

DRDP (2025) Preschool Videos: Measuring

A good piece of evidence might address multiple measures. Rather than assigning a developmental level, this video clip could serve as evidence for the measures listed in this chart.

Domain	Measure definition	Why this video clip might be evidence
Approaches to Learning (ATL) Measure 2 Curiosity, Interest, and Initiative	<p>Child develops increasing capacity to explore objects, activities, or ideas and takes initiative to seek information and understanding.</p> <p>Select measure ATL 2 and read the descriptor and examples for Building Middle.</p>	<p>This video might be evidence for Building Middle. The child is exploring weight using different objects and answering when prompted by an adult.</p>
Social Emotional Development (SED) Measure 4 Relationships and Interactions with Peers	<p>Child develops and maintains close relationships with one or more peers and becomes increasingly competent and cooperative in peer interactions.</p> <p>Select measure SED 4 and read the descriptor and examples for Exploring Later.</p>	<p>This video might be evidence for Exploring Later. The child briefly engages with another child while playing with the scale.</p>
Foundational Language Development (FLD) Measure 1 Understanding Language (Receptive)	<p>Child understands increasingly complex language, including vocabulary in home language, English, sign language, or Augmentative and Alternative Communication (AAC)</p> <p>Select measure FLD 1 and read the descriptor and examples for Exploring Later.</p>	<p>This video might be evidence for Exploring Later. The child shows understanding of the teacher's questions as he explores different objects using the scale.</p>
Math (Math) Measure 5 Measurement	<p>Child shows increasing understanding of measurable properties such as size, length, weight, and capacity (volume), and how to quantify those properties.</p> <p>Select measure MATH 5 and read the descriptor and examples for Building Middle.</p>	<p>This video might be evidence for Building Middle. The child identifies which side is heavier by weight and switches materials to see which weighs more or less.</p>
Science (SCI) Measure 2 Inquiry through observation and investigation	<p>Child develops increasing ability to carry out observations, explorations, and investigations in the environment.</p> <p>Select measure SCI 2 and read the descriptor and examples for Building Earlier.</p>	<p>This video might be evidence for Building Earlier. The child engages with and explores objects while using the scales to see which side is heavier.</p>

Now it's your turn! What other measures are reflected by the evidence in the video clip?

Domain/Measure	What Measures or Levels Do You See?
