The environment is seen as a third teacher. There is a shift from planning 'what to do' to teachers setting up the environment for encounters, experiments and exchanges, creating a sense of wonder and desire to go further, to know more. It is purposeful and intentional.

Questions for Reflection

1. How do you, or could you, organize your classroom environment to facilitate classification skills?
2. How could you integrate sorting and patterning into children's current topic of study?
3. What sorting or patterning activities would you, children who are just beginning to grasp these concepts?
4. How do you engage children in exploring and describing patterns?
5. How do you, or could you, use classification and experiences to develop children's language and to introduce new vocabulary?

How would you use the Questions for Reflection from the Curriculum Framework to change, or justify, your ERS scores?

Key Points from the Article

- ❖ Self-assessment increases the teachers' awareness of the actual environment and practices.
- ❖ To create significant changes, staff must have adequate training to produce accurate scores on the ERS and the will to work towards quality and support.

25

25

Tips for Setting up a Quality Environment

- Read the ERS for appropriate age level.
- Become familiar with the requirements for 5s and 7s.
- Download ERS cards and post them in the classroom.
- Practice rating your classroom even if an assessor will be rating the environment.
