Mai that they are going “Outside to play,” she repeats “Out, Out” as she goes to the playground door.

9-10

I asked “Who’s that?” (I pointed to the photo of M. with mom.) She said, “mama.” She continued to look, then pointed to herself.

9-18

Mai walked to the kitchen half door. She took in a big whiff of air – smelling lunch. She said “eat.”

STAFF REFLECTION NOTE:

All of these observations are evidence of Mai’s comprehension and responsiveness to language. She repeats many words that she hears and she communicates her needs and interests through gestures and a few words.

MOTOR with Mai

8-10

Mai walks steadily on a flat surface. She balances her body front to back when stepping on uneven surfaces like in the sand box or on the mattress on the floor.

Her mom says that she started pulling up to stand at 10.5 months and has been walking steadily for 2 months.

8-16

Mai works at keeping her balance while she walks – moving her upper body and arms forward and back. She appears to work at more physically when she carries objects in both hands. Today, she carried pegs, books, and stuffed animals from one part of the classroom to another – usually to Joan or friend.

8-18

Mai grasped the pegs with her full hand, wrapping her thumb and fingers around the sides of the pegs. She then brought the pegs in each hand to her center and banged them together making a click sound. She matched the two rounded parts of the pegs turning the pegs by turning her hands. When I put a peg into a hole of the mat, she turned away carrying the pegs to another location.

9-01

Alex and Joan were rolling a ball on the floor. Mai followed the ball to the wall. When it slowly bounced back toward her, it slowed and she picked it up. She rolled the ball back in Alex's direction, pushing it forward, losing her balance for a few seconds. She regained her balance and followed the ball again.

9-12

Mai goes to the sink after her diaper is changed and steps up on the stool. She reaches for the soap pump and puts her hands in the running water under the faucet with assistance. She takes a paper towel and squishes it in her hands and wipes her mouth.

9-25

Mai played in the playhouse kitchen. She picked up the baby doll, holding it in one hand and then the other. She rocked it gently, gave it a kiss on the head, took it to Alex and then walked back to the playhouse, bringing the doll back. She stopped every few minutes to examine the doll's arms and legs – moving them up and down.

- ➡ = Child is not at the earliest developmental level on this measure
- ➡ = Child is beyond the latest developmental level on this measure
- ☐ = The measure is not rateable at this level

This report shows which DRDP® measures have been rated for an individual child so far during the current observation and assessment. Measure names appear down the left side, in the same order as in the DRDP®. Developmental level names appear across the top. A (🌟) symbol indicates the developmental level rated for the measure. A (🔼) symbol shifted to the right indicates that the level was rated and that the box for "Child is emerging to the next level" was also marked. A row with no symbol means the child has not yet been assessed for that measure or that "Unable to rate" was marked.

LANGUAGE AND LITERACY with Ruby

1/09 Ruby works at an overhead projector.
"Mira Maestra."
"You look like you're working very hard."
"Mmhmm. A lot of work."
"Can you tell me about this?"
"I do my name. Ruby. R, R (letter sounds)."

2/09 Ruby understands and follows the request, "Please put your work in the drying rack, put the paint away, and then wash your hands."

2/09 Ruby works side by side with Elizabeth, sharing a set of watercolors. She works first to paint her name, and then begins painting various other letter like forms. She identifies, in English, an O, M, B and C.

4/09 Ruby draws this picture after a discussion conducted in English about the death of a classroom caterpillar. She explains, "La oruga se cayo en el suelo y se murio. La Sra. Wilson la puso en el jardin para que descanse alli."

Translation-"The caterpillar fell in the ground and it died. Mrs. Wilson put it in the garden so it can rest there."

5/09 After listening to a story read aloud in English about the butterfly lifecycle, Ruby draws this representation. She draws each scene on a separate page of her booklet and dictates the story in English. She includes a front cover and points to her name when asked who the author is.

1

RUBY

2

"The eggs coming through the hole in the butterfly."

3

"Right here, the baby butterfly coming through the leaf."

4

"Right here, the mommy and the daddy crying because the baby not coming out the tummy of the mom."

5

"Right here, the brother and sister crying because the baby not coming from the tummy the mom."

School age Portfolio

Self Concept + Literacy

Children show self-awareness and a positive self-concept

Children demonstrate emerging literacy skills

Uriel is 11 years old and Spanish was his primary language. He has been bilingual for 6 years. He has attended the after-school program for 6 years.

10/12

Uriel had snack with friends outside. He shared in conversation that he had two brothers and he was in the middle. He also told that he is a peace patrol officer and a club leader.

Self Concept with Uriel

LITERACY with Uriel

Child Uriel Date 5/22/ Time 4:00pm
 DR1 DR2 DR3 DR4 Indicator/Measure Lit 3 mea 24
Lit 4 mea 25

OBSERVATION

Uriel had finished reading the third book in the Harry Potter series. He was writing his book report and was sharing with a first grader about why he thought the first book was better than the third book.

Child Uriel Date 6/7/05 Time 3:45pm
 DR1 DR2 DR3 DR4 Indicator/Measure Lit 4 mea 25

OBSERVATION

Uriel wanted to write a skit for the 5th grade graduation on "Captain Kind". He wanted it to follow the song and book. While playing the song over and over he wrote out the words. When it was time for him to go home, the skit was 1/2 done.

6/2

Uriel will select a book from the reading corner nearly everyday. He finds a comfortable chair or cushion and reads to himself in soft whispers for 10 to 15 minutes.

Child Uriel Date 5/23/ Time 3:10pm
 DR1 DR2 DR3 DR4 Indicator/Measure Lit 1 mea 22

OBSERVATION

Took out the game upwards and proceeded to read the directions to teach three other children how to play the game. Half way through reading the directions, one child quit. Another child came and asked if she could play. Uriel patiently recapped the directions already read and they began to play. They played for 30 minutes.

Uriel's Writing Sample

Once there was a pirate
at a carnival with a bag
full of jewels. Everyone wanted
some jewels, especially the greedy
people. But one day he woke up
and got ready, then went to
his place where the jewels were.
But when he went there his
jewels were gone! He looked
and looked. But he couldn't
find them! The man who took
it, the jewels were his. And the
man who took it was his brother.

7/12

Uriel and four other children entered an essay contest through the YMCA program. The topic was the importance of having a hero.

Uriel won the contest with his essay and his prize was having the professional pitcher, Adam Eaton, visit the center to meet and talk with the children about baseball and having heroes in their lives.

Completing a Child's Developmental Progress Form

Session 3

GOALS:

The goal of this activity is for the participants to practice completing a Child's Developmental Progress form.

MATERIALS REQUIRED:

- Copies of observation notes and portfolio for preschool child
- Copies of a completed DRDP or use the completed sample from the previous activity
- Copy of blank Child's Developmental Progress Form
- Copy of completed sample Child's Developmental Progress form

TIME: 30
minutes

ACTIVITY PROCESS:

1. Explain that the Child's Developmental Progress Form is used during the parent conferences to describe an individual child's development. Teachers use this form to summarize adult observations, developmental profile data, and parent conference notes. Avoid using DRDP terminology with parents, as it may be difficult for them to understand. When discussing a child's developmental progress, talk about his or her strengths, areas for improvement, and goals he or she should meet. Write parent feedback on the form.
2. Have participants work in table groups.
3. Ask each small group to review the preschool portfolio and completed DRDP
4. Using the DRDP as a reference, have each group identify three strengths and at least one area needing improvement to report to the parents. Find one way that the program can help the preschooler learn and develop. Collaborate with the family on one or more ways that the preschooler could be supported at home.
5. Each group may record this information on a blank progress form.

REFLECTION:

1. Distribute the completed sample progress form. Explain that there are many ways to complete the form. Ask the participants how the information provided by this imaginary teacher compares with what they wrote.
2. Discuss any remaining questions the participants may have about using the summary form.
3. While programs may not delete any of the fields from the Child Developmental Progress Form, additional information may be added.

Child's Developmental Progress

Child's Name: _____

Date of Conference: _____

Agency/Site: _____

This form describes your child's developmental progress in achieving four broad desired results for all children:

- ❖ Children are personally and socially competent
- ❖ Children are effective learners
- ❖ Children show physical and motor competence
- ❖ Children are safe and healthy

Your child's strengths include...

Areas your child is currently working on include...

We (teachers, caregivers, families) can help your child learn and develop in the program by...

Summary of Your Child's Developmental Progress [SAMPLE]

This summary describes your child's developmental progress in achieving four broad desired results for children:

- Children are personally and socially competent.
- Children are effective learners.
- Children show physical and motor competence.
- Children are safe and healthy.

Your child's strengths include:

- Amy has formed friendships with many children in the program. She is willing to listen to others during conflict and tries to provide solutions when asked. Amy has expressed concern for her friends when they are hurt or feeling sad.
- Amy spends time engaged in dramatic play. This play continues from day-to-day, repeating over many days.
- Amy has begun to express interest in attempting to write down her stories, making wavy lines across the paper to look like writing.
- She uses the climbing structure, bikes in the yard, and practices her climbing, running, jumping and galloping.

Areas your child is currently working on:

- Amy is exploring number concepts, counting and quantities to five.
- Amy spends a lot of time drawing or writing symbols for her stories. This is one of the first steps in reading and writing.
- She practices putting on her shoes and socks regularly, requesting assistance when needed.

We can help your child learn and develop by...

In the program

- Providing support to help her use letters in her writing attempts through dictation.
- Providing opportunity and materials for her to practice use of numbers and math ideas.
- Allowing Amy increased opportunity to orally share her ideas in conversation.
- Adding new materials to the outdoor environment that offer Amy more challenging experiences to further develop her motor skills.

At home

- Talk with Amy about any activities that may have happened that day.
- Read and tell stories at home, pointing out familiar words and asking questions about what you read.
- Help Amy recognize letters in her name and other familiar letters in print.
- Inform us of any progress, questions or ideas you may have regarding Amy's development.

Writing a Summary of Findings

GOALS:

The goal of this activity is to provide participants with practice in identifying key findings in the DRDP® Group Data Summary spreadsheet. Participants will also gain experience writing a summary of findings.

Session 3

MATERIALS REQUIRED:

- Copies of the DRDP® Summary of Findings: Narrative
- Copies of the completed sample DRDP® Group Data Summary
- DRDP® Classroom Summary of Findings form
- Sample of completed DRDP® Classroom Summary of Findings form

TIME: 30-45 Minutes

ACTIVITY PROCESS

1. Read (or ask participants to read) the DRDP® Summary of Findings: Narrative handout. Stop at the end of the sentence that follows “Identifying Key Findings.”
2. Work in small groups. Have each group identify key findings from the domains and measures presented in the narrative.
3. Ask each group to discuss the questions provided for the domains and measures. Have the groups then complete the DRDP® Classroom Summary of Findings form.

Return to the large group. Ask one member from each small group to share with the large group the group’s discussions and completed forms. Discuss any remaining questions or concerns.

DRDP® Summary of Findings: Narrative

Introduction

Every child in a Title V program must have a completed Desired Results Developmental Profile®. This is true for children in both center-based programs and family child care home education networks.

The CPM/CMR requires that the programs then summarize all the profile information for each group.

Ways to Summarize Profile Information

These programs should identify trends among various age groups and categories. Effective Fall of 2015 EESD programs are required to enter their data into DRDPtech: DRDPtech uses psychometric measurement to provide valid reports for individual children, groups of children. Data can also be provided across many other parameters (classrooms, sites, teachers, etc).

Practice: Identifying Key Issues

For this activity, we have provided a narrative of the results for a group of twenty-four 4 year-old children within three domains: SED, LLD, and COG. This is the first assessment of the year and took place in October 2014. All children will be going to kindergarten next fall.

Measures SED1 through SED5, under the domain SED:

Social and Emotional Development indicates how preschool children acquire the social skills, self-awareness, and personal qualities that are interconnected with learning in a classroom. In our sample class average for SED, 3% have mastered the “exploring later ” developmental level, 12% have mastered “building earlier”, 62% have mastered "building middle" and 23% have mastered the "building later” developmental level.

- What does this information tell you about this group of children?
- How can the teacher modify the curriculum to support the children’s learning in Self and Social Development?
- How can the teacher improve the environment to support the children’s learning?
- Would books or group activities encourage cooperative play?

Based on these answers, what can teachers do to support the group’s movement towards the Desired Result: #1 “Children are personally and socially competent?”

Look now at the ten measures under the domain LLD: Language and Literacy Development. These measures look at a group of children who show growing abilities in communication and language. Within the group domain average, 0% of children are “not yet at first level”, 4% are at the “exploring later” level, 28% have mastered “building earlier”, 33% have mastered “building middle”, 33% have mastered “building later” and 2% have mastered integrating earlier.

- What does this information tell you about this group of children?
- How can the teacher modify the curriculum to improve communication and language?
- How can the teacher improve the environment to support learning?
- Do the children have opportunities to develop communication and language abilities?
- Do the children have materials, equipment, and activities that support communication?

Based on these answers, what can teachers do to support the group’s movement towards the Desired Result #1: “Children are personally and socially competent?”

The third domain in the sample is COG: Cognition, Including Math and Science. There are eleven measures under this domain. These measures look at how children construct mathematical knowledge. Within this domain the group average is, 3% of children were at the “not yet at first level”, 0% are at the “exploring later” developmental level, 17% have mastered “building earlier”, 42% have mastered “building middle”, 26% have mastered “building later”, and 12% have mastered “integrating earlier”

- What does this information tell you about this group of children?
- How can the teacher modify the curriculum to support approaches to learning?
- How can the teacher improve the environment to support learning?
- Do the teachers give children opportunities to show interest, motivation, and persistence?
- Are teachers offering materials, equipment and ideas that are interesting, motivating and encourage persistence?

Based on the answers to questions like these, what can teachers do to support the group’s movement towards the Desired Result #2: “Children are effective learners?”

Instructions For Desired Results Developmental Profile Summary of Findings (EESD 3900) For The Classroom and Family Child Care Home Level

A critical step toward supporting children's learning and developmental progress is for teachers to complete a Desired Results Developmental Profile (DRDP) for each child in the classroom or family child care home. Teachers should refer to the individual developmental profiles and the summary of all the developmental profiles for the classroom or home setting, as a guide for ongoing planning.

To help ensure DRDP data is linked to ongoing classroom or group planning for children, the DRDP Summary of Findings (EESD 3900) form has been developed as a resource. The DRDP Summary of Findings is a recommended form to assist teachers and providers in the planning process. Regardless of whether this resource is used or the program develops their own form, the written process must be completed and include all information detailed below, to ensure activity plans reflect the results of classroom or family child care home DRDP data.

The EESD 3900 form includes Key Finding(s), Action Steps, Expected Completion Date and/or Ongoing Implementation and Persons Responsible, and Follow-Up and Reflection. The first three sections of this form are completed after the first 60-day assessment period. The Follow-Up section should be completed periodically, with Reflections recorded after the six-month follow-up assessment period to document progress of the Key Finding(s).

Top Section of EESD 3900 Form

- Complete the Contractor Name. Identify the Contract Type, and/or Family Child Care Home Education Network (FCCHEN), and Age Group. The contract type may be California State Preschool Program (CSPP), California Center-based (CCTR), California Severely Handicapped (CHAN), Family Child Care Home (CFCC), or California Migrant (CMIG).
- Record the Planning Date. This is the date the first three sections of the form are completed. Identify the Lead Planner's Name and Position. This is the teacher completing the EESD 3900 form.
- Record the Follow-up Date(s). These dates indicate when the Action Steps have been reviewed during the following six months. The Follow-up Date will also indicate when reflections are recorded (see Follow-up and Reflection below).

Key Findings from Developmental Profiles – Ask: Developmentally, what do we know about the children currently enrolled in our classroom?

- Summarize and review the results of the DRDPs after the first 60-day assessment period. Sample tally sheet forms and excel spreadsheets can be found at the Desired Results Web page at <http://www.desiredresults.us/index.htm>.
- Identify trends or patterns in the childrens' development (key findings) at the domain level based on individual information that has been summarized to create a group summary of data.

Action Steps Implementation – Ask: What goals can we set to meet the needs of the children currently enrolled in our classroom?

- Develop and write attainable Action Steps to improve the key finding(s).
- Action Steps should include new approaches, modifications, and/or changes to:
 - Planned learning opportunities, indoors and outdoors
 - Interactions and strategies to support the development of the key findings
 - The environment and materials
 - Strategies that help families engage in supporting the development of their child
- The following are resources for teachers and providers when developing Action Steps:
 - *California Infant/Toddler Curriculum Framework* at <http://www.cde.ca.gov/sp/cd/re/documents/itcurriculumframework.pdf>
 - *California Preschool Curriculum Framework, Volumes 1-2* at <http://www.cde.ca.gov/sp/cd/re/psframework.asp>
 - *Guidelines for Early Learning in Child Care Home Settings* at <http://www.cde.ca.gov/sp/cd/re/documents/elguidelineshome.pdf>

Expected Completion Date and/or Ongoing Implementation and Persons Responsible – Ask: How do we accomplish our classroom goals?

- Enter the date when the Action Steps will be completed.
- Enter "Ongoing" when the Action Step implementation will continue throughout the year.
- Identify the key person(s) who will be responsible for each Action Step.

Follow-Up and Reflection – Ask: By when?

- Periodically review the status of all the Action Steps, completion dates, persons responsible, and follow-up.
- Record modifications or changes needed to complete the Action Steps, and expected completion dates.
- After the six-month follow-up assessment period, tally and review the results of the DRDPs. Reflect on the results and record progress or changes made to the key finding(s), including data.
